Important information for Singapore investors

The information pertaining to the eligible Sub-Funds under the restricted scheme in Singapore (the "Shares"), which is the subject of this document, is an exempt offer made only: (i) to "institutional investors" pursuant to Section 304 of the Securities and Futures Act, Chapter 289 of Singapore (the "Act"), (ii) to "relevant persons" pursuant to Section 305(1) of the Act, (iii) to persons who meet the requirements of an offer made pursuant to Section 305(2) of the Act, or (iv) pursuant to, and in accordance with the conditions of, other applicable exemption provisions of the Act. Not all Sub-Funds presented in this document are authorised, recognised nor presented under the restricted scheme in Singapore.

No exempt offer of the Shares for subscription or purchase (or invitation to subscribe for or purchase the Shares) may be made, and no document or other material (including this document) relating to the exempt offer of Shares may be circulated or distributed, whether directly or indirectly, to any person in Singapore except in accordance with the restrictions and conditions under the Act. By subscribing for Shares pursuant to the exempt offer under this document, you are required to comply with restrictions and conditions under the Act in relation to your offer, holding and subsequent transfer of Shares.

The Sub-Funds are not authorised or recognised by the Monetary Authority of Singapore ("MAS") and the Shares are not allowed to be offered to the retail public in Singapore. Some of the Sub-Funds are presented under the restricted scheme under the Sixth Schedule to the Securities and Futures (Offers of Investments) (Collective Investment Schemes) Regulations of Singapore. Please note that not all Sub-Funds mentioned in this document is presented under the restricted scheme.

This document shall always be read in conjunction with the current Information Memorandum of Nordea 1, SICAV.

For further information, please refer to the currently valid Information Memorandum of Nordea 1, SICAV.

No subscriptions can be received on the basis of these financial reports. Subscriptions are only valid if made on the basis of the current prospectus accompanied by the latest annual report and the most recent semi-annual report, if published thereafter.

Report of the Board of Directors

The Chairman's report

After a promising start, 2022 proved to be a rather challenging year, not only for Nordea 1, SICAV (the Company), but for the entire asset management industry, with sharp market regime shifts and main asset classes experiencing significant losses. This was due to an accumulation of black swans, such as the special circumstances imposed by the COVID-19 pandemic still in place beginning of the year, the war in Ukraine triggering a surge in the price of commodities, high inflation, along with key central banks initiating monetary tightening and interest rates hikes to fight this inflation. All of this led to a growing fear of recession as investors were concerned by a more hawkish stance of the US Federal Reserve. Indeed, remarks from the Federal Reserve to keep acting "forcefully" to fight inflation, even if it could harm the economy in the short-term, took investors by surprise and fueled volatility. As a result, both developed and emerging market equities tumbled, with the latter doing relatively better.

Equities closed 2022 on a slightly negative note as their sharp tumble in December erased a large part of the Q4 2022 rebound. Emerging markets experienced a strong come back in the last quarter of the year while US and Chinese equities slightly underperformed their respective peers. Style wise, value massively outperformed growth, as higher risk-free rates and mounting recession risks took a toll on the historically stretched valuation of the latter. Sector wise, communication services and consumer discretionary suffered the most, while energy was the only sector in positive territory due to the war in Ukraine and sanctions on Russia.

Although there is no certainty about future macro and market environments, investors need to pay attention to inflation, monetary policies as well as the growth outlook in 2023 since these will be important influencing factors for financial markets. Having said this, diversification remains key to investors' portfolios as it provides the ability to navigate an increasingly complex market environment.

After the record heights in Assets under Management end of 2021, focus of investors moved from greed to fear and to safer assets as energy prices and yields went up rapidly. Fixed income solutions were hit with regards to performance and Nordea 1, SICAV fixed income funds have seen their assets decrease by EUR 8.8 billion and for equity strategies assets decreased by EUR 6 billion, with half of this decrease stemming from the Emerging Stars Equity Fund.

All in all, the Company's assets under management went from EUR 92.6 billion end of 2021 to EUR 74.3 billion end of 2022. Also the total amount of net flows into Nordea 1, SICAV decreased from a positive EUR 9.1 billion end of 2021 to a negative EUR 8.1 billion end of 2022. The strong start of the year with inflows from prominent clients was turned around by material outflows in the second half of 2022. The most significant net outflows were experienced by the Low Duration European Covered Bond Fund which saw its asset base decrease by EUR 2.4 billion compared to last year.

The total asset base end of 2022 was allocated across 83 sub-funds which is 6 more compared to end of 2021. Many of the new sub-funds introduced during the year have a tilt towards ESG, building on the Company's strong position in this field. As in 2021, the soft closed Global Climate and Environment Fund is the largest sub-fund with its EUR 9.5 billion in AuM. The Stable Return Fund continues to be the second largest sub-fund with EUR 6.1 billion in AuM end of 2022.

At the Annual General Meeting of Shareholders, the Board of Directors will propose that, for the financial year 2022, Nordea 1, SICAV pays the following dividends:

We, as the Board of Directors, remain committed to offering our investors robust and sustainable solutions despite the current difficult economic and geopolitical environment.

The Board would like to thank all stakeholders involved in the running of Nordea 1, SICAV for their contribution in 2022. In this spirit of commitment and motivation, the Board is looking forward to continuing to service the shareholders in the best way possible also in 2023.

Luxembourg, 23 March 2023

Claude Kremer, Chairman

The information stated in the report is historical and is not representative of future results.

Corporate Governance Statement

Introduction

Nordea 1, SICAV (hereafter the “Company”) has been authorised by the Commission de Surveillance du Secteur Financier (the “CSSF”) as an undertaking for collective investment in transferable securities (“UCITS”). The Company complies with the principles of good governance set out in the Association of the Luxembourg Fund Industry (“ALFI”) Code of Conduct Revision 2022 issued by ALFI in June 2022. The Board of Directors of the Company (the “Board of Directors”) is committed to maintaining the highest standards of corporate governance and is accountable to shareholders for the governance of the Company’s affairs. This statement summarises the corporate governance structure and processes in place for the Company for the period under review.

Board of Directors Composition

The Board of Directors currently consists of five Directors, (including three independent Directors). The Board of Directors is committed to maintaining an appropriate balance of skills, experience, independence and knowledge amongst its members. The Company’s Articles (the “Articles”), in accordance with Luxembourg law, provides that Directors shall be elected by the shareholders at their annual general meeting and they are subject to the approval of the CSSF. Directors serve until their term ends, they resign, or their mandate is revoked, in accordance with the Company’s Articles.

Members of the Board of Directors shall start an induction program, if required by the Board of Directors, as soon as practicable after the appointment. Each respective Board of Directors shall self-evaluate its work every second year with the aim of developing its working methods and efficiency.

Board of Directors Responsibilities

The Board of Directors meets at least quarterly and also on an ad hoc basis as required. The Board of Directors is supplied with information in a timely manner.

The Board of Directors is responsible for the overall investment policy, objectives and management of the Company and, as described more fully in the Articles, has broad powers to act on behalf of the Company, including:

- appointing and supervising the management company;
- setting investment policy and approving the appointment of any investment manager or sub- investment manager;
- making all determinations regarding the launch, modification, merger or discontinuation of the Company and share classes, including such matters as timing, pricing, fees, base currency, dividend policy and payment of dividends, liquidation of the Company, and other conditions;
- determining eligibility requirements and ownership restrictions for investors or share class, and what steps may be taken in the case of any violation;
- determining the availability of any share class to any investor or distributor or in any jurisdiction;
- determining when and how the Company will exercise its rights and will distribute or publicise shareholder communications;
- ensuring that the appointments of the management company and the depositary bank are consistent with the 2010 Law and any applicable contracts of the Company;
- determining whether to list any shares on the Luxembourg stock exchange.

The Board of Directors may delegate some of these responsibilities to the Management Company.

Board of Directors Remuneration

The Company shall pay an aggregate remuneration to the independent Directors amounting to EUR 100,000 gross per annum, excluding Luxembourg VAT, if any, subject to shareholder approval in the Annual General Meeting and is included within the caption “Approval of Directors’ fees”. Nordea representative do not receive any compensation for their directorship.

Audit Report

To the Shareholders of
Nordea 1, SICAV

Our opinion

In our opinion, the accompanying financial statements give a true and fair view of the financial position of Nordea 1, SICAV (the "Fund") and of each of its sub-funds as at 31 December 2022, and of the results of their operations and changes in their net assets for the year then ended in accordance with Luxembourg legal and regulatory requirements relating to the preparation and presentation of the financial statements.

What we have audited

The Fund's financial statements comprise:

- the statement of net assets as at 31 December 2022;
- the statement of operations and changes in net assets for the year then ended;
- the statement of investments in securities and other net assets as at 31 December 2022;
- the statement of derivative instruments as at 31 December 2022; and
- the notes to the financial statements, which include a summary of significant accounting policies.

Basis for opinion

We conducted our audit in accordance with the Law of 23 July 2016 on the audit profession (Law of 23 July 2016) and with International Standards on Auditing (ISAs) as adopted for Luxembourg by the "Commission de Surveillance du Secteur Financier" (CSSF). Our responsibilities under the Law of 23 July 2016 and ISAs as adopted for Luxembourg by the CSSF are further described in the "Responsibilities of the "Réviseur d'entreprises agréé" for the audit of the financial statements" section of our report.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

We are independent of the Fund in accordance with the International Code of Ethics for Professional Accountants, including International Independence Standards, issued by the International Ethics Standards Board for Accountants (IESBA Code) as adopted for Luxembourg by the CSSF together with the ethical requirements that are relevant to our audit of the financial statements. We have fulfilled our other ethical responsibilities under those ethical requirements.

Other information

The Board of Directors of the Fund is responsible for the other information. The other information comprises the information stated in the annual report but does not include the financial statements and our audit report thereon.

Our opinion on the financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

T: +352 494848 1, F: +352 494848 2900, www.pwc.lu

Cabinet de révision agréé. Expert-comptable (autorisation gouvernementale n°10028256)
R.C.S. Luxembourg B 65 477 - TVA LU25482518

In connection with our audit of the financial statements, our responsibility is to read the other information identified above and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Responsibilities of the Board of Directors of the Fund for the financial statements

The Board of Directors of the Fund is responsible for the preparation and fair presentation of the financial statements in accordance with Luxembourg legal and regulatory requirements relating to the preparation and presentation of the financial statements, and for such internal control as the Board of Directors of the Fund determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the Board of Directors of the Fund is responsible for assessing the Fund's and each of its sub-funds' ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the Board of Directors of the Fund either intends to liquidate the Fund or close any of its sub-funds or to cease operations, or has no realistic alternative but to do so.

Responsibilities of the "Réviseur d'entreprises agréé" for the audit of the financial statements

The objectives of our audit are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an audit report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with the Law of 23 July 2016 and with ISAs as adopted for Luxembourg by the CSSF will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with the Law of 23 July 2016 and with ISAs as adopted for Luxembourg by the CSSF, we exercise professional judgment and maintain professional scepticism throughout the audit. We also:

- identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control;
- obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Fund's internal control;
- evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the Board of Directors of the Fund;

- conclude on the appropriateness of the Board of Directors of the Fund's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Fund's or any of its sub-funds' ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our audit report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our audit report. However, future events or conditions may cause the Fund or any of its sub-funds to cease to continue as a going concern;
- evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

Nordea 1 - Global Social Solutions Fund	22/09/2022
Nordea 1 - Global Sustainable Listed Real Assets Fund	18/08/2022
Nordea 1 - Global Value ESG Fund	08/09/2022

b) Sub-funds liquidations and mergers

The following Sub-funds have been liquidated or merged during the year:

Closing Sub-fund	Absorbing Sub-fund	Effective date
Nordea 1 - Emerging Market Bond Opportunities Fund	Nordea 1 - Emerging Stars Bond Fund	01/06/2022
Nordea 1 - Long Duration US Bond Fund	Liquidated	16/09/2022
Nordea 1 - North American Small Cap Fund	Nordea 1 - Global Small Cap Fund	09/12/2022

c) Sub-fund name change

The following Sub-fund has been renamed during the year:

Old name	New name	Effective date
Nordea 1 - European Small and Mid Cap Equity Fund	Nordea 1 - European Small and Mid Cap Stars Equity Fund	01/08/2022

Note 2 - Summary of significant accounting policies

The financial statements are prepared in accordance with Luxembourg legal and regulatory requirements relating to investment funds under the going concern basis of accounting.

a) Valuation of investment securities

Investment securities are valued as follows:

- Securities and Money Market Instruments admitted for official listing on a stock exchange or traded in another regulated market within Europe, North or South America, Asia, Australia, New Zealand or Africa, which operates regularly and is recognised and open to the public are valued on the basis of the last available price at the time when the valuation is carried out. If the same security or money market instrument is quoted on different markets, the quotation of the main market for this security or money market instrument will be used. If there is no relevant quotation or if the quotations are not representative of the fair value, the evaluation will be done in good faith by the Board of Directors or its delegate with a view to establishing the probable bid price for such securities;
- unlisted securities or unlisted Money Market Instruments are valued on the basis of their probable bid price as determined in good faith by the Board of Directors or its delegate;
- liquid assets and loans are valued at their nominal value plus accrued interest;
- units/shares of UCITS authorised according to Directive 2009/65/EEC as amended and/or other assimilated UCI are valued at their last available net asset value;
- Repurchase agreements are valued by discounting the forward payment to the pricing date whilst subtracting the accrued interest on the pricing date to obtain a clean price.

b) Net realised gain or loss on sales of investment securities

The net realised gain or loss on sales of securities is determined on the basis of the average cost of the securities sold.

c) Foreign exchange translation

The financial statements of each Sub-fund of the Company are expressed in the base currency of each sub-fund. Assets and liabilities in currencies other than the base currency are translated into the base currency at the exchange rates prevailing at year-end. Income and expenses in currencies other than the base currency are translated into the base currency at the exchange rates prevailing at payment dates. Resulting foreign exchange gains or losses are included in the Statement of Operations and Changes in Net Assets.

The principal exchange rates used at the end of the year were:

1 EUR = 1.57067200 AUD	1 EUR = 0.98500400 CHF	1 EUR = 7.37474809 CNH
1 EUR = 7.43644092 DKK	1 EUR = 0.88701903 GBP	1 EUR = 140.7247608 JPY
1 EUR = 10.51900109 NOK	1 EUR = 4.68422600 PLN	1 EUR = 11.11853158 SEK
1 EUR = 1.43024900 SGD	1 EUR = 1.06735000 USD	

d) Cost of investment securities

The cost of investment securities denominated in currencies other than the sub-fund's base currency is translated into the base currency at the exchange rate prevailing at the date of purchase.

Notes to the Financial Statements as of 31/12/2022 (continued)

e) Dividends and interest

Dividends are recorded net of withholding taxes. They are recognised as income on the date securities are first quoted ex-dividend, to the extent that information thereon is reasonably available to the Sub-fund. Interest on bonds is accrued on a daily basis.

f) Financial futures contracts

The Company is authorised to buy and sell financial futures contracts. Upon entering into a contract the Company deposits and maintains cash as collateral with the clearing broker Merrill Lynch International Limited. The cash margin calls needed to cover the required contract margins are adjusted daily in the Company cash accounts, and results on open positions are considered as realised at that point in time but reflected as unrealised gain/(loss) in the financial statements ("Unrealised gain on futures already cashed"/"Unrealised loss on futures already cashed"). The margin is calculated as the difference between the value of the contract at previous valuation day and the financial future value at the valuation day.

g) Forward foreign exchange contracts

Forward foreign exchange contracts are valued at the forward rate applicable at the Statement of Net Assets date for the period until their maturity.

The net unrealised appreciation/(depreciation) on open forward foreign exchange contracts at year-end is disclosed in the Statement of Net Assets under "Unrealised gain/(loss) on forward foreign exchange contracts".

h) Equity Swaps

An equity Swap is a bilateral agreement in which a party acquires economic exposure to the performance of a reference asset for a specified term without actually owning that asset.

The underlying asset can be a stock, a basket of stocks, or an index or basket of indices.

Equity swaps are leveraged, which means that they allow an investor to acquire exposure to equity price movements in stocks without the cash outlay required to purchase those stocks.

The unrealised appreciation/(depreciation) is disclosed in the statement of net assets under "Unrealised gain/(loss) on equity swaps." Realised gains/(losses) and change in unrealised appreciation/(depreciation) resulting there from are included in the statement of operations and changes in net assets respectively under the heading "Net realised gains/(losses) on equity swaps" and "Changes in unrealised gain/(loss) on equity swaps."

The cash margin calls needed to cover the required contract margins are adjusted monthly in the Company cash accounts, and results on open positions are reflected as unrealised gain/(loss) in the financial statements ("Unrealised gain on equity swaps already cashed"/"Unrealised loss on equity swaps already cashed").

i) Credit default swaps (CDS)

A credit default swap is a credit derivative transaction in which two parties enter into an agreement, whereby one party (the protection buyer) pays the other (the protection seller) a fixed periodic coupon for the specified life of the agreement in return for a payment contingent on a credit event related to the underlying reference obligation.

If a credit event occurs, the protection seller would be obliged to make a payment, which may be either: (i) a net cash settlement equal to the notional amount of the swap less the auction value of the reference obligation or (ii) the notional amount of the swap in exchange for the delivery of the reference obligation. Selling protection effectively adds leverage to a fund's portfolio up to the notional amount of swap agreements.

Credit default swaps are marked to market at each NAV calculation date. The market value is based on the valuation elements laid down in the contracts, and is obtained from internal models which is then compared against the counterparty or the Clearing Counterparty (CCP). The initial value of the contracts is equal to the mark-to-market value at inception and an upfront payment is exchanged to ensure that the economic value of the transaction is zero at initiation of the trade for the two parties.

The unrealised appreciation/(depreciation) is disclosed in the statement of net assets under "Unrealised gain/(loss) on credit default swaps." Realised gains/(losses) and change in unrealised appreciation/(depreciation) resulting there from are included in the statement of operations and changes in net assets respectively under the heading "Net realised gains/(losses) on credit default swaps" and "Changes in unrealised gain/(loss) on credit default swaps." The upfront fee paid or received when entering the contract is included in the initial value of the contract and disclosed in the Statement of Net Assets under "Credit default swaps at cost".

j) Interest rate swaps (IRS)

An interest rate swap is a bilateral agreement in which each party agrees to exchange a series of interest payments for another series of interest payments (usually fixed/floating) based on a notional amount that serves as a computation basis which is usually not exchanged.

Interest rate swaps are marked to market at each NAV calculation date. The market value is based on the valuation elements laid down in the contracts, and is obtained from internal models which are compared against a third party valuation, the counterparty or the Clearing Counterparty (CCP).

The unrealised appreciation/(depreciation) is disclosed in the statement of net assets under "Unrealised gain/(loss) on interest rate swaps." Realised gains/(losses) and change in unrealised appreciation/(depreciation) resulting there from are included in the statement of operations and changes in net assets respectively under the heading "Net realised gains/(losses) on interest rate swaps" and "Changes in unrealised gain/(loss) on interest rate swaps." The upfront fee paid or received when entering the contract, if any, is included in the initial value of the contract and disclosed in the Statement of Net Assets under "Interest rate swaps at cost".

Notes to the Financial Statements as of 31/12/2022 (continued)

k) Total Return Swaps (TRS) on Index

A total return swap ("TRS") on Index is an agreement in which one party (total return payer) transfers the total economic performance of a reference asset to the other party (total return receiver) in exchange of payments based on a fixed or variable rate. Total economic performance includes income from dividends, interest and fees, gains or losses from market movements, and credit losses. The Company may only enter into such transactions through regulated financial institutions with a minimum credit rating of investment grade quality which has its registered office in one of the OECD countries.

The unrealised appreciation/(depreciation) is disclosed in the statement of net assets under "Unrealised gain/(loss) on total return swaps." Realised gains/(losses) and change in unrealised appreciation/(depreciation) resulting there from are included in the statement of operations and changes in net assets respectively under the heading "Net realised gains/(losses) on total return swaps" and "Changes in unrealised gain/(loss) on total return swaps."

The cash margin calls needed to cover the required contract margins are adjusted monthly in the Company cash accounts, and results on open positions are reflected as unrealised gain/(loss) in the financial statements ("Unrealised gain on total return swaps already cashed"/"Unrealised loss on total return swaps already cashed").

l) Options

Options are contracts entitling the holder to purchase or sell a specified number of shares or units of a particular security at a specified price at any time until the contract-stated expiration date. Options purchased are recorded as investments; options written (sold) are recorded as liabilities.

When the exercise of an option results in a cash settlement, the difference between the premium (original option value) and the settlement proceeds is accounted for as a realised gain or loss. When securities are acquired or delivered upon exercise of an option, the acquisition cost or sale proceeds are adjusted by the amount of the premium. When an option is closed, the difference between the premium and the cost to close the position is accounted for as a realised gain or loss. When an option expires, the premium is accounted for as a realised gain for options written or as a realised loss for options purchased.

The Company writes options on securities, futures and interest rate swaps ("swaptions"). These options are settled in cash and subject the Company to unlimited risk of loss. The Company, however, is not subject to credit risk on written options as the counterparty has already performed its obligation by paying the premium at the inception of the contract.

Listed options are priced via quoted prices from Refinitiv or Bloomberg. For In-The-Money and At-The-Money options where no quotes exist, a theoretical model using the under-lying prices and implied volatility curves is applied. The valuation of OTC Options like FX Options is based on a theoretical model which uses FX spot, FX Option volatility data and interest rates as input.

The valuation of swaptions is based on a theoretical model using swaption volatility data and interest rates. The model takes the settlement conventions from ISDA into account.

The market value of the options is disclosed in the statement of net assets under "Options bought or written at market value". Change in unrealised appreciation/(depreciation) resulting there from are included in the statement of operations and changes in net assets respectively under the heading "Net realised gains/(losses) on options" and "Changes in unrealised gain/(loss) on options".

m) Definition of terms used in the Statement of Investments in Securities and Other Net Assets and in the Credit Default Swaps (CDS) tables

FRN (Floating Rating Note): Bond with a coupon indexed to a benchmark interest rate such as LIBOR or Euribor plus or minus a spread. Only the dates of changes are known from the date of issue.

MULTI: Bonds for which the interest rates may change from Fixed-to-float or Fixed-to-variable and where interest rates and dates of the changes are known from the date of issue.

VAR: Bond with an interest rate varying during its lifetime other than FRN or MULTI.

PERPETUAL: This term is used for bonds with no maturity date. The principal amount is never paid to the investor and instead he receives a steady stream of interest forever.

P-NOTE (Participatory note): Instruments issued by registered foreign institutional investors (FI) to overseas investors, who wish to invest in the Indian stock markets without registering themselves with the market regulator, the Securities and Exchange Board of India - SEBI.

No ref obligation: Disclosed in the Credit Default Swaps tables, when no underlying reference bond is available in the official RED database from Markit.

n) Combined statements

The Company's Combined Statement of Net Assets and the Combined Statement of Operations and Changes in Net Assets are the sum of the statements of each fund translated into EUR at the prevailing exchange rates as at end of the year. The difference between opening total net assets stated at exchange rates ruling at the beginning of the year and their value at the end of the year is shown as an exchange difference in caption "Revaluation difference on opening net assets" in the Combined Statement of Operations and Changes in Net Assets.

Notes to the Financial Statements as of 31/12/2022 (continued)

o) Provisions on Indian Capital Gain Tax

Capital gains realized on the disposal of Indian listed stocks within 12 months after purchase (short term gains) are subject to a capital gains tax. The disposal of Indian listed stocks after 12 months after purchase (long term gains) were exempt until April 2018. Starting April 2018, India also introduced a capital gains tax on long term gains. Until 9 December 2021, the capital gains taxes were taken into account on an arisen basis a few days after each trade at the applicable rates for a short term gain or a long term gain without taking a provision into account. Since 9 December 2021, the capital gains taxes for funds investing in India are accrued in the Net Asset Value.

The provision is disclosed in the caption "Net other receivable" or "Net other payable" in the Statement of Net Assets and in the caption "Changes in unrealised gain/(loss) on securities" in the Statement of Operations and Changes in net Assets".

Fund name	Base currency	Amount
Nordea 1 - Asia ex Japan Equity Fund	USD	131,482.50
Nordea 1 - Asian Stars Equity Fund	USD	565,189.47
Nordea 1 - Emerging Stars Equity Fund	USD	5,981,279.71
Nordea 1 - Emerging Wealth Equity Fund	EUR	5,919.96
Nordea 1 - Global Climate Engagement Fund (Note 1a)	USD	5,498.27
Nordea 1 - Global Social Empowerment Fund	USD	-
Nordea 1 - Indian Equity Fund	USD	1,263,673.27
Nordea 1 - Stable Emerging Markets Equity Fund	USD	557,612.55

p) Last tradable Net Asset Value of the year

The annual report shows all Sub-funds with a tradable Net Asset Value dated 30 December 2022, except for the Nordea 1 - Latin American Equity Fund due to closed markets in Latin America on 30 December 2022. For this Sub-fund, a non-tradable Net Asset Value was calculated on 30 December 2022 for the purpose of these financial statements. This non-tradable Net Asset Value was based on the latest available market prices of the investments as at 30 December 2022.

Note 3 - Charges taken from the Company over a year

The charges cover Sub-fund operating costs, including management, administration, taxe d'abonnement and distribution costs. These fees are accrued on a daily basis on the total assets in the relevant share classes and Sub-funds and deducted from Sub-fund assets quarterly, and therefore reduce the performance of your investment.

These fees are the same for all shareholders of a given Sub-fund and share class.

a) Management fees: These fees, payable out of the assets of the relevant Sub-funds, are due to the management company. Management fees for D and Z shares are set in the separate terms that apply to investors in these shares. Management fees for X shares are not taken from the Sub-fund but are paid by investors in this type of shares. Management fees for Y shares are zero.

b) Operational expenses: These expenses consist of an administration fee (for central administration), depositary fees (charges for safekeeping and other associated services), and the taxe d'abonnement.

The taxe d'abonnement (subscription tax) is calculated and payable quarterly, on the aggregate net asset value of the outstanding shares of the SICAV. It is paid out of the operational expenses at the following rates:

Classes C, E, F, N, P, Q and S: 0.05%

Classes D, I, V, X, Y and Z: 0.01%

The value of the assets represented by the units or shares held in other Luxembourg undertaking for collective investment is exempted from any subscription tax, provided that such units or shares have already been subject to the Luxembourg subscription tax.

Safekeeping and related administration charges are based on the value of assets held in custody and vary from Sub-fund to Sub-fund depending on the countries the Sub-funds are invested in.

Operational expenses further include:

- All expenses of the auditor and legal advice
- All expenses connected with publication and supply of information to shareholders, in particular the cost of printing, the distribution of financial reports as well as any prospectuses
- All expenses related to the maintenance, production, printing, translation, distribution, dispatch, storage and archiving of the Key Investor Information Documents (the "KIIDs")
- Any advertising costs and expenses other than those specified above that the management company determines to be directly related to the offer or distribution of shares, and certain platform fees and expenses, as applicable.
- All expenses involved in registering and maintaining the registration of the SICAV with supervisory authorities and stock exchanges

Expenses not included in any of the above:

- all taxes payable on the assets and/or income except for the taxe d'abonnement
- depositary transaction fees
- other transaction-related fees, such as ordinary brokerage fees and commissions, bank charges, stamp duties and similar levies
- litigation expenses
- any extraordinary expenses or other unforeseen charges
- all other expenses chargeable to the SICAV

Notes to the Financial Statements as of 31/12/2022 (continued)

The following tables disclose the management fees and operational expenses of share classes available to (i) institutional investors and (ii) all investors excluding institutional investors

Management fees and operational expenses of share classes available to institutional investors:

(*) Effective rate charged to the share class at report date. "n/a" when no outstanding shares.

c) Distribution fee: This fee is paid to the management company and in principle forwarded to the local distributor or intermediary. The fee is charged only on E shares and is 0.75% a year.

d) Performance fee: The management company may receive a performance fee. The performance fee is deducted from the NAV and passed on to the investment manager for the respective Sub-fund.

For institutional share classes (except I share classes), the management company has the discretion to decide, prior to the first investment, to charge or not a performance fee and to determine the rate of performance fee that is applied to the share class.

In the case of X share classes, a performance fee may be directly invoiced by the management company to the investors per the separate charging structure agreed upon between each individual investor and the management company.

The investment manager may elect to forego its right to the performance fee. In such a case, the management company is not entitled to receive a performance fee from the respective Sub-fund.

Notes to the Financial Statements as of 31/12/2022 (continued)

Where applicable, performance fee is due if, at the end of the performance review period, the net asset value per share exceeds its respective high watermark and its accumulated hurdle rate since performance fee was last paid.

The performance of a share class is reviewed at the end of each calendar year. If a share class is created during a calendar year, the performance review period is from the date the share class was launched to the upcoming end of the calendar year.

The high watermark of a share is the greater of (i) the initial net asset value per share or, (ii) the highest net asset value price at the end of each calendar year. The performance reference period is equal to the whole life of the Sub-fund and cannot be reset.

The applicable hurdle rates are set out in the table below. A floor of 0% is applied to the hurdle rate, i.e. as long as the interest rate used as hurdle rate for any share class is negative, the hurdle rate is considered to be 0%. This means that performance fee cannot be charged if the value of the shares falls or remain unchanged during a calendar year.

Sub-fund	Hurdle rate	Max fee % C, E, F, P, I and Q classes
Nordea 1 - Global Equity Market Neutral Fund	EURIBOR 1 Month	15%

The performance fee is calculated and accrued daily and paid yearly in arrears, in respect of each calendar year.

At the end of the calendar year for which performance fee is to be calculated, the performance fee for each share is equal to maximum 15% of the appreciation of the net asset value per share (net of performance fee) in excess of the high watermark from when performance fee was last paid, after deduction of the accumulated hurdle rate since performance fee was last paid. Any performance fee due will generally be paid within 30 business days after the end of each calendar year.

In case a Sub-fund is liquidated, merged or in case of net redemptions as observed on any valuation day, the pro rata of the year-to-date performance accrual that relates to such shares is considered as due regardless of the performance of the Sub-fund after such liquidation, merger or net redemption.

Past performance against the hurdle rate is disclosed, once available, in the applicable KIID / Key Information Document ("KID").

Examples of how performance fee is calculated

Calendar year	NAV end of calendar year	Performance (net) end of calendar year	Hurdle rate	Accumulated hurdle rate since last performance fee	High watermark since last performance fee	Fee rate	Performance fee due
Year 1	105	5.00%	1.50%	1.50%	Exceeded with 5.00%*	15.00%	5.00% - 1.50% x 15.00% = 0.53%
Year 2	104	(0.95%)	1.00%	1.00%	Unchanged	15.00%	None
Year 3	103	(0.96%)	0%**	1.00%	Unchanged	15.00%	None
Year 4	106	2.91%	3.00%	4.03%	Exceeded with 0.95%	15.00%	None
Year 5	113	6.60%	1.00%	5.07%	Exceeded with 7.62%	15.00%	7.62% - 5.07% x 15.00% = 0.38%

* The initial subscription price represents the first high watermark. In this case the initial subscription price is 100.

** Hurdle rate is 0% if negative.

Note 4 - Repurchase transactions

Nordea 1 - European Covered Bond Opportunities Fund has opened Repurchase transactions on 31/12/2022 which are disclosed under the Statement of Derivative Instruments.

The revenues/(expenses) arising from Repurchase transactions are as follows:

Name of Sub-fund	Fund Currency	Revenues / (expenses)
Nordea 1 - European Covered Bond Opportunities Fund	EUR	(1,311,949.23)

Revenues/(expenses) are shown in the Statement of Net Assets under "Dividends and interest receivable" and in the Statement of Operations and Changes in Net Assets under "Net interest on repurchase transactions".

Notes to the Financial Statements as of 31/12/2022 (continued)

Note 5 - Statement of changes in investments

A list specifying for each Sub-fund the total purchases and sales in the investments which occurred during the period under review, can be obtained, free of charge and as hardcopy, from the Registered Office of the Company, the Depositary and the Principal Distributor or any company listed in the section "Representatives & Paying & Information Agents outside Luxembourg".

Note 6 - Total Expense Ratio (TER)

This ratio expresses the sum of all costs and commissions charged on an ongoing basis to the Sub-fund's net assets (operating expenses as shown under "Expenses" in the Statement of Operations and Changes in Net Assets but excluding the caption "Transaction related costs") taken retrospectively as a percentage of the average Sub-fund's net assets. The transaction fees incurred on the purchase and sale of investments are not included in the ratio. The TER is calculated in accordance with the Asset Management Association Switzerland (AMAS) guidelines dated 20 April 2015 and is in principle calculated using the following formula:

$$\text{TER \%} = \frac{\text{Total operating expenses in CU}^*}{\text{Average Sub-fund's net assets in CU}^*} \times 100$$

*CU = Currency units in the Sub-fund's accounting currency

The TER is calculated for the preceding 12 months as of the closing date of the financial year.

In the case of newly launched Sub-funds, the operating expenses are annualized.

Note 7 - Changes to the Prospectus of the Company during the reporting year

The latest prospectus of the Fund is the December 2022 Prospectus.

Latest versions of the KIIDs/KIDs for each of the Company's funds' share classes may be found on nordea.lu.

The current Prospectus and KIIDs/KIDs for the share classes of the Company's funds can also be obtained free of charge and as hard copy, from the registered office of the Company and of the Management Company.

Any material changes to the Prospectus will be communicated by a notice sent by mail to registered shareholders and made available on nordea.lu. Notices to shareholders will also be available at the registered office of the Management Company and the Fund's Representatives outside of Luxembourg.

Note 8 - Country and Economic sector classification of the portfolio (unaudited)

The economic sector classification of the portfolio is shown in accordance with the GICS Direct classifications (a joint product of MSCI and Standard & Poor's).

Note 9 - Share capital and share classes

Please refer to the sections "the SICAV" and "Share Classes" of the Company's prospectus for further information on the share capital and share classes of the Company respectively.

Note 10 - Swing factor

On business days when net dealing in Sub-fund shares exceeds a certain threshold, a Sub-fund's NAV may be adjusted by a swing factor. This adjustment reflects an assessment of the overall costs (estimated tax charges and trading costs that may be incurred by the fund and the estimated bid/offer spread of the assets in which the Sub-fund invests) incurred in buying or selling investments to satisfy, respectively, net subscriptions or net redemptions of shares (understanding that a Sub-fund generally maintains adequate daily liquidity to handle ordinary cash flows with little or no impact on ordinary investment operations). The NAV price will be adjusted upwards when net dealing in Sub-fund shares is positive (net subscription), and will be adjusted downwards when net dealing in Sub-fund shares is negative (net redemption).

Swing pricing is intended to reduce the impact of these costs on shareholders who are not dealing their shares at that time, and is impacting the shareholders who are dealing their shares by adjusting their NAV price by the swing factor. To the extent that markets have different charging structures on the buy and sell side, the swing factor may not be equal for net subscriptions or net redemptions.

The Board of Directors also delegated to the Management Company the decision-making regarding the correct application and level of swinging single pricing methodology. Although all Sub-funds may be subject to swing pricing, thresholds and swing factors, as fixed by the Management Company can vary by Sub-fund. Under normal market conditions, the adjustment swing factor will not be larger than 2.00% of what the NAV would otherwise be for all share classes within a Sub-fund.

Notes to the Financial Statements as of 31/12/2022 (continued)

During the year, the swing pricing mechanism was applied on the following Sub-funds:

Nordea 1 - Chinese Bond Fund	Nordea 1 - European Corporate Bond Fund	Nordea 1 - Global Green Bond Fund
Nordea 1 - Emerging Market Bond Fund	Nordea 1 - European Corporate Stars Bond Fund	Nordea 1 - Global High Yield Bond Fund
Nordea 1 - Emerging Market Bond Opportunities Fund (Note 1b)	Nordea 1 - European Cross Credit Fund	Nordea 1 - Inter High Yield Bd Fd USD Hedged
Nordea 1 - Emerging Market Corporate Bond Fund	Nordea 1 - European Financial Debt Fund	Nordea 1 - North American High Yield Bond Fund
Nordea 1 - Emerging Stars Bond Fund (Note 1b)	Nordea 1 - European High Yield Bond Fund	Nordea 1 - North American High Yield Stars Bond Fund
Nordea 1 - Emerging Stars Corporate Bond Fund (Note 1a)	Nordea 1 - European High Yield Credit Fund	Nordea 1 - US Corporate Bond Fund
Nordea 1 - Emerging Stars Local Bond Fund	Nordea 1 - European High Yield Stars Bond Fund	Nordea 1 - US Corporate Stars Bond Fund
Nordea 1 - EUR Corporate Bond Fund 1-3 Years (Note 1a)	Nordea 1 - Flexible Credit Fund	Nordea 1 - US High Yield Bond Fund

A swing amount has been booked in Nordea 1 - Chinese Bond Fund at reporting date.

Note 11 - Transaction fees

The transaction fees are in principle the sum of broker expenses and of bank commissions.

The transaction related costs, as disclosed in the table below and in the Statement of Operations and Changes in Net Assets, include the bank commissions and the broker fees on derivatives.

The broker costs, as disclosed in the table below, are the expenses and stock exchange taxes (where applicable) billed by the broker directly and paid to him in settlement of shares, bonds and options. They are registered as integral part of the cost price at the same time as the transaction itself.

Note 12 - Interim distribution

a) Annual distribution

The Company has distributed annual dividends at ex-date 22 April 2022 and pay date at 27 April 2022, as disclosed in the Report of the Board of Directors of the previous reporting year.

b) Interim distribution

During the reporting year, the Board of Directors of the Company decided on monthly distributions in respect of the following M-Share Classes:

Sub-fund name	Share Class	Monthly distribution rate	Distribution currency	Distributed amount per share
Nordea 1 - Alpha 10 MA Fund	HM - SGD	0.25%	SGD	0.579457
Nordea 1 - Danish Covered Bond Fund	HMX - JPY	0.15%	JPY	69.362354
Nordea 1 - European High Yield Bond Fund	MP	0.34%*	EUR	1.129981
Nordea 1 - Global Listed Infrastructure Fund	MP	0.25%	EUR	0.338169
Nordea 1 - North American High Yield Bond Fund	MX	0.44%**	EUR	5.936807
Nordea 1 - Stable Return Fund	HM - AUD	0.25%	AUD	0.748325
Nordea 1 - Stable Return Fund	HM - GBP	0.25%	GBP	0.382421
Nordea 1 - Stable Return Fund	HM - SGD	0.25%	SGD	0.6904
Nordea 1 - Stable Return Fund	HM - USD	0.25%	USD	0.518656
Nordea 1 - Stable Return Fund	ME	0.25%	EUR	0.410655
Nordea 1 - Stable Return Fund	MP	0.25%	EUR	0.429952
Nordea 1 - US Total Return Bond Fund	MI	0.40%	USD	4.52387

(*) 0.35% in January and February 2022

(**) 0.46% in January and February 2022

The monthly distribution rates as disclosed apply on the total net assets of the M-Share Classes of the last business day of the previous month.

Notes to the Financial Statements as of 31/12/2022 (continued)

Note 13 - Performance calculation

The performance is calculated in accordance with the Swiss Funds & Asset Management Association guidelines dated May 16, 2008 and is calculated using the following general formula:

$$\text{Performance \%} = \left\{ \frac{\text{NAV}_{\text{End P}} \times f_1 \cdot f_2 \dots f_n}{\text{NAV}_{\text{Start P}}} - 1 \right\} \times 100$$

NAV_{End P} Net asset value per unit at end of observation period

NAV_{Start P} Net asset value per unit at start of observation period (i.e. the last figure for the preceding observation period)

f₁, f₂, ... f_n Adjustment factors for distributions, where:

$$f = \frac{\text{NAV}_{\text{ex}} + \text{gross distribution}}{\text{NAV}_{\text{ex}}}$$

NAV_{ex} Net asset value per unit ex dividend

Gross distribution Gross amount of income and capital gains distributed per unit to investors

Note 14 - Sustainable Finance Disclosure Regulation (unaudited)

Information on environmental and/or social characteristics and/or sustainable investments is available in the relevant annexes under the Sustainable Finance Disclosure Regulation (unaudited) section.

Shareholder's Information

The following documents may be obtained free of charge and as hard copy at the registered office of the Company, the Management Company, or the Representatives and Paying Agents during their respective business days:

- the Articles of the Company;
- the Prospectus of the Company;
- the KIID/KID;
- the Application Form;
- the periodical financial reports;
- the marketing documents made available from time to time.

An up-to-date version of the KIIDs/KIDs will be made available on nordea.lu, and, depending on the local language(s) of the countries where the Company, a Sub-fund or a Share Class are registered for public offering, on the local Nordea websites ending with the international country codes of such relevant countries, as available.

The following documents may be consulted at the registered office of the Company or the Management Company during their respective business days:

- the Management Company Agreement between the Company and Nordea Investment Funds S.A.;
- the Depositary and Custodian Agreement between the Company, the Management Company and J.P. Morgan SE.

Notices for all general meetings of the Shareholders are mailed to holders of registered shares of the Company.

Subscriptions can only be received on the basis of the current Prospectus accompanied by the latest Annual Report as well as by the latest Semi-Annual Report if published after the latest Annual Report.

Risk Transparency disclosures (unaudited)

A) General

The Management Company uses a risk management process that allows monitoring the risk of the portfolio positions and their share of the overall risk profile of the portfolios on the Sub-funds at any time.

In accordance with the Law of 17 December 2010 and the applicable regulatory requirements of the Commission de Surveillance du Secteur Financier ("CSSF") the Management Company reports to the CSSF on a regular basis on the risk management process. The Management Company assures, on the basis of appropriate and reasonable methods, that the overall risk, associated with derivatives, does not exceed the net asset value of the portfolio. The Management Company uses the following methods:

- **The Commitment approach:** the positions on derivative financial instruments are converted into equivalent positions in the underlying assets, after consideration of all netting and coverage effects.
- **The Value-at-Risk (VaR) approach:** The VaR is a mathematical-statistical concept and is used as a standard measure of risk in the financial sector. The VaR represents the potential loss of a portfolio over a given period (so-called holding period) for a certain probability (so-called confidence level). The VaR is measured at the whole Sub-fund level, on a holding period not exceeding one month (20 business days) and a confidence level not below 95%.
 - **Relative VaR approach:** The relative VaR concept determines the VaR based on a reference portfolio. The relative VaR cannot exceed the VaR of a reference portfolio by more than 100%, i.e. two times the reference VaR (200%). The reference portfolio is a matching portfolio in comparison to the Sub-fund's investment policy.
 - **Absolute VaR approach:** In the absolute VaR approach the VaR (min. 95% confidence level, max. 20-day holding period) of the Sub-fund cannot exceed 20% of the Sub-fund net assets (99% confidence level, 20-day holding period). The maximum limit of 20% is adjusted accordingly, when different holding periods or confidence levels are applied. Information of the applicable maximum limit is provided.

VaR add ons:

For Sub-funds measuring and monitoring the global risk on derivatives via VaR approach, the Management Company also determines the sum of the nominal values or equivalent values of all the relevant derivatives and estimates in this regard a degree of the expected average value (leverage). This level of leverage can, depending on the respective market conditions, derive from the actual value at the reporting date. Furthermore, the published expected level of leverage is explicitly not understood as an investment limit.

Risk Transparency disclosures (unaudited) (continued)

The Board of Directors decides on the implementation of the adequate methodology to calculate the global exposure for each of the Sub-funds within Nordea 1, SICAV. This methodology may vary from one Sub-fund to another. A majority of Sub-funds within Nordea 1, SICAV apply Commitment approach for measuring the global exposure. Sub-funds which apply VaR approach are listed in the table below, indicating the calculation concept chosen:

Sub-fund	Methodology
Nordea 1 - Alpha 7 MA Fund	Absolute VaR
Nordea 1 - Alpha 10 MA Fund	Absolute VaR
Nordea 1 - Alpha 15 MA Fund	Absolute VaR
Nordea 1 - Balanced Income Fund	Absolute VaR
Nordea 1 - Conservative Fixed Income Fund	Absolute VaR
Nordea 1 - Emerging Markets Debt Total Return Fund	Absolute VaR
Nordea 1 - Emerging Stars Bond Fund (Note 1b)	Relative VaR
Nordea 1 - Emerging Stars Local Bond Fund	Relative VaR
Nordea 1 - European Covered Bond Opportunities Fund	Absolute VaR
Nordea 1 - European Financial Debt Fund	Absolute VaR
Nordea 1 - Flexible Credit Fund	Absolute VaR
Nordea 1 - Flexible Fixed Income Fund	Absolute VaR
Nordea 1 - Flexible Fixed Income Plus Fund	Absolute VaR
Nordea 1 - GBP Diversified Return Fund	Absolute VaR
Nordea 1 - Global Equity Market Neutral Fund	Absolute VaR
Nordea 1 - Norwegian Bond Fund	Relative VaR
Nordea 1 - Stable Return Fund	Absolute VaR

B) Global risk measurement methods

Ad 1) Absolute VaR approach

In the period from 01/01/2022 to 31/12/2022 (the "Period"), the absolute VaR has been used for monitoring and measuring the global risk associated with the derivatives used by the Sub-funds. The following table indicates:

- (i) The minimum level, the maximum level and the average level of daily VaR observed during the Period.
- (ii) The VaR regulatory limit for each of these Sub-funds.

Sub-fund	Minimum	Maximum	Average	Regulatory limit
Nordea 1 - Alpha 7 MA Fund	3.3%	6.8%	4.8%	20%
Nordea 1 - Alpha 10 MA Fund	4.8%	9.8%	7.0%	20%
Nordea 1 - Alpha 15 MA Fund	7.0%	15.7%	10.5%	20%
Nordea 1 - Balanced Income Fund	2.5%	8.6%	5.5%	20%
Nordea 1 - Conservative Fixed Income Fund	0.7%	2.1%	1.5%	20%
Nordea 1 - Emerging Markets Debt Total Return Fund	4.2%	10.9%	6.7%	20%
Nordea 1 - European Covered Bond Opportunities Fund	1.0%	7.5%	2.6%	20%
Nordea 1 - European Financial Debt Fund	1.2%	10.8%	5.0%	20%
Nordea 1 - Flexible Credit Fund	1.3%	9.6%	4.5%	20%
Nordea 1 - Flexible Fixed Income Fund	1.6%	6.0%	3.8%	20%
Nordea 1 - Flexible Fixed Income Plus Fund	3.3%	11.9%	7.5%	20%
Nordea 1 - GBP Diversified Return Fund	4.2%	7.2%	5.6%	20%
Nordea 1 - Global Equity Market Neutral Fund	2.1%	6.4%	3.8%	20%
Nordea 1 - Stable Return Fund	4.3%	7.3%	5.7%	20%

Risk Transparency disclosures (unaudited) (continued)

The sum of the nominal values or equivalent values of all relevant derivatives (leverage) in the period from 01/01/2022 to 31/12/2022 lead to the following average level of leverage for 2022:

Sub-fund	Minimum (in % of NAV)*	Maximum (in % of NAV)*	Average (in % of NAV)*
Nordea 1 - Alpha 7 MA Fund	295%	454%	376%
Nordea 1 - Alpha 10 MA Fund	434%	687%	551%
Nordea 1 - Alpha 15 MA Fund	659%	1057%	831%
Nordea 1 - Balanced Income Fund	312%	584%	423%
Nordea 1 - Conservative Fixed Income Fund	141%	215%	171%
Nordea 1 - Emerging Markets Debt Total Return Fund	87%	354%	187%
Nordea 1 - European Covered Bond Opportunities Fund	493%	769%	636%
Nordea 1 - European Financial Debt Fund	96%	148%	123%
Nordea 1 - Flexible Credit Fund	71%	124%	96%
Nordea 1 - Flexible Fixed Income Fund	244%	439%	304%
Nordea 1 - Flexible Fixed Income Plus Fund	409%	749%	527%
Nordea 1 - GBP Diversified Return Fund	293%	448%	351%
Nordea 1 - Global Equity Market Neutral Fund	133%	193%	165%
Nordea 1 - Stable Return Fund	255%	403%	315%

* Calculated at least with bi-weekly data.

Ad 2) Relative VaR approach

In the period from 01/01/2022 to 31/12/2022 (the "Period"), the relative VaR has been used for monitoring and measuring the global risk associated with the derivatives used by the Sub-funds. The following table indicates:

- (i) The corresponding reference portfolio of each of these Sub-funds.
- (ii) The minimum level, the maximum level and the average level of daily VaR observed during the Period.
- (iii) The VaR regulatory limit for each of these Sub-funds.

Sub-fund	Reference portfolio	Minimum	Maximum	Average	Regulatory limit
Nordea 1 - Emerging Stars Bond Fund (Note 1b)	JP Morgan EM Bond Index Global Diversified	84%	115%	99%	200%
Nordea 1 - Emerging Stars Local Bond Fund	JP Morgan GBI-EM Global Diversified	53%	115%	101%	200%
Nordea 1 - Norwegian Bond Fund	Bloomberg Series-E Norway Govt All > 1 Yr Bond Index	83%	108%	95%	200%

The sum of the nominal values or equivalent values of all relevant derivatives (leverage) in the period from 01/01/2022 to 31/12/2022 lead to the following observed levels of leverage for 2022:

Sub-fund	Minimum (in % of NAV)*	Maximum (in % of NAV)*	Average (in % of NAV)*
Nordea 1 - Emerging Stars Bond Fund (Note 1b)	23%	118%	47%
Nordea 1 - Emerging Stars Local Bond Fund	25%	204%	71%
Nordea 1 - Norwegian Bond Fund	66%	99%	85%

* Calculated at least with bi-weekly data.

Ad 3) Commitment Approach

In relation with the remaining Sub-funds that are not reported in Ad 1) and Ad 2) above, the global risk on derivatives has been determined according to the commitment approach during the reporting period from 01/01/2022 to 31/12/2022.

Remuneration disclosures (unaudited)

A) General

The Management Company has implemented a Remuneration Policy, based on that of Nordea Group, that is consistent with, and promotes, sound and effective risk management and does not encourage risk taking that is inconsistent with the risk profile of the funds. The Management Company has committed to ensuring that all individuals subject to the Policy — which includes the Management Company's directors, managers and employees — will comply with the Policy.

The Remuneration Policy integrates governance, a pay structure that is balanced between fixed and variable components, and risk and long-term performance alignment rules. These alignment rules are designed to be consistent with the interests of the Management Company, the fund and the shareholders, with respect to such considerations as business strategy, objectives, values and interests, and include measures to avoid conflicts of interest. The Management Company ensures that the calculation of any variable remuneration is based on the applicable multi-year performance of the relevant fund and that the actual payment of such remuneration is spread over the same period. Employees in control functions do not receive variable remuneration.

Performance is assessed both, on the level of Nordea Group and at Management Company level. Individual staff assessments are based on a weighting of financial and non-financial targets linked to the specific job scope and role. As such, the principle of individual performance assessment is based on an assessment of objectives reached as well as an appreciation of the employee's long-term value creation. Furthermore, the performance reflects an assessment of business and interpersonal skills and is linked to the achievement of the individual. The criteria applied to establish fixed remuneration are job complexity, level of responsibility, professional experience and local market conditions.

The Policy is formulated by a remuneration committee and approved by the Board of Directors of the Management Company. The Policy follows a defined process establishing the principles, the approval, communication, implementation, review and update of the Policy which involves the Board of Directors, as well as Senior Management, Human Resources, Internal Audit and other control functions.

B) Methodology

Considering the functional setup of the Management Company in the context of its role as UCITs and AIFs management company, the below information represents a proportion of the total staff remuneration within the Management Company as attributable to all the funds under management, taking into account non-UCITS and UCITS alike, in relation to the total net assets of the Company, and including delegates of entities to which the Management Company has delegated portfolio management functions (the "Delegates"). Under the methodology the average number of staff considered amounted to 353 including Senior Management.

Remuneration reporting as at 31 December 2022:

Fund	Total Remuneration (EUR) including any Delegates		Senior Management (EUR)
	Fixed	Variable	
Nordea 1, SICAV	29,271,087	13,141,689	994,202

Disclosures under the Securities Financing Transaction Regulation (unaudited)

Based on the analysis conducted by the Management Company, the scope of these disclosures covers the transactions in total return swaps, equity swaps and repurchase transactions.

Global data

The table below shows the amount of assets engaged in equity swaps, total return swaps and repurchase transactions, expressed as an absolute amount (in the base currency of each Sub-fund) and as a proportion of the Total Net Assets:

Fund name	Nordea 1 - Alpha 10 MA Fund (in EUR)	Nordea 1 - Alpha 15 MA Fund (in EUR)	Nordea 1 - European Covered Bond Opportunities Fund (in EUR)	Nordea 1 - Global Equity Market Neutral Fund (in EUR)
Market value of equity swaps (*)	2,139,711,492.41	4,431,764,256.94	-	70,308,972.20
% of total net assets	47.18%	99.86%	-	117.07%
Market value of total return swaps (*)	1,528,516,933.57	2,516,712,362.92	-	-
% of total net assets	33.71%	56.71%	-	-
Market value of repurchase transactions (**)	-	-	1,002,202,350.12	-
% of total net assets	-	-	89.83%	-
Market value of securities financing transactions	3,668,228,425.98	6,948,476,619.86	1,002,202,350.12	70,308,972.20
% of total net assets	80.89%	156.57%	89.83%	117.07%

(*) Sum of the absolute market values. The market value is the "Commitment in Sub-fund base currency" as disclosed in the Statement of Derivative instruments.

(**) The market value represents the "Commitment in Sub-fund base currency" as disclosed in the Statement of Derivative instruments and the value of caption "Payable under repurchase agreements (Note 2)" as disclosed in the Statement of Net Assets.

Concentration data

Barclays Bank Ireland PLC and BofA Securities Europe SA. are the two counterparties for equity swaps and total return swaps. Cash and non-cash collateral have been exchanged with these two counterparties. The securities received as collateral are investment grade bonds issued or guaranteed by a member state of the OECD.

The table below shows the collateral issuers for non-cash collateral received, sorted as per the securities collateral values:

Fund name	Fund currency	Issuer name	Total
Nordea 1 - Alpha 10 MA Fund	EUR	French Republic	98,839,216.66
		United States of America	14,710,151.57
		Republic of Finland	2,183,978.66
		Kingdom of the Netherlands	24,532.14
			115,757,879.02
Nordea 1 - Alpha 15 MA Fund	EUR	French Republic	184,438,687.88
		Japan	46,339,487.58
		Kingdom of Belgium	14,612,777.83
		Kingdom of the Netherlands	8,483,485.48
		United States of America	4,911,888.08
		Federal Republic of Germany	1,361,167.90
	260,147,494.75		

Repurchase transactions are dealt with four counterparties:

- BofA Securities Europe SA;
- Deutsche Bank AG;
- JP Morgan SE;
- Nordea Bank Abp.

Aggregate transaction data for each type of SFT and total return swaps

Cash collateral has been paid for equity swaps and total return swaps.

Cash received for repurchase transactions in exchange of the sale of the securities is managed as a whole, without being isolated from other cash.

All trades are settled and cleared bilaterally.

Disclosures under the Securities Financing Transaction Regulation (unaudited) (continued)

(*) For "Equity swaps" and "total return swaps", the market value is the "Unrealised appreciation/(depreciation) in Sub-fund base currency" as shown in the corresponding table in the Statement of Derivative Instruments.

For "Repurchase transactions", the market value represents the "Commitment in Sub-fund base currency" as disclosed in the Statement of Derivative instruments and the value of caption "Payable under repurchase agreements (Note 2)" as disclosed in the Statement of Net Assets.

(**) Collateral is netted at counterparty level thus it may relate to many instruments types.

The table below shows the type and quality of non-cash collateral received for equity swaps and total return swaps:

Fund name	Fund Currency	Asset Type	Total amount	Credit rating				
				Investment Grade (Moody's long term rating)				
				Aaa	Aa1	Aa2	Aa3	A1
Nordea 1 - Alpha 10 MA Fund	EUR	Government bonds	115,757,879.02	14,734,683.71	2,183,978.66	98,839,216.66		
Nordea 1 - Alpha 15 MA Fund	EUR	Government bonds	260,147,494.75	14,756,541.46		184,438,687.88	14,612,777.83	46,339,487.58

Data on reuse of collateral

Cash collateral on equity swaps or total return swaps is either placed on deposit or invested in high-quality government bonds, repurchase transactions or short term money market funds that calculate a daily net asset value and are rated AAA or equivalent.

Non-cash collateral is not sold, reinvested or pledged.

Safekeeping of collateral received by the collective investment undertaking as part of SFTs and total return swaps

All cash collateral received is held on pooled accounts but segregated from J.P. Morgan's assets.

Safekeeping of collateral granted by the collective investment undertaking as part of SFTs and total return swaps

The collateral granted by the Sub-funds is kept on pooled accounts with counterparty Barclays Bank Ireland PLC and on segregated accounts with counterparty BofA Securities Europe SA.

Data on return and cost for each type of SFTs and total return swaps

All the return of the equity swaps and total return swaps is attributed to the Sub-funds. The transaction costs are not separately identifiable.

Disclosures under the Sustainable Finance Disclosure Regulation (unaudited)

Commission Delegated Regulation (EU) 2023/363 of 31 October 2022 amended and corrected the regulatory technical standards laid down in Delegated Regulation (EU) 2022/1288 as regards the content and presentation of information in relation to disclosures in pre-contractual documents and periodic reports for financial products investing in environmentally sustainable economic activities (amended SFDR RTS). The amended SFDR RTS introduce precontractual and periodic transparency requirements in relation to Taxonomy aligned fossil gas and nuclear energy related activities for financial products disclosing under Articles 8 and 9 of SFDR.

There is no data available for the reporting period from 1 January 2022 to 31 December 2022 to confirm that the financial products invested in any fossil fuel gas and/or nuclear energy related activities that comply with the EU Taxonomy.

Article 6 Sub-funds

The investments underlying these financial products do not take into account the EU criteria for environmentally sustainable economic activities.

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Nordea 1 - Asia ex Japan Equity Fund

Legal entity identifier: 549300H93PG75WKUHX51

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?	
<input checked="" type="radio"/> <input checked="" type="radio"/> <input type="checkbox"/> Yes	<input checked="" type="radio"/> <input type="radio"/> <input checked="" type="checkbox"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: _____% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> It made sustainable investments with a social objective: _____%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 56 % of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective <input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The E/S characteristics of this fund included:

Sustainable investments Although the fund has not committed to make any sustainable investments, the fund partly invested in sustainable investments, which means companies and issuers involved in activities that contribute to an environmental or social objective as outlined in the 17 UN Sustainable Development Goals (SDGs) and/or the EU Taxonomy, while not significantly harming any other environmental or social objectives.

Sector- and value-based exclusions Exclusion filters were applied to the portfolio construction process to restrict investments in companies and issuers with material exposure to certain activities deemed to be detrimental to the environment or the society at large, including tobacco companies and fossil fuel companies.

Nordea Asset Management's Paris-Aligned Fossil Fuel policy whereby the fund did not invest in companies that have significant exposure to fossil fuels unless they have a credible transition strategy.

The fund used a benchmark that is not aligned with the fund's E/S characteristics.

● How did the sustainability indicators perform?

Sustainability Indicator	Metric	Metric Value	Eligibility	Coverage
Carbon Footprint	Carbon footprint	21 tCO ₂ e / m€ invested	97.48 %	96.36 %
Violations of United Nations Global Compact	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises	0.00 % involved in violations	97.48 %	96.72 %

Eligibility: The proportion of the assets in the financial product (relative to NAV), which are in scope for the indicator.

Coverage: The proportion of the assets in the financial product (relative to NAV), where data is available to present the indicator.

● **...and compared to previous periods?**

Sustainability Indicator	Metric	Reference Period	Metric Value	Eligibility	Coverage
Carbon Footprint	Carbon footprint	2022	21 tCO ₂ e / m€ invested	97.48 %	96.36 %
Violations of United Nations Global Compact	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises	2022	0.00 % involved in violations	97.48 %	96.72 %

Eligibility: The proportion of the assets in the financial product (relative to NAV), which are in scope for the indicator.

Coverage: The proportion of the assets in the financial product (relative to NAV), where data is available to present the indicator.

Since no reports covering previous periods are available, this section provides information for the current reporting period only.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The objectives of the sustainable investments that the fund partially made, was to contribute to one or several of the UN SDGs or alternatively be involved in Taxonomy-aligned activities. Sustainable investments contributed to the objectives through the fund's investments in companies that support the UN SDGs or Taxonomy-aligned activities by passing a minimum threshold for revenue alignment with UN SDGs or the EU Taxonomy.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The sustainable investments were screened to ensure that they did not significantly harm any other social or environmental objectives (DNSH test) as defined by the EU Taxonomy or any SDGs as adopted by the UN.

- **How were the indicators for adverse impacts on sustainability factors taken into account?**

Nordea Asset Management (NAM) has developed a proprietary quantitative methodology that assessed the environmental and social impact of NAM's investment universe (direct investments mainly) using multiple principal adverse impact ("PAI") indicators from Table 1 and/or Table 2 and/or Table 3 of Annex 1 of the SFDR RTS (the "PAI tool"). The methodology utilised a diverse range of data sources in order to ensure that investee companies' performance was appropriately analysed. PAI indicators were assessed in NAM's PAI tool and the results were a material part of the DNSH test.

- **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

Alignment of the Sustainable Investments with the OECD guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, was confirmed as part of the process to identify sustainable investments using Nordea Asset Management's PAI tool.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The specific PAI indicators that were taken into consideration for this fund were:

CLIMATE AND OTHER ENVIRONMENT-RELATED INDICATORS

Adverse Sustainability Indicator	Metric	Metric Value	Eligibility	Coverage	
Greenhouse gas "GHG" emissions	Scope 1 GHG emissions	425 tCO ₂ e	97.48 %	96.36 %

Chroma ATE	Industrial	1.69 %	Taiwan, Province of China
Computershare	Technology	1.67 %	Australia

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

● What was the asset allocation?

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

The product contains investments with both an environmental and a social objective. A single investment can both contribute to an environmental and a social objective resulting in a total allocation amounting to more than 100 per cent. There is no prioritization of environmental and social objectives, and the strategy does not target any specific allocation or minimum proportion for either of these categories. The investment process accommodates the combination of environmental and social objectives by allowing the investment manager the flexibility to allocate between these based on availability and attractiveness of investment opportunities.

● **In which economic sectors were the investments made?**

Sector	Assets
Technology	21.81 %
Financial	18.73 %
Industrial	15.47 %
Consumer, Non-cyclical	14.68 %
Communications	12.40 %
Consumer, Cyclical	10.36 %
Basic Materials	3.66 %
Cash	2.68 %
Energy	0.20 %
Sum	100.00 %

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 50 %.

What was the share of socially sustainable investments?

The share of socially sustainable investments was 49 %.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

Cash may have been held as ancillary liquidity or for risk balancing purposes. The fund may have used derivatives and other techniques for the purposes described in the ‘Fund Descriptions’ in the prospectus. This category may also have included securities for which relevant data is not available.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this fund have been monitored and documented on an ongoing basis.

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Nordea 1 - Asian Stars Equity Fund

Legal entity identifier: 5493002RWJY1XFZG8U38

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

Yes

No

It made **sustainable investments with an environmental objective:** ____%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** ____%

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 62 % of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The E/S characteristics of this fund included:

Minimum proportion of sustainable investments The fund partly invested in sustainable investments, which means companies and issuers involved in activities that contribute to an environmental or social objective as outlined in the 17 UN Sustainable Development Goals (SDGs) and/or the EU Taxonomy, while not significantly harming any other environmental or social objectives.

ESG scoring The fund invested in securities issued by entities whose ESG profiles have been scored by Nordea Asset Management (NAM), or by an external data provider and analysed by NAM, to ensure that only securities issued by entities that met the minimum required ESG score for the fund were eligible for inclusion.

Sector- and value-based exclusions Exclusion filters were applied to the portfolio construction process to restrict investments in companies and issuers with material exposure to certain activities deemed to be detrimental to the environment or the society at large, including tobacco companies and fossil fuel companies.

Nordea Asset Management's Paris-Aligned Fossil Fuel policy whereby the fund did not invest in companies that have significant exposure to fossil fuels unless they have a credible transition strategy.

The fund used a benchmark that is not aligned with the fund's E/S characteristics.

● How did the sustainability indicators perform?

Sustainability Indicator	Metric	Metric Value	Eligibility	Coverage
Carbon Footprint	Carbon footprint	17 tCO ₂ e / m€ invested	96.91 %	96.71 %
Violations of United Nations Global Compact	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises	0.00 % involved in violations	96.91 %	96.78 %

Eligibility: The proportion of the assets in the financial product (relative to NAV), which are in scope for the indicator.

Coverage: The proportion of the assets in the financial product (relative to NAV), where data is available to present the indicator.

● **...and compared to previous periods?**

Sustainability Indicator	Metric	Reference Period	Metric Value	Eligibility	Coverage
Carbon Footprint	Carbon footprint	2022	17 tCO2e / m€ invested	96.91 %	96.71 %
Violations of United Nations Global Compact	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises	2022	0.00 % involved in violations	96.91 %	96.78 %

Eligibility: The proportion of the assets in the financial product (relative to NAV), which are in scope for the indicator.

Coverage: The proportion of the assets in the financial product (relative to NAV), where data is available to present the indicator.

Since no reports covering previous periods are available, this section provides information for the current reporting period only.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The objectives of the sustainable investments that the fund partially made, was to contribute to one or several of the UN SDGs or alternatively be involved in Taxonomy aligned activities. Sustainable investments contributed to the objectives through the fund's investments in companies that supported the UN SDGs or Taxonomy aligned activities by passing a minimum threshold for revenue alignment with UN SDGs or the EU Taxonomy.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The sustainable investments were screened to ensure that they did not significantly harm any other social or environmental objectives (DNSH test) as defined by the EU Taxonomy or any SDGs as adopted by the UN.

- **How were the indicators for adverse impacts on sustainability factors taken into account?**

Nordea Asset Management (NAM) has developed a proprietary quantitative methodology that assessed the environmental and social impact of NAM's investment universe (direct investments mainly) using multiple principal adverse impact ("PAI") indicators from Table 1 and/or Table 2 and/or Table 3 of Annex 1 of the SFDR RTS (the "PAI tool"). The methodology utilised a diverse range of data sources in order to ensure that investee companies' performance was appropriately analysed. PAI indicators were assessed in NAM's PAI tool and the results were a material part of the DNSH test.

- **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

Alignment of the Sustainable Investments with the OECD guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, was confirmed as part of the process to identify sustainable investments using Nordea Asset Management's PAI tool.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The specific PAI indicators that were taken into consideration for this fund were:

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

● What was the asset allocation?

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

The product contains investments with both an environmental and a social objective. A single investment can both contribute to an environmental and a social objective resulting in a total allocation amounting to more than 100 per cent. There is no prioritization of environmental and social objectives, and the strategy does not target any specific allocation or minimum proportion for either of these categories. The investment process accommodates the combination of environmental and social objectives by allowing the investment manager the flexibility to allocate between these based on availability and attractiveness of investment opportunities.

● **In which economic sectors were the investments made?**

Sector	Assets
Communications	25.38 %

PAI indicators were assessed in NAM's PAI tool and the results were a material part of the DNSH test.

- **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

Alignment of the Sustainable Investments with the OECD guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, was confirmed as part of the process to identify sustainable investments using Nordea Asset Management's PAI tool.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The specific PAI indicators that were taken into consideration for this fund were:

CLIMATE AND OTHER ENVIRONMENT-RELATED INDICATORS

Adverse Sustainability Indicator	Metric	Metric Value	Eligibility	Coverage

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

The product contains investments with both an environmental and a social objective. A single investment can both contribute to an environmental and a social objective resulting in a total allocation amounting to more than 100 per cent. There is no prioritization of environmental and social objectives, and the strategy does not target any specific allocation or minimum proportion for either of these categories. The investment process accommodates the combination of environmental and social objectives by allowing the investment manager the flexibility to allocate between these based on availability and attractiveness of investment opportunities.

● **In which economic sectors were the investments made?**

Sector	Assets
Communications	33.92 %
Consumer, Cyclical	15.84 %
Financial	15.16 %
Industrial	11.41 %
Consumer, Non-cyclical	11.06 %
Technology	4.74 %
Basic Materials	2.64 %
Utilities	1.92 %
Cash	1.70 %
Energy	1.59 %
Sum	100.00 %

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 38 %.

What was the share of socially sustainable investments?

The share of socially sustainable investments was 42 %.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

Cash may have been held as ancillary liquidity or for risk balancing purposes. The fund may have used derivatives and other techniques for the purposes described in the ‘Fund Descriptions’ in the prospectus. This category may also have included securities for which relevant data is not available.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this fund have been monitored and documented on an ongoing basis.

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Nordea 1 - Danish Covered Bond Fund

Legal entity identifier: 5493006ID4LFX21UEW81

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

Yes

No

It made **sustainable investments with an environmental objective:** ____%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** ____%

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 9 % of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The E/S characteristics of this fund included:

Sustainable investments Although the fund has not committed to make any sustainable investments, the fund partly invested in sustainable investments, which means companies and issuers involved in activities that contribute to an environmental or social objective as outlined in the 17 UN Sustainable Development Goals (SDGs) and/or the EU Taxonomy, while not significantly harming any other environmental or social objectives.

Sector- and value-based exclusions Exclusion filters were applied to the portfolio construction process to restrict investments in companies and issuers with material exposure to certain activities deemed to be detrimental to the environment or the society at large, including tobacco companies and fossil fuel companies.

Nordea Asset Management's Paris-Aligned Fossil Fuel policy whereby the fund did not invest in companies that have significant exposure to fossil fuels unless they have a credible transition strategy.

The fund used a benchmark that is not aligned with the fund's E/S characteristics.

● How did the sustainability indicators perform?

Sustainability Indicator	Metric	Metric Value	Eligibility	Coverage
Carbon Footprint	Carbon footprint	0 tCO ₂ e / m€ invested	90.20 %	87.60 %
Social Violations	Number of investee countries subject to social violations (absolute number and relative number divided by all investee countries), as referred to in international treaties and conventions, United Nations principles and, where applicable, national law	0 investee countries subject to violations	0.54 %	0.54 %

Coverage: The proportion of the assets in the financial product (relative to NAV), where data is available to present the indicator.

Since no reports covering previous periods are available, this section provides information for the current reporting period only.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The objectives of the sustainable investments that the fund partially made, was to contribute to one or several of the UN SDGs or alternatively be involved in Taxonomy-aligned activities. Sustainable investments contributed to the objectives through the fund's investments in companies that support the UN SDGs or Taxonomy-aligned activities by passing a minimum threshold for revenue alignment with UN SDGs or the EU Taxonomy.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The sustainable investments were screened to ensure that they did not significantly harm any other social or environmental objectives (DNSH test) as defined by the EU Taxonomy or any SDGs as adopted by the UN.

- **How were the indicators for adverse impacts on sustainability factors taken into account?**

Nordea Asset Management (NAM) has developed a proprietary quantitative methodology that assessed the environmental and social impact of NAM's investment universe (direct investments mainly) using multiple principal adverse impact ("PAI") indicators from Table 1 and/or Table 2 and/or Table 3 of Annex 1 of the SFDR RTS (the "PAI tool"). The methodology utilised a diverse range of data sources in order to ensure that investee companies' performance was appropriately analysed. PAI indicators were assessed in NAM's PAI tool and the results were a material part of the DNSH test.

- **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

Alignment of the Sustainable Investments with the OECD guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, was confirmed as part of the process to identify sustainable investments using Nordea Asset Management's PAI tool.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The specific PAI indicators that were taken into consideration for this fund were:

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

Yes

No

It made **sustainable investments with an environmental objective:** _____%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** _____%

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 61 % of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators

measure how the environmental or social characteristics promoted by the financial product are attained.

The E/S characteristics of this fund included:

Minimum proportion of sustainable investments The fund partly invested in sustainable investments, which means companies and issuers involved in activities that contribute to an environmental or social objective as outlined in the 17 UN Sustainable Development Goals (SDGs) and/or the EU Taxonomy, while not significantly harming any other environmental or social objectives.

ESG scoring The fund invested in securities issued by entities whose ESG profiles have been scored by Nordea Asset Management (NAM), or by an external data provider and analysed by NAM, to ensure that only securities issued by entities that met the minimum required ESG score for the fund were eligible for inclusion.

Sector- and value-based exclusions Exclusion filters were applied to the portfolio construction process to restrict investments in companies and issuers with material exposure to certain activities deemed to be detrimental to the environment or the society at large, including tobacco companies and fossil fuel companies.

Nordea Asset Management's Paris-Aligned Fossil Fuel policy whereby the fund did not invest in companies that have significant exposure to fossil fuels unless they have a credible transition strategy.

The fund used a benchmark that is not aligned with the fund's E/S characteristics.

● **How did the sustainability indicators perform?**

Eligibility: The proportion of the assets in the financial product (relative to NAV), which are in scope for the indicator.

Coverage: The proportion of the assets in the financial product (relative to NAV), where data is available to present the indicator.

Since no reports covering previous periods are available, this section provides information for the current reporting period only.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The objectives of the sustainable investments that the fund partially made, was to contribute to one or several of the UN SDGs or alternatively be involved in Taxonomy-aligned activities. Sustainable investments contributed to the objectives through the fund's investments in companies that support the UN SDGs or Taxonomy-aligned activities by passing a minimum threshold for revenue alignment with UN SDGs or the EU Taxonomy.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The sustainable investments were screened to ensure that they did not significantly harm any other social or environmental objectives (DNSH test) as defined by the EU Taxonomy or any SDGs as adopted by the UN.

- **How were the indicators for adverse impacts on sustainability factors taken into account?**

Nordea Asset Management (NAM) has developed a proprietary quantitative methodology that assessed the environmental and social impact of NAM's investment universe (direct investments mainly) using multiple principal adverse impact ("PAI") indicators from Table 1 and/or Table 2 and/or Table 3 of Annex 1 of the SFDR RTS (the "PAI tool"). The methodology utilised a diverse range of data sources in order to ensure that investee companies' performance was appropriately analysed. PAI indicators were assessed in NAM's PAI tool and the results were a material part of the DNSH test.

- **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

Alignment of the Sustainable Investments with the OECD guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, was confirmed as part of the process to identify sustainable investments using Nordea Asset Management's PAI tool.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The specific PAI indicators that were taken into consideration for this fund were:

CLIMATE AND OTHER ENVIRONMENT-RELATED INDICATORS

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

● What was the asset allocation?

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

The product contains investments with both an environmental and a social objective. A single investment can both contribute to an environmental and a social objective resulting in a total allocation amounting to more than 100 per cent. There is no prioritization of environmental and social objectives, and the strategy does not target any specific allocation or minimum proportion for either of these categories. The investment process accommodates the combination of environmental and social objectives by allowing the investment manager the flexibility to allocate between these based on availability and attractiveness of investment opportunities.

● **In which economic sectors were the investments made?**

Sector	Assets
Government bonds	73.23 %
Cash	6.97 %
Financial	6.87 %
Communications	4.50 %
Industrial	3.14 %

Consumer, Non-cyclical	1.33 %
Energy	1.14 %
Technology	0.45 %
FX Forwards	0.45 %
Consumer, Cyclical	0.16 %
Derivatives	-2.46 %
Sum	100.00 %

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 53 %.

What was the share of socially sustainable investments?

The share of socially sustainable investments was 43 %.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

Cash may have been held as ancillary liquidity or for risk balancing purposes. The fund may have used derivatives and other techniques for the purposes described in the ‘Fund Descriptions’ in the prospectus. This category may also have included securities for which relevant data is not available.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this fund have been monitored and documented on an ongoing basis.

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Nordea 1 - Emerging Stars Bond Fund

Legal entity identifier: 549300F6FENFDTOIKP77

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

Yes

No

It made **sustainable investments with an environmental objective:** _____%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** _____%

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 60 % of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators

measure how the environmental or social characteristics promoted by the financial product are attained.

The E/S characteristics of this fund included:

Minimum proportion of sustainable investments The fund partly invested in sustainable investments, which means companies and issuers involved in activities that contribute to an environmental or social objective as outlined in the 17 UN Sustainable Development Goals (SDGs) and/or the EU Taxonomy, while not significantly harming any other environmental or social objectives.

ESG scoring The fund invested in securities issued by entities whose ESG profiles have been scored by Nordea Asset Management (NAM), or by an external data provider and analysed by NAM, to ensure that only securities issued by entities that met the minimum required ESG score for the fund were eligible for inclusion.

Sector- and value-based exclusions Exclusion filters were applied to the portfolio construction process to restrict investments in companies and issuers with material exposure to certain activities deemed to be detrimental to the environment or the society at large, including tobacco companies and fossil fuel companies.

Nordea Asset Management's Paris-Aligned Fossil Fuel policy whereby the fund did not invest in companies that have significant exposure to fossil fuels unless they have a credible transition strategy.

The fund used a benchmark that is not aligned with the fund's E/S characteristics.

● **How did the sustainability indicators perform?**

Sustainability Indicator	Metric	Metric Value	Eligibility	Coverage
Carbon Footprint	Carbon footprint	216 tCO ₂ e / m€ invested	26.21 %	22.78 %
Social Violations	Number of investee countries subject to social violations (absolute number and relative number divided by all investee countries), as referred to in international treaties and conventions, United Nations principles and, where applicable, national law	1 investee countries subject to violations	69.95 %	69.95 %
		1.94 % investee countries subject to violations	69.95 %	69.95 %
NAM Sovereign ESG Score	Average numerical score from 1(best) - 10 (worst)	5.57	69.95 %	69.50 %
Violations of United Nations Global Compact	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises	0.00 % involved in violations	26.21 %	20.59 %
Greenhouse Gas Intensity for sovereigns	GHG intensity of investee countries	504.35 tCO ₂ e / m€ of owned GDP	69.95 %	67.88 %

Eligibility: The proportion of the assets in the financial product (relative to NAV), which are in scope for the indicator.

Eligibility: The proportion of the assets in the financial product (relative to NAV), which are in scope for the indicator.

Coverage: The proportion of the assets in the financial product (relative to NAV), where data is available to present the indicator.

Since no reports covering previous periods are available, this section provides information for the current reporting period only.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The objectives of the sustainable investments that the fund partially made, was to contribute to one or several of the UN SDGs or alternatively be involved in Taxonomy-aligned activities. Sustainable investments contributed to the objectives through the fund's investments in companies that support the UN SDGs or Taxonomy-aligned activities by passing a minimum threshold for revenue alignment with UN SDGs or the EU Taxonomy.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The sustainable investments were screened to ensure that they did not significantly harm any other social or environmental objectives (DNSH test) as defined by the EU Taxonomy or any SDGs as adopted by the UN.

- **How were the indicators for adverse impacts on sustainability factors taken into account?**

Nordea Asset Management (NAM) has developed a proprietary quantitative methodology that assessed the environmental and social impact of NAM's investment universe (direct investments mainly) using multiple principal adverse impact ("PAI") indicators from Table 1 and/or Table 2 and/or Table 3 of Annex 1 of the SFDR RTS (the "PAI tool"). The methodology utilised a diverse range of data sources in order to ensure that investee companies' performance was appropriately analysed. PAI indicators were assessed in NAM's PAI tool and the results were a material part of the DNSH test.

- **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

Alignment of the Sustainable Investments with the OECD guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, was confirmed as part of the process to identify sustainable investments using Nordea Asset Management's PAI tool.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The specific PAI indicators that were taken into consideration for this fund were:

CLIMATE AND OTHER ENVIRONMENT-RELATED INDICATORS

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

● What was the asset allocation?

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

The product contains investments with both an environmental and a social objective. A single investment can both contribute to an environmental and a social objective resulting in a total allocation amounting to more than 100 per cent. There is no prioritization of environmental and social objectives, and the strategy does not target any specific allocation or minimum proportion for either of these categories. The investment process accommodates the combination of environmental and social objectives by allowing the investment manager the flexibility to allocate between these based on availability and attractiveness of investment opportunities.

● **In which economic sectors were the investments made?**

Sector	Assets
Government bonds	72.03 %
Financial	7.46 %
Communications	5.44 %
Industrial	3.54 %
Cash	3.08 %
Utilities	2.95 %
Basic Materials	2.03 %
Consumer, Non-cyclical	1.40 %
Energy	1.16 %
Technology	0.54 %
Consumer, Cyclical	0.22 %
Derivatives	0.11 %
FX Forwards	0.04 %
Sum	100.00 %

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 56 %.

What was the share of socially sustainable investments?

The share of socially sustainable investments was 46 %.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

Cash may have been held as ancillary liquidity or for risk balancing purposes. The fund may have used derivatives and other techniques for the purposes described in the ‘Fund Descriptions’ in the prospectus. This category may also have included securities for which relevant data is not available.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this fund have been monitored and documented on an ongoing basis.

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Nordea 1 - Emerging Stars Corporate Bond Fund

Legal entity identifier: 549300NKRMXUIKSLCD46

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?	
<input checked="" type="radio"/> <input checked="" type="radio"/> <input type="checkbox"/> Yes	<input checked="" type="radio"/> <input type="radio"/> <input checked="" type="checkbox"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: _____% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> It made sustainable investments with a social objective: _____%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 75 % of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective <input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators

measure how the environmental or social characteristics promoted by the financial product are attained.

The E/S characteristics of this fund included:

Minimum proportion of sustainable investments The fund partly invested in sustainable investments, which means companies and issuers involved in activities that contribute to an environmental or social objective as outlined in the 17 UN Sustainable Development Goals (SDGs) and/or the EU Taxonomy, while not significantly harming any other environmental or social objectives.

ESG scoring The fund invested in securities issued by entities whose ESG profiles have been scored by Nordea Asset Management (NAM), or by an external data provider and analysed by NAM, to ensure that only securities issued by entities that met the minimum required ESG score for the fund were eligible for inclusion.

Sector- and value-based exclusions Exclusion filters were applied to the portfolio construction process to restrict investments in companies and issuers with material exposure to certain activities deemed to be detrimental to the environment or the society at large, including tobacco companies and fossil fuel companies.

Nordea Asset Management's Paris-Aligned Fossil Fuel policy whereby the fund did not invest in companies that have significant exposure to fossil fuels unless they have a credible transition strategy.

The fund used a benchmark that is not aligned with the fund's E/S characteristics.

● **How did the sustainability indicators perform?**

Sustainability Indicator	Metric	Metric Value	Eligibility	Coverage
Carbon Footprint	Carbon footprint	179 tCO ₂ e / m€ invested	93.11 %	81.57 %
Social Violations	Number of investee countries subject to social violations (absolute number and relative number divided by all investee countries), as referred to in international treaties and conventions, United Nations principles and, where applicable, national law	0 investee countries subject to violations	2.77 %	2.77 %
		0.00 % investee countries subject to violations	2.77 %	2.77 %
NAM Sovereign ESG Score	Average numerical score from 1(best) - 10 (worst)	5.87	2.77 %	2.77 %

Greenhouse Gas Intensity for sovereigns	GHG intensity of investee countries	2022	363.57 tCO ₂ e / m€ of owned GDP	2.77 %	2.77 %

Eligibility: The proportion of the assets in the financial product (relative to NAV), which are in scope for the indicator.

Coverage: The proportion of the assets in the financial product (relative to NAV), where data is available to present the indicator.

Since no reports covering previous periods are available, this section provides information for the current reporting period only.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The objectives of the sustainable investments that the fund partially made, was to contribute to one or several of the UN SDGs or alternatively be involved in Taxonomy-aligned activities. Sustainable investments contributed to the objectives through the fund's investments in companies that support the UN SDGs or Taxonomy-aligned activities by passing a minimum threshold for revenue alignment with UN SDGs or the EU Taxonomy.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The sustainable investments were screened to ensure that they did not significantly harm any other social or environmental objectives (DNSH test) as defined by the EU Taxonomy or any SDGs as adopted by the UN.

- **How were the indicators for adverse impacts on sustainability factors taken into account?**

Nordea Asset Management (NAM) has developed a proprietary quantitative methodology that assessed the environmental and social impact of NAM's investment universe (direct investments mainly) using multiple principal adverse impact ("PAI") indicators from Table 1 and/or Table 2 and/or Table 3 of Annex 1 of the SFDR RTS (the "PAI tool"). The methodology utilised a diverse range of data sources in order to ensure that investee companies' performance was appropriately analysed. PAI indicators were assessed in NAM's PAI tool and the results were a material part of the DNSH test.

- **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

Alignment of the Sustainable Investments with the OECD guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, was confirmed as part of the process to identify sustainable investments using Nordea Asset Management's PAI tool.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The specific PAI indicators that were taken into consideration for this fund were:

CLIMATE AND OTHER ENVIRONMENT-RELATED INDICATORS

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

● What was the asset allocation?

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

The product contains investments with both an environmental and a social objective. A single investment can both contribute to an environmental and a social objective resulting in a total allocation amounting to more than 100 per cent. There is no prioritization of environmental and social objectives, and the strategy does not target any specific allocation or minimum proportion for either of these categories. The investment process accommodates the combination of environmental and social objectives by allowing the investment manager the flexibility to allocate between these based on availability and attractiveness of investment opportunities.

● **In which economic sectors were the investments made?**

Sector	Assets
Financial	35.29 %
Communications	16.07 %
Industrial	10.93 %
Basic Materials	8.93 %
Utilities	7.98 %

Cash	4.10 %
Government bonds	2.77 %
Technology	1.14 %
Consumer, Cyclical	0.67 %
FX Forwards	0.02 %
Sum	100.00 %

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 70 %.

What was the share of socially sustainable investments?

The share of socially sustainable investments was 62 %.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Cash may have been held as ancillary liquidity or for risk balancing purposes. The fund may have used derivatives and other techniques for the purposes described in the 'Fund Descriptions' in the prospectus. This category may also have included securities for which relevant data is not available.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this fund have been monitored and documented on an ongoing basis.

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Nordea 1 - Emerging Stars Equity Fund

Legal entity identifier: 549300UFJRQ77N3UYE48

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Yes
 No

<p><input type="checkbox"/> It made sustainable investments with an environmental objective: _____%</p> <p style="margin-left: 20px;"><input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy</p> <p style="margin-left: 20px;"><input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</p> <p><input type="checkbox"/> It made sustainable investments with a social objective: _____%</p>	<p><input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 66 % of sustainable investments</p> <p style="margin-left: 20px;"><input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy</p> <p style="margin-left: 20px;"><input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</p> <p style="margin-left: 20px;"><input checked="" type="checkbox"/> with a social objective</p> <p><input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments</p>
--	---

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The E/S characteristics of this fund included:

Minimum proportion of sustainable investments The fund partly invested in sustainable investments, which means companies and issuers involved in activities that contribute to an environmental or social objective as outlined in the 17 UN Sustainable Development Goals (SDGs) and/or the EU Taxonomy, while not significantly harming any other environmental or social objectives.

ESG scoring The fund invested in securities issued by entities whose ESG profiles have been scored by Nordea Asset Management (NAM), or by an external data provider and analysed by NAM, to ensure that only securities issued by entities that met the minimum required ESG score for the fund were eligible for inclusion.

Sector- and value-based exclusions Exclusion filters were applied to the portfolio construction process to restrict investments in companies and issuers with material exposure to certain activities deemed to be detrimental to the environment or the society at large, including tobacco companies and fossil fuel companies.

Nordea Asset Management's Paris-Aligned Fossil Fuel policy whereby the fund did not invest in companies that have significant exposure to fossil fuels unless they have a credible transition strategy.

The fund used a benchmark that is not aligned with the fund's E/S characteristics.

● How did the sustainability indicators perform?

Sustainability Indicator	Metric	Metric Value	Eligibility	Coverage
Carbon Footprint	Carbon footprint	15 tCO ₂ e / m€ invested	97.66 %	97.49 %
Violations of United Nations Global Compact	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises	0.00 % involved in violations	97.66 %	97.61 %

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

● What was the asset allocation?

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

The product contains investments with both an environmental and a social objective. A single investment can both contribute to an environmental and a social objective resulting in a total allocation amounting to more than 100 per cent. There is no prioritization of environmental and social objectives, and the strategy does not target any specific allocation or minimum proportion for either of these categories. The investment process accommodates the combination of environmental and social objectives by allowing the investment manager the flexibility to allocate between these based on availability and attractiveness of investment opportunities.

● **In which economic sectors were the investments made?**

Sector	Assets
Communications	24.64 %
Financial	23.98 %
Technology	23.45 %
Consumer, Non-cyclical	8.91 %
Industrial	6.30 %
Consumer, Cyclical	5.91 %
Cash	2.51 %
Energy	2.43 %
Basic Materials	1.87 %
Sum	100.00 %

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 59 %.

What was the share of socially sustainable investments?

The share of socially sustainable investments was 51 %.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

Cash may have been held as ancillary liquidity or for risk balancing purposes. The fund may have used derivatives and other techniques for the purposes described in the ‘Fund Descriptions’ in the prospectus. This category may also have included securities for which relevant data is not available.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this fund have been monitored and documented on an ongoing basis.

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Nordea 1 - Emerging Stars ex China Equity Fund

Legal entity identifier: 54930066X6UUR3V1T114

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

Yes

No

It made **sustainable investments with an environmental objective:** _____%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** _____%

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 64 % of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The E/S characteristics of this fund included:

Minimum proportion of sustainable investments The fund partly invested in sustainable investments, which means companies and issuers involved in activities that contribute to an environmental or social objective as outlined in the 17 UN Sustainable Development Goals (SDGs) and/or the EU Taxonomy, while not significantly harming any other environmental or social objectives.

ESG scoring The fund invested in securities issued by entities whose ESG profiles have been scored by Nordea Asset Management (NAM), or by an external data provider and analysed by NAM, to ensure that only securities issued by entities that met the minimum required ESG score for the fund were eligible for inclusion.

Sector- and value-based exclusions Exclusion filters were applied to the portfolio construction process to restrict investments in companies and issuers with material exposure to certain activities deemed to be detrimental to the environment or the society at large, including tobacco companies and fossil fuel companies.

Nordea Asset Management's Paris-Aligned Fossil Fuel policy whereby the fund did not invest in companies that have significant exposure to fossil fuels unless they have a credible transition strategy.

The fund used a benchmark that is not aligned with the fund's E/S characteristics.

● How did the sustainability indicators perform?

Sustainability Indicator	Metric	Metric Value	Eligibility	Coverage
Carbon Footprint	Carbon footprint	20 tCO ₂ e / m€ invested	93.47 %	93.47 %
Violations of United Nations Global Compact	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises	0.00 % involved in violations	93.47 %	93.47 %

Eligibility: The proportion of the assets in the financial product (relative to NAV), which are in scope for the indicator.

Coverage: The proportion of the assets in the financial product (relative to NAV), where data is available to present the indicator.

● **...and compared to previous periods?**

Sustainability Indicator	Metric	Reference Period	Metric Value	Eligibility	Coverage
Carbon Footprint	Carbon footprint	2022	20 tCO2e / m€ invested	93.47 %	93.47 %
Violations of United Nations Global Compact	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises	2022	0.00 % involved in violations	93.47 %	93.47 %

Eligibility: The proportion of the assets in the financial product (relative to NAV), which are in scope for the indicator.

Coverage: The proportion of the assets in the financial product (relative to NAV), where data is available to present the indicator.

Since no reports covering previous periods are available, this section provides information for the current reporting period only.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The objectives of the sustainable investments that the fund partially made, was to contribute to one or several of the UN SDGs or alternatively be involved in Taxonomy aligned activities. Sustainable investments contributed to the objectives through the fund's investments in companies that supported the UN SDGs or Taxonomy aligned activities by passing a minimum threshold for revenue alignment with UN SDGs or the EU Taxonomy.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The sustainable investments were screened to ensure that they did not significantly harm any other social or environmental objectives (DNSH test) as defined by the EU Taxonomy or any SDGs as adopted by the UN.

- **How were the indicators for adverse impacts on sustainability factors taken into account?**

Nordea Asset Management (NAM) has developed a proprietary quantitative methodology that assessed the environmental and social impact of NAM's investment universe (direct investments mainly) using multiple principal adverse impact ("PAI") indicators from Table 1 and/or Table 2 and/or Table 3 of Annex 1 of the SFDR RTS (the "PAI tool"). The methodology utilised a diverse range of data sources in order to ensure that investee companies' performance was appropriately analysed. PAI indicators were assessed in NAM's PAI tool and the results were a material part of the DNSH test.

- **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

Alignment of the Sustainable Investments with the OECD guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, was confirmed as part of the process to identify sustainable investments using Nordea Asset Management's PAI tool.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The specific PAI indicators that were taken into consideration for this fund were:

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 58 %.

What was the share of socially sustainable investments?

The share of socially sustainable investments was 51 %.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Cash may have been held as ancillary liquidity or for risk balancing purposes. The fund may have used derivatives and other techniques for the purposes described in the 'Fund Descriptions' in the prospectus. This category may also have included securities for which relevant data is not available.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this fund have been monitored and documented on an ongoing basis.

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Nordea 1 - Emerging Stars Local Bond Fund

Legal entity identifier: 5493009USMG00QQ0TE12

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

Yes

No

It made **sustainable investments with an environmental objective:** _____%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** _____%

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 67 % of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators

measure how the environmental or social characteristics promoted by the financial product are attained.

The E/S characteristics of this fund included:

Minimum proportion of sustainable investments The fund partly invested in sustainable investments, which means companies and issuers involved in activities that contribute to an environmental or social objective as outlined in the 17 UN Sustainable Development Goals (SDGs) and/or the EU Taxonomy, while not significantly harming any other environmental or social objectives.

ESG scoring The fund invested in securities issued by entities whose ESG profiles have been scored by Nordea Asset Management (NAM), or by an external data provider and analysed by NAM, to ensure that only securities issued by entities that met the minimum required ESG score for the fund were eligible for inclusion.

Sector- and value-based exclusions Exclusion filters were applied to the portfolio construction process to restrict investments in companies and issuers with material exposure to certain activities deemed to be detrimental to the environment or the society at large, including tobacco companies and fossil fuel companies.

Nordea Asset Management's Paris-Aligned Fossil Fuel policy whereby the fund did not invest in companies that have significant exposure to fossil fuels unless they have a credible transition strategy.

The fund used a benchmark that is not aligned with the fund's E/S characteristics.

● **How did the sustainability indicators perform?**

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

The product contains investments with both an environmental and a social objective. A single investment can both contribute to an environmental and a social objective resulting in a total allocation amounting to more than 100 per cent. There is no prioritization of environmental and social objectives, and the strategy does not target any specific allocation or minimum proportion for either of these categories. The investment process accommodates the combination of environmental and social objectives by allowing the investment manager the flexibility to allocate between these based on availability and attractiveness of investment opportunities.

In which economic sectors were the investments made?

Sector	Assets
Government bonds	94.96 %
Cash	3.53 %
Financial	1.33 %
FX Forwards	0.14 %
Derivatives	0.05 %
Sum	100.00 %

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 65 %.

What was the share of socially sustainable investments?

The share of socially sustainable investments was 54 %.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

Cash may have been held as ancillary liquidity or for risk balancing purposes. The fund may have used derivatives and other techniques for the purposes described in the ‘Fund Descriptions’ in the prospectus. This category may also have included securities for which relevant data is not available.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this fund have been monitored and documented on an ongoing basis.

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Nordea 1 - Emerging Wealth Equity Fund

Legal entity identifier: 5493000WHGQ6OST4Q544

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

Yes

No

It made **sustainable investments with an environmental objective:** _____%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** _____%

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 55 % of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators

measure how the environmental or social characteristics promoted by the financial product are attained.

The E/S characteristics of this fund included:

Minimum proportion of sustainable investments The fund partly invested in sustainable investments, which means companies and issuers involved in activities that contribute to an environmental or social objective as outlined in the 17 UN Sustainable Development Goals (SDGs) and/or the EU Taxonomy, while not significantly harming any other environmental or social objectives.

Sector- and value-based exclusions Exclusion filters were applied to the portfolio construction process to restrict investments in companies and issuers with material exposure to certain activities deemed to be detrimental to the environment or the society at large, including tobacco companies and fossil fuel companies.

Nordea Asset Management's Paris-Aligned Fossil Fuel policy whereby the fund did not invest in companies that have significant exposure to fossil fuels unless they have a credible transition strategy.

The fund used a benchmark that is not aligned with the fund's E/S characteristics.

● How did the sustainability indicators perform?

Sustainability Indicator	Metric	Metric Value	Eligibility	Coverage
Carbon Footprint	Carbon footprint	16 tCO ₂ e / m€ invested	96.60 %	96.23 %
Violations of United Nations Global Compact	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises	0.00 % involved in violations	96.60 %	96.39 %

Eligibility: The proportion of the assets in the financial product (relative to NAV), which are in scope for the indicator.

Coverage: The proportion of the assets in the financial product (relative to NAV), where data is available to present the indicator.

● **...and compared to previous periods?**

Sustainability Indicator	Metric	Reference Period	Metric Value	Eligibility	Coverage
Carbon Footprint	Carbon footprint	2022	16 tCO ₂ e / m€ invested	96.60 %	96.23 %
Violations of United Nations Global Compact	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises	2022	0.00 % involved in violations	96.60 %	96.39 %

Eligibility: The proportion of the assets in the financial product (relative to NAV), which are in scope for the indicator.

Coverage: The proportion of the assets in the financial product (relative to NAV), where data is available to present the indicator.

Since no reports covering previous periods are available, this section provides information for the current reporting period only.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The objectives of the sustainable investments that the fund partially made, was to contribute to one or several of the UN SDGs or alternatively be involved in Taxonomy-aligned activities. Sustainable investments contributed to the objectives through the fund's investments in companies that support the UN SDGs or Taxonomy-aligned activities by passing a minimum threshold for revenue alignment with UN SDGs or the EU Taxonomy.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The sustainable investments were screened to ensure that they did not significantly harm any other social or environmental objectives (DNSH test) as defined by the EU Taxonomy or any SDGs as adopted by the UN.

- **How were the indicators for adverse impacts on sustainability factors taken into account?**

Nordea Asset Management (NAM) has developed a proprietary quantitative methodology that assessed the environmental and social impact of NAM's investment universe (direct investments mainly) using multiple principal adverse impact ("PAI") indicators from Table 1 and/or Table 2 and/or Table 3 of Annex 1 of the SFDR RTS (the "PAI tool"). The methodology utilised a diverse range of data sources in order to ensure that investee companies' performance was appropriately analysed. PAI indicators were assessed in NAM's PAI tool and the results were a material part of the DNSH test.

- **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

Alignment of the Sustainable Investments with the OECD guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, was confirmed as part of the process to identify sustainable investments using Nordea Asset Management's PAI tool.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The specific PAI indicators that were taken into consideration for this fund were:

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 53 %.

What was the share of socially sustainable investments?

The share of socially sustainable investments was 50 %.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

Cash may have been held as ancillary liquidity or for risk balancing purposes. The fund may have used derivatives and other techniques for the purposes described in the ‘Fund Descriptions’ in the prospectus. This category may also have included securities for which relevant data is not available.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this fund have been monitored and documented on an ongoing basis.

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Nordea 1 - EUR Corporate Bond Fund 1-3 Years

Legal entity identifier: 549300RUTOHWG1QJNA59

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

Yes

No

It made **sustainable investments with an environmental objective:** ____%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** ____%

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 54 % of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The E/S characteristics of this fund included:

Sustainable investments Although the fund has not committed to make any sustainable investments, the fund partly invested in sustainable investments, which means companies and issuers involved in activities that contribute to an environmental or social objective as outlined in the 17 UN Sustainable Development Goals (SDGs) and/or the EU Taxonomy, while not significantly harming any other environmental or social objectives.

Sector- and value-based exclusions Exclusion filters were applied to the portfolio construction process to restrict investments in companies and issuers with material exposure to certain activities deemed to be detrimental to the environment or the society at large, including tobacco companies and fossil fuel companies.

Nordea Asset Management's Paris-Aligned Fossil Fuel policy whereby the fund did not invest in companies that have significant exposure to fossil fuels unless they have a credible transition strategy.

The fund used a benchmark that is not aligned with the fund's E/S characteristics.

● How did the sustainability indicators perform?

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

● What was the asset allocation?

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

The product contains investments with both an environmental and a social objective. A single investment can both contribute to an environmental and a social objective resulting in a total allocation amounting to more than 100 per cent. There is no prioritization of environmental and social objectives, and the strategy does not target any specific allocation or minimum proportion for either of these categories. The investment process accommodates the combination of environmental and social objectives by allowing the investment manager the flexibility to allocate between these based on availability and attractiveness of investment opportunities.

● **In which economic sectors were the investments made?**

Sector	Assets
Financial	38.60 %
Consumer, Non-cyclical	13.81 %
Consumer, Cyclical	13.08 %
Industrial	10.16 %
Utilities	9.93 %

Technology	0.96 %
Basic Materials	0.31 %
Cash	0.22 %
Derivatives	0.00 %
FX Forwards	0.00 %
Sum	100.00 %

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 49 %.

What was the share of socially sustainable investments?

The share of socially sustainable investments was 45 %.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

Cash may have been held as ancillary liquidity or for risk balancing purposes. The fund may have used derivatives and other techniques for the purposes described in the ‘Fund Descriptions’ in the prospectus. This category may also have included securities for which relevant data is not available.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this fund have been monitored and documented on an ongoing basis.

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Nordea 1 - European Corporate Bond Fund

Legal entity identifier: 549300C320J1NRW8KC43

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

Yes

No

It made **sustainable investments with an environmental objective:** _____%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** _____%

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 53 % of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The E/S characteristics of this fund included:

Sustainable investments Although the fund has not committed to make any sustainable investments, the fund partly invested in sustainable investments, which means companies and issuers involved in activities that contribute to an environmental or social objective as outlined in the 17 UN Sustainable Development Goals (SDGs) and/or the EU Taxonomy, while not significantly harming any other environmental or social objectives.

Sector- and value-based exclusions Exclusion filters were applied to the portfolio construction process to restrict investments in companies and issuers with material exposure to certain activities deemed to be detrimental to the environment or the society at large, including tobacco companies and fossil fuel companies.

Nordea Asset Management's Paris-Aligned Fossil Fuel policy whereby the fund did not invest in companies that have significant exposure to fossil fuels unless they have a credible transition strategy.

The fund used a benchmark that is not aligned with the fund's E/S characteristics.

● How did the sustainability indicators perform?

Sustainability Indicator	Metric	Metric Value	Eligibility	Coverage
Carbon Footprint	Carbon footprint	76 tCO ₂ e / m€ invested	95.70 %	83.90 %
Social Violations	Number of investee countries subject to social violations (absolute number and relative number divided by all investee countries), as referred to in international treaties and conventions, United Nations principles and, where applicable, national law	0 investee countries subject to violations	3.03 %	3.03 %
		0.00 % investee countries subject to violations	3.03 %	3.03 %
Violations of United Nations Global Compact	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises	0.15 % involved in violations	95.70 %	86.66 %

Eligibility: The proportion of the assets in the financial product (relative to NAV), which are in scope for the indicator.

Coverage: The proportion of the assets in the financial product (relative to NAV), where data is available to present the indicator.

Since no reports covering previous periods are available, this section provides information for the current reporting period only.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

The objectives of the sustainable investments that the fund partially made, was to contribute to one or several of the UN SDGs or alternatively be involved in Taxonomy-aligned activities. Sustainable investments contributed to the objectives through the fund's investments in companies that support the UN SDGs or Taxonomy-aligned activities by passing a minimum threshold for revenue alignment with UN SDGs or the EU Taxonomy.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The sustainable investments were screened to ensure that they did not significantly harm any other social or environmental objectives (DNSH test) as defined by the EU Taxonomy or any SDGs as adopted by the UN.

- **How were the indicators for adverse impacts on sustainability factors taken into account?**

Nordea Asset Management (NAM) has developed a proprietary quantitative methodology that assessed the environmental and social impact of NAM's investment universe (direct investments mainly) using multiple principal adverse impact ("PAI") indicators from Table 1 and/or Table 2 and/or Table 3 of Annex 1 of the SFDR RTS (the "PAI tool"). The methodology utilised a diverse range of data sources in order to ensure that investee companies' performance was appropriately analysed. PAI indicators were assessed in NAM's PAI tool and the results were a material part of the DNSH test.

- **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

Alignment of the Sustainable Investments with the OECD guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, was confirmed as part of the process to identify sustainable investments using Nordea Asset Management's PAI tool.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The specific PAI indicators that were taken into consideration for this fund were:

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

● What was the asset allocation?

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

The product contains investments with both an environmental and a social objective. A single investment can both contribute to an environmental and a social objective resulting in a total allocation amounting to more than 100 per cent. There is no prioritization of environmental and social objectives, and the strategy does not target any specific allocation or minimum proportion for either of these categories. The investment process accommodates the combination of environmental and social objectives by allowing the investment manager the flexibility to allocate between these based on availability and attractiveness of investment opportunities.

● **In which economic sectors were the investments made?**

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 50 %.

What was the share of socially sustainable investments?

The share of socially sustainable investments was 40 %.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Cash may have been held as ancillary liquidity or for risk balancing purposes. The fund may have used derivatives and other techniques for the purposes described in the 'Fund Descriptions' in the prospectus. This category may also have included securities for which relevant data is not available.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this fund have been monitored and documented on an ongoing basis.

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Nordea 1 - European Corporate Stars Bond Fund

Legal entity identifier: 5493004J0DU336JUI826

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

Yes

No

It made **sustainable investments with an environmental objective:** _____%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** _____%

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 61 % of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The E/S characteristics of this fund included:

Minimum proportion of sustainable investments The fund partly invested in sustainable investments, which means companies and issuers involved in activities that contribute to an environmental or social objective as outlined in the 17 UN Sustainable Development Goals (SDGs) and/or the EU Taxonomy, while not significantly harming any other environmental or social objectives.

ESG scoring The fund invested in companies that have been analysed and scored in Nordea Asset Management's proprietary ESG platform to ensure that only securities issued by companies that met the minimum required ESG score were eligible for inclusion.

Sector- and value-based exclusions Exclusion filters were applied to the portfolio construction process to restrict investments in companies and issuers with material exposure to certain activities deemed to be detrimental to the environment or the society at large, including tobacco companies and fossil fuel companies.

Nordea Asset Management's Paris-Aligned Fossil Fuel policy whereby the fund did not invest in companies that have significant exposure to fossil fuels unless they have a credible transition strategy.

The fund used a benchmark that is not aligned with the fund's E/S characteristics.

● How did the sustainability indicators perform?

Greenhouse Gas Intensity for sovereigns	GHG intensity of investee countries	2022	193.02 tCO ₂ e / m€ of owned GDP	6.16 %	6.16 %

Eligibility: The proportion of the assets in the financial product (relative to NAV), which are in scope for the indicator.

Coverage: The proportion of the assets in the financial product (relative to NAV), where data is available to present the indicator.

Since no reports covering previous periods are available, this section provides information for the current reporting period only.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The objectives of the sustainable investments that the fund partially made, was to contribute to one or several of the UN SDGs or alternatively be involved in Taxonomy-aligned activities. Sustainable investments contributed to the objectives through the fund's investments in companies that support the UN SDGs or Taxonomy-aligned activities by passing a minimum threshold for revenue alignment with UN SDGs or the EU Taxonomy.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The sustainable investments were screened to ensure that they did not significantly harm any other social or environmental objectives (DNSH test) as defined by the EU Taxonomy or any SDGs as adopted by the UN.

- **How were the indicators for adverse impacts on sustainability factors taken into account?**

Nordea Asset Management (NAM) has developed a proprietary quantitative methodology that assessed the environmental and social impact of NAM's investment universe (direct investments mainly) using multiple principal adverse impact ("PAI") indicators from Table 1 and/or Table 2 and/or Table 3 of Annex 1 of the SFDR RTS (the "PAI tool"). The methodology utilised a diverse range of data sources in order to ensure that investee companies' performance was appropriately analysed. PAI indicators were assessed in NAM's PAI tool and the results were a material part of the DNSH test.

- **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

Alignment of the Sustainable Investments with the OECD guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, was confirmed as part of the process to identify sustainable investments using Nordea Asset Management's PAI tool.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The specific PAI indicators that were taken into consideration for this fund were:

CLIMATE AND OTHER ENVIRONMENT-RELATED INDICATORS

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

● What was the asset allocation?

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

The product contains investments with both an environmental and a social objective. A single investment can both contribute to an environmental and a social objective resulting in a total allocation amounting to more than 100 per cent. There is no prioritization of environmental and social objectives, and the strategy does not target any specific allocation or minimum proportion for either of these categories. The investment process accommodates the combination of environmental and social objectives by allowing the investment manager the flexibility to allocate between these based on availability and attractiveness of investment opportunities.

● **In which economic sectors were the investments made?**

Sector	Assets
Financial	47.92 %
Consumer, Non-cyclical	13.18 %
Utilities	10.46 %
Communications	10.14 %
Consumer, Cyclical	6.97 %
Industrial	4.27 %
Government bonds	4.25 %
Cash	1.25 %
Basic Materials	1.10 %
Technology	0.52 %
Derivatives	0.00 %
FX Forwards	-0.07 %
Sum	100.00 %

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 56 %.

What was the share of socially sustainable investments?

The share of socially sustainable investments was 48 %.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Cash may have been held as ancillary liquidity or for risk balancing purposes. The fund may have used derivatives and other techniques for the purposes described in the 'Fund Descriptions' in the prospectus. This category may also have included securities for which relevant data is not available.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this fund have been monitored and documented on an ongoing basis.

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Nordea 1 - European Covered Bond Fund

Legal entity identifier: 549300ODKXRGT6EIFH77

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

Yes

No

It made **sustainable investments with an environmental objective:** _____%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** _____%

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 13 % of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The E/S characteristics of this fund included:

Sustainable investments Although the fund has not committed to make any sustainable investments, the fund partly invested in sustainable investments, which means companies and issuers involved in activities that contribute to an environmental or social objective as outlined in the 17 UN Sustainable Development Goals (SDGs) and/or the EU Taxonomy, while not significantly harming any other environmental or social objectives.

Sector- and value-based exclusions Exclusion filters were applied to the portfolio construction process to restrict investments in companies and issuers with material exposure to certain activities deemed to be detrimental to the environment or the society at large, including tobacco companies and fossil fuel companies.

Nordea Asset Management's Paris-Aligned Fossil Fuel policy whereby the fund did not invest in companies that have significant exposure to fossil fuels unless they have a credible transition strategy.

The fund used a benchmark that is not aligned with the fund's E/S characteristics.

● How did the sustainability indicators perform?

Sustainability Indicator	Metric	Metric Value	Eligibility	Coverage
Carbon Footprint	Carbon footprint	0 tCO ₂ e / m€ invested	85.43 %	75.44 %
Social Violations	Number of investee countries subject to social violations (absolute number and relative number divided by all investee countries), as referred to in international treaties and conventions, United Nations principles and, where applicable, national law	0 investee countries subject to violations	11.03 %	11.03 %
		0.00 % investee countries subject to violations	11.03 %	11.03 %
Violations of United Nations Global Compact	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises	0.00 % involved in violations	85.43 %	64.51 %
Greenhouse Gas Intensity for sovereigns	GHG intensity of investee countries	219.39 tCO ₂ e / m€ of owned GDP	11.03 %	10.56 %

Eligibility: The proportion of the assets in the financial product (relative to NAV), which are in scope for the indicator.

Eligibility: The proportion of the assets in the financial product (relative to NAV), which are in scope for the indicator.

Coverage: The proportion of the assets in the financial product (relative to NAV), where data is available to present the indicator.

Since no reports covering previous periods are available, this section provides information for the current reporting period only.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The objectives of the sustainable investments that the fund partially made, was to contribute to one or several of the UN SDGs or alternatively be involved in Taxonomy-aligned activities. Sustainable investments contributed to the objectives through the fund's investments in companies that support the UN SDGs or Taxonomy-aligned activities by passing a minimum threshold for revenue alignment with UN SDGs or the EU Taxonomy.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The sustainable investments were screened to ensure that they did not significantly harm any other social or environmental objectives (DNSH test) as defined by the EU Taxonomy or any SDGs as adopted by the UN.

- **How were the indicators for adverse impacts on sustainability factors taken into account?**

Nordea Asset Management (NAM) has developed a proprietary quantitative methodology that assessed the environmental and social impact of NAM's investment universe (direct investments mainly) using multiple principal adverse impact ("PAI") indicators from Table 1 and/or Table 2 and/or Table 3 of Annex 1 of the SFDR RTS (the "PAI tool"). The methodology utilised a diverse range of data sources in order to ensure that investee companies' performance was appropriately analysed. PAI indicators were assessed in NAM's PAI tool and the results were a material part of the DNSH test.

- **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

Alignment of the Sustainable Investments with the OECD guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, was confirmed as part of the process to identify sustainable investments using Nordea Asset Management's PAI tool.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The specific PAI indicators that were taken into consideration for this fund were:

CLIMATE AND OTHER ENVIRONMENT-RELATED INDICATORS

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

The product contains investments with both an environmental and a social objective. A single investment can both contribute to an environmental and a social objective resulting in a total allocation amounting to more than 100 per cent. There is no prioritization of environmental and social objectives, and the strategy does not target any specific allocation or minimum proportion for either of these categories. The investment process accommodates the combination of environmental and social objectives by allowing the investment manager the flexibility to allocate between these based on availability and attractiveness of investment opportunities.

In which economic sectors were the investments made?

Sector	Assets
Financial	80.82 %
Government bonds	16.33 %
Cash	3.07 %
FX Forwards	-0.04 %
Derivatives	-0.19 %
Sum	100.00 %

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 13 %.

What was the share of socially sustainable investments?

The share of socially sustainable investments was 12 %.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Cash may have been held as ancillary liquidity or for risk balancing purposes. The fund may have used derivatives and other techniques for the purposes described in the 'Fund Descriptions' in the prospectus. This category may also have included securities for which relevant data is not available.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this fund have been monitored and documented on an ongoing basis.

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Nordea 1 - European Covered Bond Opportunities Fund
Legal entity identifier: 549300WUBHZSIK6U640

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

Yes

No

It made **sustainable investments with an environmental objective:** ____%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** ____%

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 21 % of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The E/S characteristics of this fund included:

Sustainable investments Although the fund has not committed to make any sustainable investments, the fund partly invested in sustainable investments, which means companies and issuers involved in activities that contribute to an environmental or social objective as outlined in the 17 UN Sustainable Development Goals (SDGs) and/or the EU Taxonomy, while not significantly harming any other environmental or social objectives.

Sector- and value-based exclusions Exclusion filters were applied to the portfolio construction process to restrict investments in companies and issuers with material exposure to certain activities deemed to be detrimental to the environment or the society at large, including tobacco companies and fossil fuel companies.

Nordea Asset Management's Paris-Aligned Fossil Fuel policy whereby the fund did not invest in companies that have significant exposure to fossil fuels unless they have a credible transition strategy.

The fund used a benchmark that is not aligned with the fund's E/S characteristics.

● How did the sustainability indicators perform?

Sustainability Indicator	Metric	Metric Value	Eligibility	Coverage
Carbon Footprint	Carbon footprint	0 tCO ₂ e / m€ invested	47.47 %	40.76 %
Social Violations	Number of investee countries subject to social violations (absolute number and relative number divided by all investee countries), as referred to in international treaties and conventions, United Nations principles and, where applicable, national law	0 investee countries subject to violations	46.91 %	46.73 %
		0.00 % investee countries subject to violations	46.91 %	46.73 %
Violations of United Nations Global Compact	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises	0.00 % involved in violations	47.47 %	33.82 %
Greenhouse Gas Intensity for sovereigns	GHG intensity of investee countries	185.70 tCO ₂ e / m€ of owned GDP	46.91 %	46.24 %

Eligibility: The proportion of the assets in the financial product (relative to NAV), which are in scope for the indicator.

Coverage: The proportion of the assets in the financial product (relative to NAV), where data is available to present the indicator.

● **...and compared to previous periods?**

Sustainability Indicator	Metric	Reference Period	Metric Value	Eligibility	Coverage
Carbon Footprint	Carbon footprint	2022	0 tCO ₂ e / m€ invested	47.47 %	40.76 %
Social Violations	Number of investee countries subject to social violations (absolute number and relative number divided by all investee countries), as referred to in international treaties and conventions, United Nations principles and, where applicable, national law	2022	0 investee countries subject to violations	46.91 %	46.73 %

Eligibility: The proportion of the assets in the financial product (relative to NAV), which are in scope for the indicator.

Coverage: The proportion of the assets in the financial product (relative to NAV), where data is available to present the indicator.

Since no reports covering previous periods are available, this section provides information for the current reporting period only.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The objectives of the sustainable investments that the fund partially made, was to contribute to one or several of the UN SDGs or alternatively be involved in Taxonomy-aligned activities. Sustainable investments contributed to the objectives through the fund's investments in companies that support the UN SDGs or Taxonomy-aligned activities by passing a minimum threshold for revenue alignment with UN SDGs or the EU Taxonomy.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The sustainable investments were screened to ensure that they did not significantly harm any other social or environmental objectives (DNSH test) as defined by the EU Taxonomy or any SDGs as adopted by the UN.

- **How were the indicators for adverse impacts on sustainability factors taken into account?**

Nordea Asset Management (NAM) has developed a proprietary quantitative methodology that assessed the environmental and social impact of NAM's investment universe (direct investments mainly) using multiple principal adverse impact ("PAI") indicators from Table 1 and/or Table 2 and/or Table 3 of Annex 1 of the SFDR RTS (the "PAI tool"). The methodology utilised a diverse range of data sources in order to ensure that investee companies' performance was appropriately analysed. PAI indicators were assessed in NAM's PAI tool and the results were a material part of the DNSH test.

- **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

Alignment of the Sustainable Investments with the OECD guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, was confirmed as part of the process to identify sustainable investments using Nordea Asset Management's PAI tool.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The specific PAI indicators that were taken into consideration for this fund were:

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

The product contains investments with both an environmental and a social objective. A single investment can both contribute to an environmental and a social objective resulting in a total allocation amounting to more than 100 per cent. There is no prioritization of environmental and social objectives, and the strategy does not target any specific allocation or minimum proportion for either of these categories. The investment process accommodates the combination of environmental and social objectives by allowing the investment manager the flexibility to allocate between these based on availability and attractiveness of investment opportunities.

In which economic sectors were the investments made?

Sector	Assets
Government bonds	51.38 %
Financial	43.03 %
Cash	3.51 %
Derivatives	2.09 %
FX Forwards	0.00 %
Sum	100.00 %

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 18 %.

What was the share of socially sustainable investments?

The share of socially sustainable investments was 20 %.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Cash may have been held as ancillary liquidity or for risk balancing purposes. The fund may have used derivatives and other techniques for the purposes described in the 'Fund Descriptions' in the prospectus. This category may also have included securities for which relevant data is not available.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this fund have been monitored and documented on an ongoing basis.

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Nordea 1 - European Cross Credit Fund

Legal entity identifier: 549300HQ4F0MHYF7TI45

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

Yes

No

It made **sustainable investments with an environmental objective:** _____%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** _____%

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 54 % of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The E/S characteristics of this fund included:

Sustainable investments Although the fund has not committed to make any sustainable investments, the fund partly invested in sustainable investments, which means companies and issuers involved in activities that contribute to an environmental or social objective as outlined in the 17 UN Sustainable Development Goals (SDGs) and/or the EU Taxonomy, while not significantly harming any other environmental or social objectives.

Sector- and value-based exclusions Exclusion filters were applied to the portfolio construction process to restrict investments in companies and issuers with material exposure to certain activities deemed to be detrimental to the environment or the society at large, including tobacco companies and fossil fuel companies.

Nordea Asset Management's Paris-Aligned Fossil Fuel policy whereby the fund did not invest in companies that have significant exposure to fossil fuels unless they have a credible transition strategy.

The fund used a benchmark that is not aligned with the fund's E/S characteristics.

● How did the sustainability indicators perform?

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

● What was the asset allocation?

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

The product contains investments with both an environmental and a social objective. A single investment can both contribute to an environmental and a social objective resulting in a total allocation amounting to more than 100 per cent. There is no prioritization of environmental and social objectives, and the strategy does not target any specific allocation or minimum proportion for either of these categories. The investment process accommodates the combination of environmental and social objectives by allowing the investment manager the flexibility to allocate between these based on availability and attractiveness of investment opportunities.

● **In which economic sectors were the investments made?**

Sector	Assets
Consumer, Non-cyclical	23.62 %
Consumer, Cyclical	22.56 %
Communications	21.69 %
Industrial	14.43 %
Utilities	7.85 %
Financial	5.06 %
Diversified	1.78 %
Basic Materials	1.60 %
Cash	1.38 %
FX Forwards	0.03 %
Sum	100.00 %

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 49 %.

What was the share of socially sustainable investments?

The share of socially sustainable investments was 45 %.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Cash may have been held as ancillary liquidity or for risk balancing purposes. The fund may have used derivatives and other techniques for the purposes described in the 'Fund Descriptions' in the prospectus. This category may also have included securities for which relevant data is not available.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this fund have been monitored and documented on an ongoing basis.

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Nordea 1 - European Financial Debt Fund

Legal entity identifier: 5493001SUQRY2LG8S445

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

Yes

No

It made **sustainable investments with an environmental objective:** _____%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** _____%

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 41 % of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The E/S characteristics of this fund included:

Sustainable investments Although the fund has not committed to make any sustainable investments, the fund partly invested in sustainable investments, which means companies and issuers involved in activities that contribute to an environmental or social objective as outlined in the 17 UN Sustainable Development Goals (SDGs) and/or the EU Taxonomy, while not significantly harming any other environmental or social objectives.

Sector- and value-based exclusions Exclusion filters were applied to the portfolio construction process to restrict investments in companies and issuers with material exposure to certain activities deemed to be detrimental to the environment or the society at large, including tobacco companies and fossil fuel companies.

Nordea Asset Management's Paris-Aligned Fossil Fuel policy whereby the fund did not invest in companies that have significant exposure to fossil fuels unless they have a credible transition strategy.

The fund used a benchmark that is not aligned with the fund's E/S characteristics.

● How did the sustainability indicators perform?

Sustainability Indicator	Metric	Metric Value	Eligibility	Coverage
Carbon Footprint	Carbon footprint	1 tCO ₂ e / m€ invested	93.62 %	81.95 %
Social Violations	Number of investee countries subject to social violations (absolute number and relative number divided by all investee countries), as referred to in international treaties and conventions, United Nations principles and, where applicable, national law	0 investee countries subject to violations	0.00 %	0.00 %
		0.00 % investee countries subject to violations	0.00 %	0.00 %
Violations of United Nations Global Compact	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises	0.00 % involved in violations	93.62 %	83.39 %
Greenhouse Gas Intensity for sovereigns	GHG intensity of investee countries	193.02 tCO ₂ e / m€ of owned GDP	0.00 %	0.00 %

Eligibility: The proportion of the assets in the financial product (relative to NAV), which are in scope for the indicator.

Coverage: The proportion of the assets in the financial product (relative to NAV), where data is available to present the indicator.

● **...and compared to previous periods?**

Sustainability Indicator	Metric	Reference Period	Metric Value	Eligibility	Coverage
Carbon Footprint	Carbon footprint	2022	1 tCO ₂ e / m€ invested	93.62 %	81.95 %
Social Violations	Number of investee countries subject to social violations (absolute number and relative number divided by all investee countries), as referred to in international treaties and conventions, United Nations principles and, where applicable, national law	2022	0 investee countries subject to violations	0.00 %	0.00 %
		2022	0.00 % investee countries subject to violations	0.00 %	0.00 %

Eligibility: The proportion of the assets in the financial product (relative to NAV), which are in scope for the indicator.

Coverage: The proportion of the assets in the financial product (relative to NAV), where data is available to present the indicator.

Since no reports covering previous periods are available, this section provides information for the current reporting period only.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The objectives of the sustainable investments that the fund partially made, was to contribute to one or several of the UN SDGs or alternatively be involved in Taxonomy-aligned activities. Sustainable investments contributed to the objectives through the fund's investments in companies that support the UN SDGs or Taxonomy-aligned activities by passing a minimum threshold for revenue alignment with UN SDGs or the EU Taxonomy.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The sustainable investments were screened to ensure that they did not significantly harm any other social or environmental objectives (DNSH test) as defined by the EU Taxonomy or any SDGs as adopted by the UN.

- **How were the indicators for adverse impacts on sustainability factors taken into account?**

Nordea Asset Management (NAM) has developed a proprietary quantitative methodology that assessed the environmental and social impact of NAM's investment universe (direct investments mainly) using multiple principal adverse impact ("PAI") indicators from Table 1 and/or Table 2 and/or Table 3 of Annex 1 of the SFDR RTS (the "PAI tool"). The methodology utilised a diverse range of data sources in order to ensure that investee companies' performance was appropriately analysed. PAI indicators were assessed in NAM's PAI tool and the results were a material part of the DNSH test.

- **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

Alignment of the Sustainable Investments with the OECD guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, was confirmed as part of the process to identify sustainable investments using Nordea Asset Management's PAI tool.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The specific PAI indicators that were taken into consideration for this fund were:

CLIMATE AND OTHER ENVIRONMENT-RELATED INDICATORS

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

● What was the asset allocation?

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

The product contains investments with both an environmental and a social objective. A single investment can both contribute to an environmental and a social objective resulting in a total allocation amounting to more than 100 per cent. There is no prioritization of environmental and social objectives, and the strategy does not target any specific allocation or minimum proportion for either of these categories. The investment process accommodates the combination of environmental and social objectives by allowing the investment manager the flexibility to allocate between these based on availability and attractiveness of investment opportunities.

● In which economic sectors were the investments made?

Sector	Assets
Financial	92.49 %
Cash	5.80 %
Communications	1.91 %
Government bonds	0.00 %
FX Forwards	-0.02 %
Derivatives	-0.17 %
Sum	100.00 %

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 38 %.

What was the share of socially sustainable investments?

The share of socially sustainable investments was 38 %.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Cash may have been held as ancillary liquidity or for risk balancing purposes. The fund may have used derivatives and other techniques for the purposes described in the 'Fund Descriptions' in the prospectus. This category may also have included securities for which relevant data is not available.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this fund have been monitored and documented on an ongoing basis.

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Nordea 1 - European High Yield Bond Fund

Legal entity identifier: 549300XXBGPCW0NFP308

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

Yes

No

It made **sustainable investments with an environmental objective:** _____%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** _____%

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 36 % of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The E/S characteristics of this fund included:

Sustainable investments Although the fund has not committed to make any sustainable investments, the fund partly invested in sustainable investments, which means companies and issuers involved in activities that contribute to an environmental or social objective as outlined in the 17 UN Sustainable Development Goals (SDGs) and/or the EU Taxonomy, while not significantly harming any other environmental or social objectives.

Sector- and value-based exclusions Exclusion filters were applied to the portfolio construction process to restrict investments in companies and issuers with material exposure to certain activities deemed to be detrimental to the environment or the society at large, including tobacco companies and fossil fuel companies.

Nordea Asset Management's Paris-Aligned Fossil Fuel policy whereby the fund did not invest in companies that have significant exposure to fossil fuels unless they have a credible transition strategy.

The fund used a benchmark that is not aligned with the fund's E/S characteristics.

● How did the sustainability indicators perform?

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

● What was the asset allocation?

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

The product contains investments with both an environmental and a social objective. A single investment can both contribute to an environmental and a social objective resulting in a total allocation amounting to more than 100 per cent. There is no prioritization of environmental and social objectives, and the strategy does not target any specific allocation or minimum proportion for either of these categories. The investment process accommodates the combination of environmental and social objectives by allowing the investment manager the flexibility to allocate between these based on availability and attractiveness of investment opportunities.

● **In which economic sectors were the investments made?**

Sector	Assets
Consumer, Non-cyclical	20.20 %
Communications	18.69 %
Financial	17.55 %
Consumer, Cyclical	16.10 %
Industrial	13.18 %
Cash	6.77 %
Basic Materials	3.70 %
Utilities	1.72 %
Diversified	1.12 %
Technology	0.94 %
Derivatives	0.06 %
Energy	0.01 %
FX Forwards	-0.04 %
Sum	100.00 %

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 33 %.

What was the share of socially sustainable investments?

The share of socially sustainable investments was 35 %.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

Cash may have been held as ancillary liquidity or for risk balancing purposes. The fund may have used derivatives and other techniques for the purposes described in the ‘Fund Descriptions’ in the prospectus. This category may also have included securities for which relevant data is not available.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this fund have been monitored and documented on an ongoing basis.

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Nordea 1 - European High Yield Credit Fund

Legal entity identifier: 549300XRUCQ32ZN5RZ02

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

Yes

No

It made **sustainable investments with an environmental objective:** ____%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** ____%

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 40 % of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The E/S characteristics of this fund included:

Sustainable investments Although the fund has not committed to make any sustainable investments, the fund partly invested in sustainable investments, which means companies and issuers involved in activities that contribute to an environmental or social objective as outlined in the 17 UN Sustainable Development Goals (SDGs) and/or the EU Taxonomy, while not significantly harming any other environmental or social objectives.

Sector- and value-based exclusions Exclusion filters were applied to the portfolio construction process to restrict investments in companies and issuers with material exposure to certain activities deemed to be detrimental to the environment or the society at large, including tobacco companies and fossil fuel companies.

Nordea Asset Management's Paris-Aligned Fossil Fuel policy whereby the fund did not invest in companies that have significant exposure to fossil fuels unless they have a credible transition strategy.

The fund used a benchmark that is not aligned with the fund's E/S characteristics.

● How did the sustainability indicators perform?

Sustainability Indicator	Metric	Metric Value	Eligibility	Coverage
Carbon Footprint	Carbon footprint	55 tCO ₂ e / m€ invested	96.31 %	61.94 %
Social Violations	Number of investee countries subject to social violations (absolute number and relative number divided by all investee countries), as referred to in international treaties and conventions, United Nations principles and, where applicable, national law	N/A	N/A	N/A
		N/A	N/A	N/A
Violations of United Nations Global Compact	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises	0.07 % involved in violations	96.31 %	72.78 %
Greenhouse Gas Intensity for sovereigns	GHG intensity of investee countries	N/A	N/A	N/A

Eligibility: The proportion of the assets in the financial product (relative to NAV), which are in scope for the indicator.

Coverage: The proportion of the assets in the financial product (relative to NAV), where data is available to present the indicator.

● **...and compared to previous periods?**

Sustainability Indicator	Metric	Reference Period	Metric Value	Eligibility	Coverage
Carbon Footprint	Carbon footprint	2022	55 tCO2e / m€ invested	96.31 %	61.94 %
Social Violations	Number of investee countries subject to social violations (absolute number and relative number divided by all investee countries), as referred to in international treaties and conventions, United Nations principles and, where applicable, national law	2022	N/A	N/A	N/A
		2022	N/A	N/A	N/A
Violations of United Nations Global Compact	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises	2022	0.07 % involved in violations	96.31 %	72.78 %
Greenhouse Gas Intensity for sovereigns	GHG intensity of investee countries	2022	N/A	N/A	N/A

Eligibility: The proportion of the assets in the financial product (relative to NAV), which are in scope for the indicator.

Coverage: The proportion of the assets in the financial product (relative to NAV), where data is available to present the indicator.

Since no reports covering previous periods are available, this section provides information for the current reporting period only.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The objectives of the sustainable investments that the fund partially made, was to contribute to one or several of the UN SDGs or alternatively be involved in Taxonomy-aligned activities. Sustainable investments contributed to the objectives through the fund's investments in companies that support the UN SDGs or Taxonomy-aligned activities by passing a minimum threshold for revenue alignment with UN SDGs or the EU Taxonomy.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The sustainable investments were screened to ensure that they did not significantly harm any other social or environmental objectives (DNSH test) as defined by the EU Taxonomy or any SDGs as adopted by the UN.

- **How were the indicators for adverse impacts on sustainability factors taken into account?**

Nordea Asset Management (NAM) has developed a proprietary quantitative methodology that assessed the environmental and social impact of NAM's investment universe (direct investments mainly) using multiple principal adverse impact ("PAI") indicators from Table 1 and/or Table 2 and/or Table 3 of Annex 1 of the SFDR RTS (the "PAI tool"). The methodology utilised a diverse range of data sources in order to ensure that investee companies' performance was appropriately analysed. PAI indicators were assessed in NAM's PAI tool and the results were a material part of the DNSH test.

- **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

Alignment of the Sustainable Investments with the OECD guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, was confirmed as part of the process to identify sustainable investments using Nordea Asset Management's PAI tool.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The specific PAI indicators that were taken into consideration for this fund were:

CLIMATE AND OTHER ENVIRONMENT-RELATED INDICATORS

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

● What was the asset allocation?

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

The product contains investments with both an environmental and a social objective. A single investment can both contribute to an environmental and a social objective resulting in a total allocation amounting to more than 100 per cent. There is no prioritization of environmental and social objectives, and the strategy does not target any specific allocation or minimum proportion for either of these categories. The investment process accommodates the combination of environmental and social objectives by allowing the investment manager the flexibility to allocate between these based on availability and attractiveness of investment opportunities.

● **In which economic sectors were the investments made?**

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 35 %.

What was the share of socially sustainable investments?

The share of socially sustainable investments was 39 %.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Cash may have been held as ancillary liquidity or for risk balancing purposes. The fund may have used derivatives and other techniques for the purposes described in the 'Fund Descriptions' in the prospectus. This category may also have included securities for which relevant data is not available.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this fund have been monitored and documented on an ongoing basis.

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Nordea 1 - European High Yield Stars Bond Fund

Legal entity identifier: 549300ISX6Y6CZ3YHN56

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

Yes

No

It made **sustainable investments with an environmental objective:** _____%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** _____%

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 49 % of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The E/S characteristics of this fund included:

Minimum proportion of sustainable investments The fund partly invested in sustainable investments, which means companies and issuers involved in activities that contribute to an environmental or social objective as outlined in the 17 UN Sustainable Development Goals (SDGs) and/or the EU Taxonomy, while not significantly harming any other environmental or social objectives.

ESG scoring The fund invested in securities issued by entities whose ESG profiles have been scored by NAM, or by an external data provider and analysed by NAM, to ensure that only securities issued by entities that met the minimum required ESG score for the fund were eligible for inclusion.

Sector- and value-based exclusions Exclusion filters were applied to the portfolio construction process to restrict investments in companies and issuers with material exposure to certain activities deemed to be detrimental to the environment or the society at large, including tobacco companies and fossil fuel companies.

Nordea Asset Management's Paris-Aligned Fossil Fuel policy whereby the fund did not invest in companies that have significant exposure to fossil fuels unless they have a credible transition strategy.

The fund used a benchmark that is not aligned with the fund's E/S characteristics.

● How did the sustainability indicators perform?

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

The objectives of the sustainable investments that the fund partially made, was to contribute to one or several of the UN SDGs or alternatively be involved in Taxonomy-aligned activities. Sustainable investments contributed to the objectives through the fund's investments in companies that support the UN SDGs or Taxonomy-aligned activities by passing a minimum threshold for revenue alignment with UN SDGs or the EU Taxonomy.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The sustainable investments were screened to ensure that they did not significantly harm any other social or environmental objectives (DNSH test) as defined by the EU Taxonomy or any SDGs as adopted by the UN.

- **How were the indicators for adverse impacts on sustainability factors taken into account?**

Nordea Asset Management (NAM) has developed a proprietary quantitative methodology that assessed the environmental and social impact of NAM's investment universe (direct investments mainly) using multiple principal adverse impact ("PAI") indicators from Table 1 and/or Table 2 and/or Table 3 of Annex 1 of the SFDR RTS (the "PAI tool"). The methodology utilised a diverse range of data sources in order to ensure that investee companies' performance was appropriately analysed. PAI indicators were assessed in NAM's PAI tool and the results were a material part of the DNSH test.

- **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

Alignment of the Sustainable Investments with the OECD guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, was confirmed as part of the process to identify sustainable investments using Nordea Asset Management's PAI tool.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The specific PAI indicators that were taken into consideration for this fund were:

CLIMATE AND OTHER ENVIRONMENT-RELATED INDICATORS

Adverse Sustainability Indicator	Metric	Metric Value	Eligibility	Coverage	
Greenhouse gas "GHG" emissions	GHG emissions	Scope 1 GHG emissions	15,719 tCO ₂ e	95.60 %	60.78 %

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

● What was the asset allocation?

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

The product contains investments with both an environmental and a social objective. A single investment can both contribute to an environmental and a social objective resulting in a total allocation amounting to more than 100 per cent. There is no prioritization of environmental and social objectives, and the strategy does not target any specific allocation or minimum proportion for either of these categories. The investment process accommodates the combination of environmental and social objectives by allowing the investment manager the flexibility to allocate between these based on availability and attractiveness of investment opportunities.

● **In which economic sectors were the investments made?**

Sector	Assets
Financial	25.54 %
Consumer, Non-cyclical	24.03 %
Communications	18.02 %
Consumer, Cyclical	13.67 %
Industrial	7.39 %

Diversified	1.26 %
Energy	0.63 %
Technology	0.14 %
FX Forwards	-0.02 %
Derivatives	-0.09 %
Sum	100.00 %

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 43 %.

What was the share of socially sustainable investments?

The share of socially sustainable investments was 45 %.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Cash may have been held as ancillary liquidity or for risk balancing purposes. The fund may have used derivatives and other techniques for the purposes described in the 'Fund Descriptions' in the prospectus. This category may also have included securities for which relevant data is not available.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this fund have been monitored and documented on an ongoing basis.

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Nordea 1 - European Inflation Linked Bond Fund

Legal entity identifier: 549300SCCJ0MD1RGLD18

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

Yes

No

It made **sustainable investments with an environmental objective:** _____%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** _____%

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 60 % of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The E/S characteristics of this fund included:

Sustainable investments Although the fund has not committed to make any sustainable investments, the fund partly invested in sustainable investments, which means companies and issuers involved in activities that contribute to an environmental or social objective as outlined in the 17 UN Sustainable Development Goals (SDGs) and/or the EU Taxonomy, while not significantly harming any other environmental or social objectives.

Sector- and value-based exclusions Exclusion filters were applied to the portfolio construction process to restrict investments in companies and issuers with material exposure to certain activities deemed to be detrimental to the environment or the society at large, including tobacco companies and fossil fuel companies.

Nordea Asset Management's Paris-Aligned Fossil Fuel policy whereby the fund did not invest in companies that have significant exposure to fossil fuels unless they have a credible transition strategy.

The fund used a benchmark that is not aligned with the fund's E/S characteristics.

● How did the sustainability indicators perform?

Sustainability Indicator	Metric	Metric Value	Eligibility	Coverage
Carbon Footprint	Carbon footprint	N/A	N/A	N/A
Social Violations	Number of investee countries subject to social violations (absolute number and relative number divided by all investee countries), as referred to in international treaties and conventions, United Nations principles and, where applicable, national law	0 investee countries subject to violations	99.69 %	99.69 %
		0.00 % investee countries subject to violations	99.69 %	99.69 %
Violations of United Nations Global Compact	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises	N/A	N/A	N/A
Greenhouse Gas Intensity for sovereigns	GHG intensity of investee countries	167.09 tCO ₂ e / m€ of owned GDP	99.69 %	99.69 %

Eligibility: The proportion of the assets in the financial product (relative to NAV), which are in scope for the indicator.

Coverage: The proportion of the assets in the financial product (relative to NAV), where data is available to present the indicator.

● **...and compared to previous periods?**

Sustainability Indicator	Metric	Reference Period	Metric Value	Eligibility	Coverage
Carbon Footprint	Carbon footprint	2022	N/A	N/A	N/A
Social Violations	Number of investee countries subject to social violations (absolute number and relative number divided by all investee countries), as referred to in international treaties and conventions, United Nations principles and, where applicable, national law	2022	0 investee countries subject to violations	99.69 %	99.69 %
		2022	0.00 % investee countries subject to violations	99.69 %	99.69 %
Violations of United Nations Global Compact	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises	2022	N/A	N/A	N/A
Greenhouse Gas Intensity for sovereigns	GHG intensity of investee countries	2022	167.09 tCO ₂ e / m€ of owned GDP	99.69 %	99.69 %

Eligibility: The proportion of the assets in the financial product (relative to NAV), which are in scope for the indicator.

Coverage: The proportion of the assets in the financial product (relative to NAV), where data is available to present the indicator.

Since no reports covering previous periods are available, this section provides information for the current reporting period only.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The objectives of the sustainable investments that the fund partially made, was to contribute to one or several of the UN SDGs or alternatively be involved in Taxonomy-aligned activities. Sustainable investments contributed to the objectives through the fund's investments in companies that support the UN SDGs or Taxonomy-aligned activities by passing a minimum threshold for revenue alignment with UN SDGs or the EU Taxonomy.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The sustainable investments were screened to ensure that they did not significantly harm any other social or environmental objectives (DNSH test) as defined by the EU Taxonomy or any SDGs as adopted by the UN.

- **How were the indicators for adverse impacts on sustainability factors taken into account?**

Nordea Asset Management (NAM) has developed a proprietary quantitative methodology that assessed the environmental and social impact of NAM's investment universe (direct investments mainly) using multiple principal adverse impact ("PAI") indicators from Table 1 and/or Table 2 and/or Table 3 of Annex 1 of the SFDR RTS (the "PAI tool"). The methodology utilised a diverse range of data sources in order to ensure that investee companies' performance was appropriately analysed. PAI indicators were assessed in NAM's PAI tool and the results were a material part of the DNSH test.

- **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

Alignment of the Sustainable Investments with the OECD guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, was confirmed as part of the process to identify sustainable investments using Nordea Asset Management's PAI tool.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The specific PAI indicators that were taken into consideration for this fund were:

CLIMATE AND OTHER ENVIRONMENT-RELATED INDICATORS

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Nordea 1 - European Small and Mid Cap Stars Equity Fund
Legal entity identifier: 5493004B5F53JY919256

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

Yes

No

It made **sustainable investments with an environmental objective:** _____%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** _____%

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 62 % of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The E/S characteristics of this fund included:

Minimum proportion of sustainable investments The fund partly invested in sustainable investments, which means companies and issuers involved in activities that contribute to an environmental or social objective as outlined in the 17 UN Sustainable Development Goals (SDGs) and/or the EU Taxonomy, while not significantly harming any other environmental or social objectives.

ESG scoring The fund invested in securities issued by entities whose ESG profiles have been scored by Nordea Asset Management (NAM), or by an external data provider and analysed by NAM, to ensure that only securities issued by entities that met the minimum required ESG score for the fund were eligible for inclusion.

Sector- and value-based exclusions Exclusion filters were applied to the portfolio construction process to restrict investments in companies and issuers with material exposure to certain activities deemed to be detrimental to the environment or the society at large, including tobacco companies and fossil fuel companies.

Nordea Asset Management's Paris-Aligned Fossil Fuel policy whereby the fund did not invest in companies that have significant exposure to fossil fuels unless they have a credible transition strategy.

The fund used a benchmark that is not aligned with the fund's E/S characteristics.

● How did the sustainability indicators perform?

Sustainability Indicator	Metric	Metric Value	Eligibility	Coverage
Carbon Footprint	Carbon footprint	24 tCO ₂ e / m€ invested	97.09 %	96.13 %
Violations of United Nations Global Compact	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises	0.00 % involved in violations	97.09 %	96.54 %

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The objectives of the sustainable investments that the fund partially made, was to contribute to one or several of the UN SDGs or alternatively be involved in Taxonomy aligned activities. Sustainable investments contributed to the objectives through the fund's investments in companies that supported the UN SDGs or Taxonomy aligned activities by passing a minimum threshold for revenue alignment with UN SDGs or the EU Taxonomy.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The sustainable investments were screened to ensure that they did not significantly harm any other social or environmental objectives (DNSH test) as defined by the EU Taxonomy or any SDGs as adopted by the UN.

- **How were the indicators for adverse impacts on sustainability factors taken into account?**

Nordea Asset Management (NAM) has developed a proprietary quantitative methodology that assessed the environmental and social impact of NAM's investment universe (direct investments mainly) using multiple principal adverse impact ("PAI") indicators from Table 1 and/or Table 2 and/or Table 3 of Annex 1 of the SFDR RTS (the "PAI tool"). The methodology utilised a diverse range of data sources in order to ensure that investee companies' performance was appropriately analysed. PAI indicators were assessed in NAM's PAI tool and the results were a material part of the DNSH test.

- **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

Alignment of the Sustainable Investments with the OECD guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, was confirmed as part of the process to identify sustainable investments using Nordea Asset Management's PAI tool.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The specific PAI indicators that were taken into consideration for this fund were:

CLIMATE AND OTHER ENVIRONMENT-RELATED INDICATORS

Adverse Sustainability Indicator	Metric	Metric Value	Eligibility	Coverage

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

● What was the asset allocation?

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

The product contains investments with both an environmental and a social objective. A single investment can both contribute to an environmental and a social objective resulting in a total allocation amounting to more than 100 per cent. There is no prioritization of environmental and social objectives, and the strategy does not target any specific allocation or minimum proportion for either of these categories. The investment process accommodates the combination of environmental and social objectives by allowing the investment manager the flexibility to allocate between these based on availability and attractiveness of investment opportunities.

● **In which economic sectors were the investments made?**

Sector	Assets
Industrial	27.48 %
Consumer, Non-cyclical	19.44 %
Financial	17.82 %
Communications	13.11 %
Consumer, Cyclical	9.95 %
Technology	4.33 %
Basic Materials	4.11 %
Cash	2.20 %
Fund Certificate	1.56 %
Sum	100.00 %

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 53 %.

What was the share of socially sustainable investments?

The share of socially sustainable investments was 54 %.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

Cash may have been held as ancillary liquidity or for risk balancing purposes. The fund may have used derivatives and other techniques for the purposes described in the ‘Fund Descriptions’ in the prospectus. This category may also have included securities for which relevant data is not available.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this fund have been monitored and documented on an ongoing basis.

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Nordea 1 - European Stars Equity Fund

Legal entity identifier: 54930081LEEGLNYZEC05

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

Yes

No

It made **sustainable investments with an environmental objective:** ____%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** ____%

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 79 % of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The E/S characteristics of this fund included:

Minimum proportion of sustainable investments The fund partly invested in sustainable investments, which means companies and issuers involved in activities that contribute to an environmental or social objective as outlined in the 17 UN Sustainable Development Goals (SDGs) and/or the EU Taxonomy, while not significantly harming any other environmental or social objectives.

ESG scoring The fund invested in securities issued by entities whose ESG profiles have been scored by Nordea Asset Management (NAM), or by an external data provider and analysed by NAM, to ensure that only securities issued by entities that met the minimum required ESG score for the fund were eligible for inclusion.

Sector- and value-based exclusions Exclusion filters were applied to the portfolio construction process to restrict investments in companies and issuers with material exposure to certain activities deemed to be detrimental to the environment or the society at large, including tobacco companies and fossil fuel companies.

Nordea Asset Management's Paris-Aligned Fossil Fuel policy whereby the fund did not invest in companies that have significant exposure to fossil fuels unless they have a credible transition strategy.

The fund used a benchmark that is not aligned with the fund's E/S characteristics.

● How did the sustainability indicators perform?

Sustainability Indicator	Metric	Metric Value	Eligibility	Coverage
Carbon Footprint	Carbon footprint	90 tCO ₂ e / m€ invested	98.54 %	98.54 %
Violations of United Nations Global Compact	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises	0.00 % involved in violations	98.54 %	98.54 %

Eligibility: The proportion of the assets in the financial product (relative to NAV), which are in scope for the indicator.

Coverage: The proportion of the assets in the financial product (relative to NAV), where data is available to present the indicator.

● **...and compared to previous periods?**

Sustainability Indicator	Metric	Reference Period	Metric Value	Eligibility	Coverage

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Nordea 1 - Flexible Credit Fund

Legal entity identifier: 549300XZGMRU5J181885

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

Yes

No

It made **sustainable investments with an environmental objective:** _____%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** _____%

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 26 % of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The E/S characteristics of this fund included:

Sustainable investments Although the fund has not committed to make any sustainable investments, the fund partly invested in sustainable investments, which means companies and issuers involved in activities that contribute to an environmental or social objective as outlined in the 17 UN Sustainable Development Goals (SDGs) and/or the EU Taxonomy, while not significantly harming any other environmental or social objectives.

Sector- and value-based exclusions Exclusion filters were applied to the portfolio construction process to restrict investments in companies and issuers with material exposure to certain activities deemed to be detrimental to the environment or the society at large, including tobacco companies and fossil fuel companies.

Nordea Asset Management's Paris-Aligned Fossil Fuel policy whereby the fund did not invest in companies that have significant exposure to fossil fuels unless they have a credible transition strategy.

The fund used a benchmark that is not aligned with the fund's E/S characteristics.

Violations of United Nations Global Compact	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises	2022	0.00 % involved in violations	91.06 %	50.40 %
Greenhouse Gas Intensity for sovereigns	GHG intensity of investee countries	2022	N/A	N/A	N/A

Eligibility: The proportion of the assets in the financial product (relative to NAV), which are in scope for the indicator.

Coverage: The proportion of the assets in the financial product (relative to NAV), where data is available to present the indicator.

Since no reports covering previous periods are available, this section provides information for the current reporting period only.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The objectives of the sustainable investments that the fund partially made, was to contribute to one or several of the UN SDGs or alternatively be involved in Taxonomy-aligned activities. Sustainable investments contributed to the objectives through the fund's investments in companies that support the UN SDGs or Taxonomy-aligned activities by passing a minimum threshold for revenue alignment with UN SDGs or the EU Taxonomy.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The sustainable investments were screened to ensure that they did not significantly harm any other social or environmental objectives (DNSH test) as defined by the EU Taxonomy or any SDGs as adopted by the UN.

- **How were the indicators for adverse impacts on sustainability factors taken into account?**

Nordea Asset Management (NAM) has developed a proprietary quantitative methodology that assessed the environmental and social impact of NAM's investment universe (direct investments mainly) using multiple principal adverse impact ("PAI") indicators from Table 1 and/or Table 2 and/or Table 3 of Annex 1 of the SFDR RTS (the "PAI tool"). The methodology utilised a diverse range of data sources in order to ensure that investee companies' performance was appropriately analysed. PAI indicators were assessed in NAM's PAI tool and the results were a material part of the DNSH test.

- **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

Alignment of the Sustainable Investments with the OECD guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, was confirmed as part of the process to identify sustainable investments using Nordea Asset Management's PAI tool.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The specific PAI indicators that were taken into consideration for this fund were:

CLIMATE AND OTHER ENVIRONMENT-RELATED INDICATORS

Adverse Sustainability Indicator	Metric	Metric Value	Eligibility	Coverage

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

● What was the asset allocation?

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

The product contains investments with both an environmental and a social objective. A single investment can both contribute to an environmental and a social objective resulting in a total allocation amounting to more than 100 per cent. There is no prioritization of environmental and social objectives, and the strategy does not target any specific allocation or minimum proportion for either of these categories. The investment process accommodates the combination of environmental and social objectives by allowing the investment manager the flexibility to allocate between these based on availability and attractiveness of investment opportunities.

● **In which economic sectors were the investments made?**

Sector	Assets
Consumer, Cyclical	15.75 %
Financial	14.70 %
Communications	14.52 %
Asset backed Securities	14.39 %
Consumer, Non-cyclical	13.59 %

Derivatives	4.33 %
Cash	2.90 %
Technology	1.63 %
Utilities	1.19 %
FX Forwards	0.05 %
Sum	100.00 %

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 23 %.

What was the share of socially sustainable investments?

The share of socially sustainable investments was 24 %.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Cash may have been held as ancillary liquidity or for risk balancing purposes. The fund may have used derivatives and other techniques for the purposes described in the 'Fund Descriptions' in the prospectus. This category may also have included securities for which relevant data is not available.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this fund have been monitored and documented on an ongoing basis.

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Nordea 1 - GBP Diversified Return Fund

Legal entity identifier: 549300ZBFDBDY4UFU888

Environmental and/or social characteristics

Sustainable investment

means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

Yes

No

It made **sustainable investments with an environmental objective:** ____%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** ____%

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 62 % of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The E/S characteristics of this fund included:

Sustainable investments Although the fund has not committed to make any sustainable investments, the fund partly invested in sustainable investments, which means companies and issuers involved in activities that contribute to an environmental or social objective as outlined in the 17 UN Sustainable Development Goals (SDGs) and/or the EU Taxonomy, while not significantly harming any other environmental or social objectives.

Sector- and value-based exclusions Exclusion filters were applied to the portfolio construction process to restrict investments in companies and issuers with material exposure to certain activities deemed to be detrimental to the environment or the society at large, including tobacco companies and fossil fuel companies.

Nordea Asset Management's Paris-Aligned Fossil Fuel policy whereby the fund did not invest in companies that have significant exposure to fossil fuels unless they have a credible transition strategy.

The fund used a benchmark that is not aligned with the fund's E/S characteristics.

● How did the sustainability indicators perform?

Sustainability Indicator	Metric	Metric Value	Eligibility	Coverage
Carbon Footprint	Carbon footprint	15 tCO ₂ e / m€ invested	90.31 %	89.88 %
Social Violations	Number of investee countries subject to social violations (absolute number and relative number divided by all investee countries), as referred to in international treaties and conventions, United Nations principles and, where applicable, national law	0 investee countries subject to violations	5.24 %	5.24 %

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

● What was the asset allocation?

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

The product contains investments with both an environmental and a social objective. A single investment can both contribute to an environmental and a social objective resulting in a total allocation amounting to more than 100 per cent. There is no prioritization of environmental and social objectives, and the strategy does not target any specific allocation or minimum proportion for either of these categories. The investment process accommodates the combination of environmental and social objectives by allowing the investment manager the flexibility to allocate between these based on availability and attractiveness of investment opportunities.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 46 %.

What was the share of socially sustainable investments?

The share of socially sustainable investments was 51 %.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

Cash may have been held as ancillary liquidity or for risk balancing purposes. The fund may have used derivatives and other techniques for the purposes described in the ‘Fund Descriptions’ in the prospectus. This category may also have included securities for which relevant data is not available.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this fund have been monitored and documented on an ongoing basis.

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Nordea 1 - Global Bond Fund

Legal entity identifier: 549300FSVWLOVAR25025

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

Yes

No

It made **sustainable investments with an environmental objective:** _____%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** _____%

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 32 % of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The E/S characteristics of this fund included:

Sustainable investments Although the fund has not committed to make any sustainable investments, the fund partly invested in sustainable investments, which means companies and issuers involved in activities that contribute to an environmental or social objective as outlined in the 17 UN Sustainable Development Goals (SDGs) and/or the EU Taxonomy, while not significantly harming any other environmental or social objectives.

Sector- and value-based exclusions Exclusion filters were applied to the portfolio construction process to restrict investments in companies and issuers with material exposure to certain activities deemed to be detrimental to the environment or the society at large, including tobacco companies and fossil fuel companies.

Nordea Asset Management's Paris-Aligned Fossil Fuel policy whereby the fund did not invest in companies that have significant exposure to fossil fuels unless they have a credible transition strategy.

The fund used a benchmark that is not aligned with the fund's E/S characteristics.

● How did the sustainability indicators perform?

Sustainability Indicator	Metric	Metric Value	Eligibility	Coverage
Carbon Footprint	Carbon footprint	1 tCO ₂ e / m€ invested	24.55 %	13.63 %
Social Violations	Number of investee countries subject to social violations (absolute number and relative number divided by all investee countries), as referred to in international treaties and conventions, United Nations principles and, where applicable, national law	0 investee countries subject to violations	72.02 %	71.91 %
		0.00 % investee countries subject to violations	72.02 %	71.91 %
NAM Sovereign ESG Score	Average numerical score from 1(best) - 10 (worst)	7.68	72.02 %	71.91 %
Violations of United Nations Global Compact	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises	0.00 % involved in violations	24.55 %	8.88 %
Greenhouse Gas Intensity for sovereigns	GHG intensity of investee countries	285.16 tCO ₂ e / m€ of owned GDP	72.02 %	70.21 %

Eligibility: The proportion of the assets in the financial product (relative to NAV), which are in scope for the indicator.

Coverage: The proportion of the assets in the financial product (relative to NAV), where data is available to present the indicator.

● **...and compared to previous periods?**

Sustainability Indicator	Metric	Reference Period	Metric Value	Eligibility	Coverage
Carbon Footprint	Carbon footprint	2022	1 tCO ₂ e / m€ invested	24.55 %	13.63 %
Social Violations	Number of investee countries subject to social violations (absolute number and relative number divided by all investee countries), as referred to in international treaties and conventions, United Nations principles and, where applicable, national law	2022	0 investee countries subject to violations	72.02 %	71.91 %
		2022	0.00 % investee countries subject to violations	72.02 %	71.91 %

Eligibility: The proportion of the assets in the financial product (relative to NAV), which are in scope for the indicator.

Coverage: The proportion of the assets in the financial product (relative to NAV), where data is available to present the indicator.

Since no reports covering previous periods are available, this section provides information for the current reporting period only.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The objectives of the sustainable investments that the fund partially made, was to contribute to one or several of the UN SDGs or alternatively be involved in Taxonomy-aligned activities. Sustainable investments contributed to the objectives through the fund's investments in companies that support the UN SDGs or Taxonomy-aligned activities by passing a minimum threshold for revenue alignment with UN SDGs or the EU Taxonomy.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The sustainable investments were screened to ensure that they did not significantly harm any other social or environmental objectives (DNSH test) as defined by the EU Taxonomy or any SDGs as adopted by the UN.

- **How were the indicators for adverse impacts on sustainability factors taken into account?**

Nordea Asset Management (NAM) has developed a proprietary quantitative methodology that assessed the environmental and social impact of NAM's investment universe (direct investments mainly) using multiple principal adverse impact ("PAI") indicators from Table 1 and/or Table 2 and/or Table 3 of Annex 1 of the SFDR RTS (the "PAI tool"). The methodology utilised a diverse range of data sources in order to ensure that investee companies' performance was appropriately analysed. PAI indicators were assessed in NAM's PAI tool and the results were a material part of the DNSH test.

- **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

Alignment of the Sustainable Investments with the OECD guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, was confirmed as part of the process to identify sustainable investments using Nordea Asset Management's PAI tool.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The specific PAI indicators that were taken into consideration for this fund were:

CLIMATE AND OTHER ENVIRONMENT-RELATED INDICATORS

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

● What was the asset allocation?

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

The product contains investments with both an environmental and a social objective. A single investment can both contribute to an environmental and a social objective resulting in a total allocation amounting to more than 100 per cent. There is no prioritization of environmental and social objectives, and the strategy does not target any specific allocation or minimum proportion for either of these categories. The investment process accommodates the combination of environmental and social objectives by allowing the investment manager the flexibility to allocate between these based on availability and attractiveness of investment opportunities.

● In which economic sectors were the investments made?

Sector	Assets
Government bonds	87.06 %
Financial	9.61 %
Cash	3.27 %
Derivatives	0.05 %
FX Forwards	0.01 %
Sum	100.00 %

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 28 %.

What was the share of socially sustainable investments?

The share of socially sustainable investments was 29 %.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

Cash may have been held as ancillary liquidity or for risk balancing purposes. The fund may have used derivatives and other techniques for the purposes described in the ‘Fund Descriptions’ in the prospectus. This category may also have included securities for which relevant data is not available.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this fund have been monitored and documented on an ongoing basis.

ANNEX V

Template periodic disclosure for the financial products referred to in Article 9, paragraphs 1 to 4a, of Regulation (EU) 2019/2088 and Article 5, first paragraph, of Regulation (EU) 2020/852

Product name: Nordea 1 - Global Climate and Environment Fund

Legal entity identifier: 549300JJG1N66HM3TH21

Sustainable investment objective

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

Yes

No

It made **sustainable investments with an environmental objective:** 97 %

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** 85 %

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of ____% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent was the sustainable investment objective of this financial product met?

Sustainability indicators measure how the sustainable objectives of this financial product are attained.

The fund aimed to create positive environmental impact by investing in companies that are materially involved in economic activities that are considered environmentally sustainable by virtue of their contribution to one or more of the UN SDGs. The EU Taxonomy provides a framework for assessing the environmental sustainability of economic activities and to the extent that reliable data was available, the Taxonomy technical screenings was the reference point for the assessment of environmentally sustainable investments.

The fund used a benchmark which is not aligned with the sustainable objective of the fund.

The EU Taxonomy defines six environmental objectives: climate change mitigation, climate change adaptation, sustainable use and protection of water and marine resources, transition to a circular economy, waste prevention and recycling, pollution prevention and control, protection of healthy ecosystems and lists the economic activities that are considered environmentally sustainable for investment purposes. The alignment of the companies' activities with the objectives of the EU Taxonomy was identified and evaluated to the extent that data was available and of an adequate quality. Depending on the availability of feasible investment opportunities, the fund may have contributed to any of the environmental objectives set out in the Taxonomy Regulation.

● How did the sustainability indicators perform?

Sustainability Indicator	Metric	Metric Value	Eligibility	Coverage
SDG 9 - Industry, Innovation and Infrastructure	Build resilient infrastructure, promote inclusive and sustainable industrialization and foster innovation	29.55 % of financed revenue	97.51 %	95.78 %
SDG 11 - Sustainable Cities and Communities	Make cities and human settlements inclusive, safe, resilient and sustainable	14.45 % of financed revenue	97.51 %	97.51 %
SDG 12 - Responsible Consumption and Production	Ensure sustainable consumption and production patterns	6.79 % of financed revenue	97.51 %	97.51 %
% alignment to EU Taxonomy	Alignment with EU taxonomy is used to measure the share of sustainable investments with an environmental objective that is aligned with the EU Taxonomy	4.90 % alignment to EU taxonomy	97.33 %	95.66 %

Eligibility: The proportion of the assets in the financial product (relative to NAV), which are in scope for the indicator.

Coverage: The proportion of the assets in the financial product (relative to NAV), where data is available to present the indicator.

● **...and compared to previous periods?**

Sustainability Indicator	Metric	Reference Period	Metric Value	Eligibility	Coverage

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

● What was the asset allocation?

The product contains investments with both an environmental and a social objective. A single investment can both contribute to an environmental and a social objective resulting in a total allocation amounting to more than 100 per cent. There is no prioritization of environmental and social objectives, and the strategy does not target any specific allocation or minimum proportion for either of these categories. The investment process accommodates the combination of environmental and social objectives by allowing the investment manager the flexibility to allocate between these based on availability and attractiveness of investment opportunities.

● In which economic sectors were the investments made?

Sector	Assets
Industrial	40.69 %
Basic Materials	17.30 %
Technology	16.94 %
Utilities	10.09 %
Consumer, Non-cyclical	4.14 %
Consumer, Cyclical	4.08 %
Financial	3.48 %
Cash	2.28 %
Energy	0.99 %
Sum	100.00 %

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

Assessment on Taxonomy alignment is currently conducted with data from third party providers as well as self-reported data from investee companies when available. Proprietary tools and processes to measure significant harm and minimum social safeguards have been developed.

The methodology applied by the third-party data providers assesses how companies are involved in economic activities that substantially contribute to an environmental objective while not significantly harming other sustainable objectives and meeting minimum social safeguards. Taxonomy-alignment of the investment is based on the percentage of turnover exposed or potentially exposed to taxonomy-aligned activities. Data providers' methodologies vary and results may not be fully aligned as long as publicly reported company data is still lacking and assessments rely largely on equivalent data.

We prioritize the use of self-reported data where available. Where data providers are used to deliver equivalent data, NAM has conducted due diligence on the data provider's methodology.

The compliance of the investments with the EU Taxonomy has not been subject to an assurance by auditors or a review by third parties. Data provider methodologies vary and results may not be fully aligned as long as publicly reported data is still lacking.

● **What was the share of investments made in transitional and enabling activities?**

Type of Activity	Assets
Transitional activities	0.00 %
Enabling activities	0.00 %
Sum	0.00 %

● **How did the percentage of investments aligned with the EU Taxonomy compare with previous reference periods?**

Reference Period	Taxonomy-Aligned Investments
2022	4.90 %

Since no reports covering previous periods are available, this section provides information for the current reporting period only.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 92 %.

What was the share of socially sustainable investments?

The share of socially sustainable investments was 85 %.

What investments were included under "not sustainable", what was their purpose and were there any minimum environmental or social safeguards?

Cash may have been held as ancillary liquidity or for risk balancing purposes. The fund may have used derivatives and other techniques for the purposes described in the 'Fund Descriptions' in the prospectus. This category may also have included securities for which relevant data is not available. Such investments were assessed to ensure that they live up to minimum social safeguards.

What actions have been taken to attain the sustainable investment objective during the reference period?

The binding elements of the investment strategy used to select the investments to attain the sustainable investment objective by this fund have been monitored and documented on an ongoing basis.

ANNEX V

Template periodic disclosure for the financial products referred to in Article 9, paragraphs 1 to 4a, of Regulation (EU) 2019/2088 and Article 5, first paragraph, of Regulation (EU) 2020/852

Product name: Nordea 1 - Global Climate and Social Impact Fund

Legal entity identifier: 549300M3BNRUZQFIEE11

Sustainable investment objective

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

Yes

No

It made **sustainable investments with an environmental objective:** 87 %

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** 90 %

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of ____% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent was the sustainable investment objective of this financial product met?

Sustainability indicators measure how the sustainable objectives of this financial product are attained.

The fund combined environmentally and socially sustainable investment objectives. It aimed to create positive environmental and social impact by investing in companies that are involved in economic activities that are considered environmentally or socially sustainable by virtue of their contribution to one or more of the UN SDGs. The EU Taxonomy provides a framework for assessing the environmental sustainability of economic activities and to the extent the Taxonomy technical screenings and company data were available, the Taxonomy was the reference point for the assessment of the environmentally sustainable investments.

The fund used a benchmark which is not aligned with the sustainable objective of the fund.

The EU Taxonomy defines six environmental objectives: climate change mitigation, climate change adaptation, sustainable use and protection of water and marine resources, transition to a circular economy, waste prevention and recycling, pollution prevention and control, protection of healthy ecosystems and lists the economic activities that are considered environmentally sustainable for investment purposes. The alignment of the companies' activities with the objectives of the EU Taxonomy was identified and evaluated to the extent that data was available and of an adequate quality. Depending on the availability of feasible investment opportunities, the fund may have contributed to any of the environmental objectives set out in the Taxonomy Regulation.

● How did the sustainability indicators perform?

Sustainability Indicator	Metric	Metric Value	Eligibility	Coverage
SDG 3 - Good Health and Well-being	Ensure healthy lives and promote well-being for all at all ages	14.89 % of financed revenue	97.29 %	97.29 %
SDG 9 - Industry, Innovation and Infrastructure	Build resilient infrastructure, promote inclusive and sustainable industrialization and foster innovation	28.79 % of financed revenue	97.29 %	97.29 %
SDG 11 - Sustainable Cities and Communities	Make cities and human settlements inclusive, safe, resilient and sustainable	13.32 % of financed revenue	97.29 %	97.29 %
% alignment to EU Taxonomy	Alignment with EU taxonomy is used to measure the share of sustainable investments with an environmental objective that is aligned with the EU Taxonomy	3.61 % alignment to EU taxonomy	97.41 %	97.13 %

Eligibility: The proportion of the assets in the financial product (relative to NAV), which are in scope for the indicator.

Coverage: The proportion of the assets in the financial product (relative to NAV), where data is available to present the indicator.

● **...and compared to previous periods?**

Sustainability Indicator	Metric	Reference Period	Metric Value	Eligibility	Coverage
SDG 3 - Good Health and Well-being	Ensure healthy lives and promote well-being for all at all ages	2022	14.89 % of financed revenue	97.29 %	97.29 %
SDG 9 - Industry, Innovation and Infrastructure	Build resilient infrastructure, promote inclusive and sustainable industrialization and foster innovation	2022	28.79 % of financed revenue	97.29 %	97.29 %

% alignment to EU Taxonomy	Alignment with EU taxonomy is used to measure the share of sustainable investments with an environmental objective that is aligned with the EU Taxonomy	2022	3.61 % alignment to EU taxonomy	97.41 %	97.13 %

Eligibility: The proportion of the assets in the financial product (relative to NAV), which are in scope for the indicator.

Coverage: The proportion of the assets in the financial product (relative to NAV), where data is available to present the indicator.

Since no reports covering previous periods are available, this section provides information for the current reporting period only.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

● **How did the sustainable investments not cause significant harm to any sustainable investment objective?**

The sustainable investments were screened to ensure that they did not significantly harm any other social or environmental objectives (DNSH test) as defined by the EU Taxonomy or any SDGs as adopted by the UN.

- How were the indicators for adverse impacts on sustainability factors taken into account?

Nordea Asset Management (NAM) has developed a proprietary quantitative methodology that assessed the environmental and social impact of NAM's investment universe (direct investments mainly) using multiple principal adverse impact ("PAI") indicators from Table 1 and/or Table 2 and/or Table 3 of Annex 1 of the SFDR RTS (the "PAI tool"). The methodology utilised a diverse range of data sources in order to ensure that investee companies' performance was appropriately analysed. PAI indicators were assessed in NAM's PAI tool and the results were a material part of the DNSH test.

- Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Alignment of the Sustainable Investments with the OECD guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, was confirmed as part of the process to identify sustainable investments using Nordea Asset Management's PAI tool.

How did this financial product consider principal adverse impacts on sustainability factors?

The specific PAI indicators that were taken into consideration for this fund were:

CLIMATE AND OTHER ENVIRONMENT-RELATED INDICATORS

Adverse Sustainability Indicator	Metric	Metric Value	Eligibility	Coverage	
Greenhouse gas "GHG" emissions	Scope 1 GHG emissions	7,802 tCO ₂ e	97.48 %	97.48 %	
	Scope 2 GHG emissions	2,946 tCO ₂ e	97.48 %	97.48 %	
	From 1 January 2023, Scope 3 GHG emissions	51,171 tCO ₂ e	97.48 %	97.48 %

Emerson Electric	Industrial	1.92 %	United States
ASML Holding	Technology	1.91 %	Netherlands

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

● What was the asset allocation?

The product contains investments with both an environmental and a social objective. A single investment can both contribute to an environmental and a social objective resulting in a total allocation amounting to more than 100 per cent. There is no prioritization of environmental and social objectives, and the strategy does not target any specific allocation or minimum proportion for either of these categories. The investment process accommodates the combination of environmental and social objectives by allowing the investment manager the flexibility to allocate between these based on availability and attractiveness of investment opportunities.

● In which economic sectors were the investments made?

Sector	Assets
Industrial	32.27 %
Consumer, Non-cyclical	16.39 %
Technology	12.86 %
Financial	11.44 %
Basic Materials	10.65 %
Communications	5.01 %
Utilities	4.97 %
Consumer, Cyclical	3.21 %
Cash	2.13 %
Energy	1.08 %
Sum	100.00 %

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

Assessment on Taxonomy alignment is currently conducted with data from third party providers as well as self-reported data from investee companies when available. Proprietary tools and processes to measure significant harm and minimum social safeguards have been developed.

The methodology applied by the third-party data providers assesses how companies are involved in economic activities that substantially contribute to an environmental objective while not significantly harming other sustainable objectives and meeting minimum social safeguards. Taxonomy-alignment of the investment is based on the percentage of turnover exposed or potentially exposed to taxonomy-aligned activities. Data providers' methodologies vary and results may not be fully aligned as long as publicly reported company data is still lacking and assessments rely largely on equivalent data.

We prioritize the use of self-reported data where available. Where data providers are used to deliver equivalent data, NAM has conducted due diligence on the data provider's methodology.

The compliance of the investments with the EU Taxonomy has not been subject to an assurance by auditors or a review by third parties. Data provider methodologies vary and results may not be fully aligned as long as publicly reported data is still lacking.

● **What was the share of investments made in transitional and enabling activities?**

Type of Activity	Assets
Transitional activities	0.00 %
Enabling activities	0.00 %
Sum	0.00 %

● **How did the percentage of investments aligned with the EU Taxonomy compare with previous reference periods?**

Reference Period	Taxonomy-Aligned Investments
2022	3.61 %

Since no reports covering previous periods are available, this section provides information for the current reporting period only.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 84 %.

What was the share of socially sustainable investments?

The share of socially sustainable investments was 90 %.

What investments were included under "not sustainable", what was their purpose and were there any minimum environmental or social safeguards?

Cash may have been held as ancillary liquidity or for risk balancing purposes. The fund may have used derivatives and other techniques for the purposes described in the 'Fund Descriptions' in the prospectus. This category may also have included securities for which relevant data is not available. Such investments were assessed to ensure that they live up to minimum social safeguards.

What actions have been taken to attain the sustainable investment objective during the reference period?

The binding elements of the investment strategy used to select the investments to attain the sustainable investment objective by this fund have been monitored and documented on an ongoing basis.

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Nordea 1 - Global Climate Engagement Fund

Legal entity identifier: 549300KRLGEORNV7310

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

Yes

No

It made **sustainable investments with an environmental objective:** _____%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** _____%

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 61 % of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The E/S characteristics of this fund included:

Climate transition The fund focused on companies that demonstrate a transition path for their business models to become aligned with the goals of the Paris agreement. Active ownership and engagement are key components in seeking to influence companies' behaviour, and to initiate and accelerate the needed transition.

Minimum proportion of sustainable investments The fund partly invested in sustainable investments, which means companies and issuers involved in activities that contribute to an environmental or social objective as outlined in the 17 UN Sustainable Development Goals (SDGs) and/or the EU Taxonomy, while not significantly harming any other environmental or social objectives.

The fund used a benchmark that is not aligned with the fund's E/S characteristics.

● *How did the sustainability indicators perform?*

Sustainability Indicator	Metric	Metric Value	Eligibility	Coverage
Carbon Footprint	Carbon footprint	403 tCO ₂ e / m€ invested	94.84 %	94.84 %
Violations of United Nations Global Compact	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises	0.00 % involved in violations	94.84 %	94.84 %

Eligibility: The proportion of the assets in the financial product (relative to NAV), which are in scope for the indicator.

Coverage: The proportion of the assets in the financial product (relative to NAV), where data is available to present the indicator.

● **...and compared to previous periods?**

Sustainability Indicator	Metric	Reference Period	Metric Value	Eligibility	Coverage
Carbon Footprint	Carbon footprint	2022	403 tCO ₂ e / m€ invested	94.84 %	94.84 %
Violations of United Nations Global Compact	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises	2022	0.00 % involved in violations	94.84 %	94.84 %

Eligibility: The proportion of the assets in the financial product (relative to NAV), which are in scope for the indicator.

Coverage: The proportion of the assets in the financial product (relative to NAV), where data is available to present the indicator.

Since no reports covering previous periods are available, this section provides information for the current reporting period only.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The objectives of the sustainable investments that the fund partially made, was to contribute to one or several of the UN SDGs or alternatively be involved in Taxonomy-aligned activities. Sustainable investments contributed to the objectives through the fund's investments in companies that support the UN SDGs or Taxonomy-aligned activities by passing a minimum threshold for revenue alignment with UN SDGs or the EU Taxonomy.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The sustainable investments were screened to ensure that they did not significantly harm any other social or environmental objectives (DNSH test) as defined by the EU Taxonomy or any SDGs as adopted by the UN.

- **How were the indicators for adverse impacts on sustainability factors taken into account?**

Nordea Asset Management (NAM) has developed a proprietary quantitative methodology that assessed the environmental and social impact of NAM's investment universe (direct investments mainly) using multiple principal adverse impact ("PAI") indicators from Table 1 and/or Table 2 and/or Table 3 of Annex 1 of the SFDR RTS (the "PAI tool"). The methodology utilised a diverse range of data sources in order to ensure that investee companies' performance was appropriately analysed. PAI indicators were assessed in NAM's PAI tool and the results were a material part of the DNSH test.

- **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

Alignment of the Sustainable Investments with the OECD guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, was confirmed as part of the process to identify sustainable investments using Nordea Asset Management's PAI tool.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The specific PAI indicators that were taken into consideration for this fund were:

CLIMATE AND OTHER ENVIRONMENT-RELATED INDICATORS

Adverse Sustainability Indicator	Metric	Metric Value	Eligibility	Coverage	
Greenhouse gas "GHG" emissions	Scope 1 GHG emissions	3,308 tCO ₂ e	94.84 %	94.84 %

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

● What was the asset allocation?

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

The product contains investments with both an environmental and a social objective. A single investment can both contribute to an environmental and a social objective resulting in a total allocation amounting to more than 100 per cent. There is no prioritization of environmental and social objectives, and the strategy does not target any specific allocation or minimum proportion for either of these categories. The investment process accommodates the combination of environmental and social objectives by allowing the investment manager the flexibility to allocate between these based on availability and attractiveness of investment opportunities.

● **In which economic sectors were the investments made?**

Sector	Assets
Industrial	20.47 %
Utilities	15.60 %
Basic Materials	14.89 %
Consumer, Non-cyclical	13.02 %
Consumer, Cyclical	11.30 %
Financial	9.97 %
Technology	6.94 %
Cash	5.29 %
Energy	2.52 %
Sum	100.00 %

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 59 %.

What was the share of socially sustainable investments?

The share of socially sustainable investments was 50 %.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Cash may have been held as ancillary liquidity or for risk balancing purposes. The fund may have used derivatives and other techniques for the purposes described in the 'Fund Descriptions' in the prospectus. This category may also have included securities for which relevant data is not available.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this fund have been monitored and documented on an ongoing basis.

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Nordea 1 - Global Disruption Fund

Legal entity identifier: 549300QBQ3523WUDHH63

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

Yes

No

It made **sustainable investments with an environmental objective:** _____%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** _____%

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 76 % of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The E/S characteristics of this fund included:

Sustainable investments Although the fund has not committed to make any sustainable investments, the fund partly invested in sustainable investments, which means companies and issuers involved in activities that contribute to an environmental or social objective as outlined in the 17 UN Sustainable Development Goals (SDGs) and/or the EU Taxonomy, while not significantly harming any other environmental or social objectives.

Sector- and value-based exclusions Exclusion filters were applied to the portfolio construction process to restrict investments in companies and issuers with material exposure to certain activities deemed to be detrimental to the environment or the society at large, including tobacco companies and fossil fuel companies.

Nordea Asset Management's Paris-Aligned Fossil Fuel policy whereby the fund did not invest in companies that have significant exposure to fossil fuels unless they have a credible transition strategy.

The fund used a benchmark that is not aligned with the fund's E/S characteristics.

● How did the sustainability indicators perform?

Sustainability Indicator	Metric	Metric Value	Eligibility	Coverage
Carbon Footprint	Carbon footprint	27 tCO ₂ e / m€ invested	95.52 %	95.52 %
Violations of United Nations Global Compact	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises	4.01 % involved in violations	95.52 %	95.52 %

Eligibility: The proportion of the assets in the financial product (relative to NAV), which are in scope for the indicator.

Coverage: The proportion of the assets in the financial product (relative to NAV), where data is available to present the indicator.

● **...and compared to previous periods?**

Sustainability Indicator	Metric	Reference Period	Metric Value	Eligibility	Coverage
Carbon Footprint	Carbon footprint	2022	27 tCO2e / m€ invested	95.52 %	95.52 %
Violations of United Nations Global Compact	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises	2022	4.01 % involved in violations	95.52 %	95.52 %

Eligibility: The proportion of the assets in the financial product (relative to NAV), which are in scope for the indicator.

Coverage: The proportion of the assets in the financial product (relative to NAV), where data is available to present the indicator.

Since no reports covering previous periods are available, this section provides information for the current reporting period only.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The objectives of the sustainable investments that the fund partially made, was to contribute to one or several of the UN SDGs or alternatively be involved in Taxonomy-aligned activities. Sustainable investments contributed to the objectives through the fund's investments in companies that support the UN SDGs or Taxonomy-aligned activities by passing a minimum threshold for revenue alignment with UN SDGs or the EU Taxonomy.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The sustainable investments were screened to ensure that they did not significantly harm any other social or environmental objectives (DNSH test) as defined by the EU Taxonomy or any SDGs as adopted by the UN.

- **How were the indicators for adverse impacts on sustainability factors taken into account?**

Nordea Asset Management (NAM) has developed a proprietary quantitative methodology that assessed the environmental and social impact of NAM's investment universe (direct investments mainly) using multiple principal adverse impact ("PAI") indicators from Table 1 and/or Table 2 and/or Table 3 of Annex 1 of the SFDR RTS (the "PAI tool"). The methodology utilised a diverse range of data sources in order to ensure that investee companies' performance was appropriately analysed. PAI indicators were assessed in NAM's PAI tool and the results were a material part of the DNSH test.

- **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

Alignment of the Sustainable Investments with the OECD guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, was confirmed as part of the process to identify sustainable investments using Nordea Asset Management's PAI tool.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The specific PAI indicators that were taken into consideration for this fund were:

CLIMATE AND OTHER ENVIRONMENT-RELATED INDICATORS

Adverse Sustainability Indicator	Metric	Metric Value	Eligibility	Coverage	
Greenhouse gas "GHG" emissions	GHG emissions	Scope 1 GHG emissions	2,895 tCO ₂ e	95.52 %	95.52 %
		Scope 2 GHG emissions	648 tCO ₂ e	95.52 %	95.52 %

Sustainable investment objective

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

Yes

No

It made **sustainable investments with an environmental objective:** 87 %

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** 21 %

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of ____% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent was the sustainable investment objective of this financial product met?

Sustainability indicators measure how the sustainable objectives of this financial product are attained.

The fund had a sustainable investment objective to create positive impact by investing in companies that are involved in economic activities that contribute substantially to at least one of the objectives of the EU Taxonomy.

The fund used a benchmark which is not aligned with the sustainable objective of the fund.

The EU Taxonomy defines six environmental objectives: climate change mitigation, climate change adaptation, sustainable use and protection of water and marine resources, transition to a circular economy, waste prevention and recycling, pollution prevention and control, protection of healthy ecosystems and lists the economic activities that are considered environmentally sustainable for investment purposes. The alignment of the companies' activities with the objectives of the EU Taxonomy was identified and evaluated to the extent that data was available and of an adequate quality. Depending on the availability of feasible investment opportunities, the fund may have contributed to any of the environmental objectives set out in the Taxonomy Regulation.

● How did the sustainability indicators perform?

Sustainability Indicator	Metric	Metric Value	Eligibility	Coverage
% alignment to EU Taxonomy	Alignment with EU taxonomy is used to measure the share of sustainable investments with an environmental objective that is aligned with the EU Taxonomy	54.03 % alignment to EU taxonomy	97.78 %	97.78 %

Eligibility: The proportion of the assets in the financial product (relative to NAV), which are in scope for the indicator.

Coverage: The proportion of the assets in the financial product (relative to NAV), where data is available to present the indicator.

● ...and compared to previous periods?

Sustainability Indicator	Metric	Reference Period	Metric Value	Eligibility	Coverage
% alignment to EU Taxonomy	Alignment with EU taxonomy is used to measure the share of sustainable investments with an environmental objective that is aligned with the EU Taxonomy	2022	54.03 % alignment to EU taxonomy	97.78 %	97.78 %

Eligibility: The proportion of the assets in the financial product (relative to NAV), which are in scope for the indicator.

Coverage: The proportion of the assets in the financial product (relative to NAV), where data is available to present the indicator.

Since no reports covering previous periods are available, this section provides information for the current reporting period only.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

● ***How did the sustainable investments not cause significant harm to any sustainable investment objective?***

The sustainable investments were screened to ensure that they did not significantly harm any other social or environmental objectives (DNSH test) as defined by the EU Taxonomy or any SDGs as adopted by the UN.

- ***How were the indicators for adverse impacts on sustainability factors taken into account?***

Nordea Asset Management (NAM) has developed a proprietary quantitative methodology that assessed the environmental and social impact of NAM's investment universe (direct investments mainly) using multiple principal adverse impact ("PAI") indicators from Table 1 and/or Table 2 and/or Table 3 of Annex 1 of the SFDR RTS (the "PAI tool"). The methodology utilised a diverse range of data sources in order to ensure that investee companies' performance was appropriately analysed. PAI indicators were assessed in NAM's PAI tool and the results were a material part of the DNSH test.

- ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

Alignment of the Sustainable Investments with the OECD guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, was confirmed as part of the process to identify sustainable investments using Nordea Asset Management's PAI tool.

How did this financial product consider principal adverse impacts on sustainability factors?

The specific PAI indicators that were taken into consideration for this fund were:

CLIMATE AND OTHER ENVIRONMENT-RELATED INDICATORS

Adverse Sustainability Indicator	Metric	Metric Value	Eligibility	Coverage	
Greenhouse gas "GHG" emissions	Scope 1 GHG emissions	1,393 tCO ₂ e	97.78 %	97.78 %

Vinci	Industrial	2.29 %	France
Kingspan Group	Industrial	2.23 %	Ireland
Enel	Utilities	2.18 %	Italy

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

● What was the asset allocation?

The product contains investments with both an environmental and a social objective. A single investment can both contribute to an environmental and a social objective resulting in a total allocation amounting to more than 100 per cent. There is no prioritization of environmental and social objectives, and the strategy does not target any specific allocation or minimum proportion for either of these categories. The investment process accommodates the combination of environmental and social objectives by allowing the investment manager the flexibility to allocate between these based on availability and attractiveness of investment opportunities.

● In which economic sectors were the investments made?

Sector	Assets
Industrial	38.89 %
Utilities	33.19 %
Basic Materials	10.56 %
Technology	5.26 %
Energy	4.77 %
Consumer, Cyclical	3.51 %
Cash	2.22 %
Financial	1.61 %
Sum	100.00 %

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

Assessment on Taxonomy alignment is currently conducted with data from third party providers as well as self-reported data from investee companies when available. Proprietary tools and processes to measure significant harm and minimum social safeguards have been developed.

The methodology applied by the third-party data providers assesses how companies are involved in economic activities that substantially contribute to an environmental objective while not significantly harming other sustainable objectives and meeting minimum social safeguards. Taxonomy-alignment of the investment is based on the percentage of turnover exposed or potentially exposed to taxonomy-aligned activities. Data providers' methodologies vary and results may not be fully aligned as long as publicly reported company data is still lacking and assessments rely largely on equivalent data.

We prioritize the use of self-reported data where available. Where data providers are used to deliver equivalent data, NAM has conducted due diligence on the data provider's methodology.

The compliance of the investments with the EU Taxonomy has not been subject to an assurance by auditors or a review by third parties. Data provider methodologies vary and results may not be fully aligned as long as publicly reported data is still lacking.

● **What was the share of investments made in transitional and enabling activities?**

Type of Activity	Assets
Transitional activities	0.00 %
Enabling activities	0.00 %
Sum	0.00 %

● **How did the percentage of investments aligned with the EU Taxonomy compare with previous reference periods?**

Reference Period	Taxonomy-Aligned Investments
2022	54.03 %

Since no reports covering previous periods are available, this section provides information for the current reporting period only.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 33 %.

What was the share of socially sustainable investments?

The share of socially sustainable investments was 21 %.

What investments were included under "not sustainable", what was their purpose and were there any minimum environmental or social safeguards?

Cash may have been held as ancillary liquidity or for risk balancing purposes. The fund may have used derivatives and other techniques for the purposes described in the 'Fund Descriptions' in the prospectus. This category may also have included securities for which relevant data is not available. Such investments were assessed to ensure that they live up to minimum social safeguards.

What actions have been taken to attain the sustainable investment objective during the reference period?

The binding elements of the investment strategy used to select the investments to attain the sustainable investment objective by this fund have been monitored and documented on an ongoing basis.

ANNEX V

Template periodic disclosure for the financial products referred to in Article 9, paragraphs 1 to 4a, of Regulation (EU) 2019/2088 and Article 5, first paragraph, of Regulation (EU) 2020/852

Product name: Nordea 1 - Global Gender Diversity Fund

Legal entity identifier: 549300CYWEG7M5HTOM84

Sustainable investment objective

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

Yes

No

It made **sustainable investments with an environmental objective:** 84 %

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** 87 %

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of ____% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent was the sustainable investment objective of this financial product met?

Sustainability indicators measure how the sustainable objectives of this financial product are attained.

The fund had a sustainable objective to create positive social impact, by investing in companies that contribute to selected UN SDGs that relate to diversity and equality.

The fund used a benchmark which is not aligned with the sustainable objective of the fund.

● *How did the sustainability indicators perform?*

Sustainability Indicator	Metric	Metric Value	Eligibility	Coverage
SDG 5 - Gender Equality	Achieve gender equality and empower all women and girls	0.18 % of financed revenue	97.45 %	97.23 %
Executive level diversity	Average percentage of female at executive level in investee companies	31.60 % of total	91.84 %	89.79 %
Board gender diversity	Average ratio of female to male board members in investee companies, expressed as a percentage of all board members	36.77 % (female directors / total directors)	97.65 %	97.65 %

Eligibility: The proportion of the assets in the financial product (relative to NAV), which are in scope for the indicator.

Coverage: The proportion of the assets in the financial product (relative to NAV), where data is available to present the indicator.

Sustainable investment objective

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

Yes

No

It made **sustainable investments with an environmental objective:** 92 %

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** 31 %

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of ____% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent was the sustainable investment objective of this financial product met?

Sustainability indicators measure how the sustainable objectives of this financial product are attained.

The fund had a sustainable investment objective to create positive environmental impact by investing at least 70% of its assets in green bonds. The remaining part of the fund's assets was invested in other bonds that are considered sustainable, including conventional bonds from issuers whose economic activities are environmentally sustainable for investment purposes. The fund also made a minimum of 15% sustainable investments with a social objective.

The fund used a benchmark which is not aligned with the sustainable objective of the fund.

● How did the sustainability indicators perform?

Sustainability Indicator	Metric	Metric Value	Eligibility	Coverage
% of AuM invested in bonds complying with Green Bond Principles / Climate Bonds Initiative / EU Green Bond Standard	% of AuM invested in bonds complying with Green Bond Principles / Climate Bonds Initiative / EU Green Bond Standard	73.84 % of Assets Under Management	93.18 %	93.18 %

Eligibility: The proportion of the assets in the financial product (relative to NAV), which are in scope for the indicator.

Coverage: The proportion of the assets in the financial product (relative to NAV), where data is available to present the indicator.

● ...and compared to previous periods?

Sustainability Indicator	Metric	Reference Period	Metric Value	Eligibility	Coverage
% of AuM invested in bonds complying with Green Bond Principles / Climate Bonds Initiative / EU Green Bond Standard	% of AuM invested in bonds complying with Green Bond Principles / Climate Bonds Initiative / EU Green Bond Standard	2022	73.84 % of Assets Under Management	93.18 %	93.18 %

Eligibility: The proportion of the assets in the financial product (relative to NAV), which are in scope for the indicator.

Coverage: The proportion of the assets in the financial product (relative to NAV), where data is available to present the indicator.

Since no reports covering previous periods are available, this section provides information for the current reporting period only.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

● ***How did the sustainable investments not cause significant harm to any sustainable investment objective?***

The sustainable investments were screened to ensure that they did not significantly harm any other social or environmental objectives (DNSH test) as defined by the EU Taxonomy or any SDGs as adopted by the UN.

- ***How were the indicators for adverse impacts on sustainability factors taken into account?***

Nordea Asset Management (NAM) has developed a proprietary quantitative methodology that assessed the environmental and social impact of NAM's investment universe (direct investments mainly) using multiple principal adverse impact ("PAI") indicators from Table 1 and/or Table 2 and/or Table 3 of Annex 1 of the SFDR RTS (the "PAI tool"). The methodology utilised a diverse range of data sources in order to ensure that investee companies' performance was appropriately analysed. PAI indicators were assessed in NAM's PAI tool and the results were a material part of the DNSH test.

- ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

Alignment of the Sustainable Investments with the OECD guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, was confirmed as part of the process to identify sustainable investments using Nordea Asset Management's PAI tool.

How did this financial product consider principal adverse impacts on sustainability factors?

The specific PAI indicators that were taken into consideration for this fund were:

CLIMATE AND OTHER ENVIRONMENT-RELATED INDICATORS

Adverse Sustainability Indicator	Metric	Metric Value	Eligibility	Coverage	
Greenhouse gas "GHG" emissions	Scope 1 GHG emissions	10,543 tCO ₂ e	76.11 %	66.41 %

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

● What was the asset allocation?

#1 Sustainable covers sustainable investments with environmental or social objectives.

#2 Not Sustainable includes investments which do not qualify as sustainable investments.

The product contains investments with both an environmental and a social objective. A single investment can both contribute to an environmental and a social objective resulting in a total allocation amounting to more than 100 per cent. There is no prioritization of environmental and social objectives, and the strategy does not target any specific allocation or minimum proportion for either of these categories. The investment process accommodates the combination of environmental and social objectives by allowing the investment manager the flexibility to allocate between these based on availability and attractiveness of investment opportunities.

● In which economic sectors were the investments made?

Sector	Assets
Financial	42.67 %
Government bonds	25.93 %
Utilities	10.64 %
Energy	5.85 %
Industrial	4.00 %
Basic Materials	3.67 %
Cash	3.42 %
Communications	1.58 %
Consumer, Non-cyclical	1.14 %
Technology	0.85 %
Derivatives	0.30 %
FX Forwards	-0.06 %
Sum	100.00 %

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 92 %.

What was the share of socially sustainable investments?

The share of socially sustainable investments was 31 %.

What investments were included under "not sustainable", what was their purpose and were there any minimum environmental or social safeguards?

Cash may have been held as ancillary liquidity or for risk balancing purposes. The fund may have used derivatives and other techniques for the purposes described in the 'Fund Descriptions' in the prospectus. This category may also have included securities for which relevant data is not available. Such investments were assessed to ensure that they live up to minimum social safeguards.

What actions have been taken to attain the sustainable investment objective during the reference period?

The binding elements of the investment strategy used to select the investments to attain the sustainable investment objective by this fund have been monitored and documented on an ongoing basis.

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Nordea 1 - Global Listed infrastructure Fund

Legal entity identifier: 5493004U7E2YIFAGEE77

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

Yes

No

It made **sustainable investments with an environmental objective:** _____%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** _____%

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 87 % of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The E/S characteristics of this fund included:

Sustainable investments Although the fund has not committed to make any sustainable investments, the fund partly invested in sustainable investments, which means companies and issuers involved in activities that contribute to an environmental or social objective as outlined in the 17 UN Sustainable Development Goals (SDGs) and/or the EU Taxonomy, while not significantly harming any other environmental or social objectives.

Sector- and value-based exclusions Exclusion filters were applied to the portfolio construction process to restrict investments in companies and issuers with material exposure to certain activities deemed to be detrimental to the environment or the society at large, including tobacco companies and fossil fuel companies.

Nordea Asset Management's Paris-Aligned Fossil Fuel policy whereby the fund did not invest in companies that have significant exposure to fossil fuels unless they have a credible transition strategy.

The fund used a benchmark that is not aligned with the fund's E/S characteristics.

● How did the sustainability indicators perform?

Sustainability Indicator	Metric	Metric Value	Eligibility	Coverage
Carbon Footprint	Carbon footprint	241 tCO ₂ e / m€ invested	98.49 %	97.42 %
Violations of United Nations Global Compact	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises	0.00 % involved in violations	98.49 %	98.49 %

Eligibility: The proportion of the assets in the financial product (relative to NAV), which are in scope for the indicator.

Coverage: The proportion of the assets in the financial product (relative to NAV), where data is available to present the indicator.

● **...and compared to previous periods?**

Sustainability Indicator	Metric	Reference Period	Metric Value	Eligibility	Coverage
Carbon Footprint	Carbon footprint	2022	241 tCO ₂ e / m€ invested	98.49 %	97.42 %
Violations of United Nations Global Compact	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises	2022	0.00 % involved in violations	98.49 %	98.49 %

Eligibility: The proportion of the assets in the financial product (relative to NAV), which are in scope for the indicator.

Coverage: The proportion of the assets in the financial product (relative to NAV), where data is available to present the indicator.

Since no reports covering previous periods are available, this section provides information for the current reporting period only.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The objectives of the sustainable investments that the fund partially made, was to contribute to one or several of the UN SDGs or alternatively be involved in Taxonomy-aligned activities. Sustainable investments contributed to the objectives through the fund's investments in companies that support the UN SDGs or Taxonomy-aligned activities by passing a minimum threshold for revenue alignment with UN SDGs or the EU Taxonomy.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The sustainable investments were screened to ensure that they did not significantly harm any other social or environmental objectives (DNSH test) as defined by the EU Taxonomy or any SDGs as adopted by the UN.

- **How were the indicators for adverse impacts on sustainability factors taken into account?**

Nordea Asset Management (NAM) has developed a proprietary quantitative methodology that assessed the environmental and social impact of NAM's investment universe (direct investments mainly) using multiple principal adverse impact ("PAI") indicators from Table 1 and/or Table 2 and/or Table 3 of Annex 1 of the SFDR RTS (the "PAI tool"). The methodology utilised a diverse range of data sources in order to ensure that investee companies' performance was appropriately analysed. PAI indicators were assessed in NAM's PAI tool and the results were a material part of the DNSH test.

- **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

Alignment of the Sustainable Investments with the OECD guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, was confirmed as part of the process to identify sustainable investments using Nordea Asset Management's PAI tool.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The specific PAI indicators that were taken into consideration for this fund were:

CLIMATE AND OTHER ENVIRONMENT-RELATED INDICATORS

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

● What was the asset allocation?

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

The product contains investments with both an environmental and a social objective. A single investment can both contribute to an environmental and a social objective resulting in a total allocation amounting to more than 100 per cent. There is no prioritization of environmental and social objectives, and the strategy does not target any specific allocation or minimum proportion for either of these categories. The investment process accommodates the combination of environmental and social objectives by allowing the investment manager the flexibility to allocate between these based on availability and attractiveness of investment opportunities.

● **In which economic sectors were the investments made?**

Cash	1.40 %
Communications	1.33 %
Energy	0.47 %
Sum	100.00 %

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 84 %.

What was the share of socially sustainable investments?

The share of socially sustainable investments was 75 %.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Cash may have been held as ancillary liquidity or for risk balancing purposes. The fund may have used derivatives and other techniques for the purposes described in the 'Fund Descriptions' in the prospectus. This category may also have included securities for which relevant data is not available.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this fund have been monitored and documented on an ongoing basis.

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Nordea 1 - Global Opportunity Fund

Legal entity identifier: 5493007ZLSPI26CQLO03

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

Yes

No

It made **sustainable investments with an environmental objective:** _____%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** _____%

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 76 % of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The E/S characteristics of this fund included:

Minimum proportion of sustainable investments The fund partly invested in sustainable investments, which means companies and issuers involved in activities that contribute to an environmental or social objective as outlined in the 17 UN Sustainable Development Goals (SDGs) and/or the EU Taxonomy, while not significantly harming any other environmental or social objectives.

Sector- and value-based exclusions Exclusion filters were applied to the portfolio construction process to restrict investments in companies and issuers with material exposure to certain activities deemed to be detrimental to the environment or the society at large, including tobacco companies and fossil fuel companies.

Nordea Asset Management's Paris-Aligned Fossil Fuel policy whereby the fund did not invest in companies that have significant exposure to fossil fuels unless they have a credible transition strategy.

The fund used a benchmark that is not aligned with the fund's E/S characteristics.

● How did the sustainability indicators perform?

Sustainability Indicator	Metric	Metric Value	Eligibility	Coverage
Carbon Footprint	Carbon footprint	13 tCO ₂ e / m€ invested	99.10 %	99.10 %
Violations of United Nations Global Compact	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises	4.11 % involved in violations	99.10 %	99.10 %

Eligibility: The proportion of the assets in the financial product (relative to NAV), which are in scope for the indicator.

Coverage: The proportion of the assets in the financial product (relative to NAV), where data is available to present the indicator.

● **...and compared to previous periods?**

Sustainability Indicator	Metric	Reference Period	Metric Value	Eligibility	Coverage
Carbon Footprint	Carbon footprint	2022	13 tCO ₂ e / m€ invested	99.10 %	99.10 %
Violations of United Nations Global Compact	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises	2022	4.11 % involved in violations	99.10 %	99.10 %

Eligibility: The proportion of the assets in the financial product (relative to NAV), which are in scope for the indicator.

Coverage: The proportion of the assets in the financial product (relative to NAV), where data is available to present the indicator.

Since no reports covering previous periods are available, this section provides information for the current reporting period only.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The objectives of the sustainable investments that the fund partially made, was to contribute to one or several of the UN SDGs or alternatively be involved in Taxonomy-aligned activities. Sustainable investments contributed to the objectives through the fund's investments in companies that support the UN SDGs or Taxonomy-aligned activities by passing a minimum threshold for revenue alignment with UN SDGs or the EU Taxonomy.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The sustainable investments were screened to ensure that they did not significantly harm any other social or environmental objectives (DNSH test) as defined by the EU Taxonomy or any SDGs as adopted by the UN.

- **How were the indicators for adverse impacts on sustainability factors taken into account?**

Nordea Asset Management (NAM) has developed a proprietary quantitative methodology that assessed the environmental and social impact of NAM's investment universe (direct investments mainly) using multiple principal adverse impact ("PAI") indicators from Table 1 and/or Table 2 and/or Table 3 of Annex 1 of the SFDR RTS (the "PAI tool"). The methodology utilised a diverse range of data sources in order to ensure that investee companies' performance was appropriately analysed. PAI indicators were assessed in NAM's PAI tool and the results were a material part of the DNSH test.

- **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

Alignment of the Sustainable Investments with the OECD guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, was confirmed as part of the process to identify sustainable investments using Nordea Asset Management's PAI tool.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The specific PAI indicators that were taken into consideration for this fund were:

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

● What was the asset allocation?

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

The product contains investments with both an environmental and a social objective. A single investment can both contribute to an environmental and a social objective resulting in a total allocation amounting to more than 100 per cent. There is no prioritization of environmental and social objectives, and the strategy does not target any specific allocation or minimum proportion for either of these categories. The investment process accommodates the combination of environmental and social objectives by allowing the investment manager the flexibility to allocate between these based on availability and attractiveness of investment opportunities.

● **In which economic sectors were the investments made?**

Sector	Assets
Technology	27.56 %
Consumer, Non-cyclical	18.42 %
Consumer, Cyclical	14.19 %
Communications	13.72 %
Financial	11.41 %
Industrial	7.24 %
Basic Materials	6.62 %
Cash	0.83 %
Sum	100.00 %

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 65 %.

What was the share of socially sustainable investments?

The share of socially sustainable investments was 68 %.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

Cash may have been held as ancillary liquidity or for risk balancing purposes. The fund may have used derivatives and other techniques for the purposes described in the ‘Fund Descriptions’ in the prospectus. This category may also have included securities for which relevant data is not available.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this fund have been monitored and documented on an ongoing basis.

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Nordea 1 - Global Portfolio Fund

Legal entity identifier: 549300IV7X5KFCXHUU46

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

Yes

No

It made **sustainable investments with an environmental objective:** ____%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** ____%

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 69 % of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The E/S characteristics of this fund included:

Sustainable investments Although the fund has not committed to make any sustainable investments, the fund partly invested in sustainable investments, which means companies and issuers involved in activities that contribute to an environmental or social objective as outlined in the 17 UN Sustainable Development Goals (SDGs) and/or the EU Taxonomy, while not significantly harming any other environmental or social objectives.

Sector- and value-based exclusions Exclusion filters were applied to the portfolio construction process to restrict investments in companies and issuers with material exposure to certain activities deemed to be detrimental to the environment or the society at large, including tobacco companies and fossil fuel companies.

Nordea Asset Management's Paris-Aligned Fossil Fuel policy whereby the fund did not invest in companies that have significant exposure to fossil fuels unless they have a credible transition strategy.

The fund used a benchmark that is not aligned with the fund's E/S characteristics.

● How did the sustainability indicators perform?

Sustainability Indicator	Metric	Metric Value	Eligibility	Coverage
Carbon Footprint	Carbon footprint	33 tCO ₂ e / m€ invested	97.65 %	97.65 %
Violations of United Nations Global Compact	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises	3.75 % involved in violations	97.65 %	97.65 %

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Nordea 1 - Global Real Estate Fund

Legal entity identifier: 549300E0SPFUFDAIG67

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

Yes

No

It made **sustainable investments with an environmental objective:** _____%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** _____%

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 82 % of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The E/S characteristics of this fund included:

Sustainable investments Although the fund has not committed to make any sustainable investments, the fund partly invested in sustainable investments, which means companies and issuers involved in activities that contribute to an environmental or social objective as outlined in the 17 UN Sustainable Development Goals (SDGs) and/or the EU Taxonomy, while not significantly harming any other environmental or social objectives.

ESG scoring The fund invested in securities issued by entities whose ESG profiles have been scored by Nordea Asset Management, or by an external data provider, to ensure that only securities issued by entities that met the minimum required ESG score for the fund were eligible for inclusion.

Sector- and value-based exclusions Exclusion filters were applied to the portfolio construction process to restrict investments in companies and issuers with material exposure to certain activities deemed to be detrimental to the environment or the society at large, including tobacco companies and fossil fuel companies.

Nordea Asset Management's Paris-Aligned Fossil Fuel policy whereby the fund did not invest in companies that have significant exposure to fossil fuels unless they have a credible transition strategy.

The fund used a benchmark that is not aligned with the fund's E/S characteristics.

● How did the sustainability indicators perform?

Sustainability Indicator	Metric	Metric Value	Eligibility	Coverage
Carbon Footprint	Carbon footprint	7 tCO ₂ e / m€ invested	99.32 %	99.32 %
Violations of United Nations Global Compact	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises	0.00 % involved in violations	99.32 %	98.11 %

Eligibility: The proportion of the assets in the financial product (relative to NAV), which are in scope for the indicator.

Coverage: The proportion of the assets in the financial product (relative to NAV), where data is available to present the indicator.

● **...and compared to previous periods?**

Sustainability Indicator	Metric	Reference Period	Metric Value	Eligibility	Coverage
Carbon Footprint	Carbon footprint	2022	7 tCO ₂ e / m€ invested	99.32 %	99.32 %
Violations of United Nations Global Compact	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises	2022	0.00 % involved in violations	99.32 %	98.11 %

Eligibility: The proportion of the assets in the financial product (relative to NAV), which are in scope for the indicator.

Coverage: The proportion of the assets in the financial product (relative to NAV), where data is available to present the indicator.

Since no reports covering previous periods are available, this section provides information for the current reporting period only.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The objectives of the sustainable investments that the fund partially made, was to contribute to one or several of the UN SDGs or alternatively be involved in Taxonomy-aligned activities. Sustainable investments contributed to the objectives through the fund's investments in companies that support the UN SDGs or Taxonomy-aligned activities by passing a minimum threshold for revenue alignment with UN SDGs or the EU Taxonomy.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The sustainable investments were screened to ensure that they did not significantly harm any other social or environmental objectives (DNSH test) as defined by the EU Taxonomy or any SDGs as adopted by the UN.

- **How were the indicators for adverse impacts on sustainability factors taken into account?**

Nordea Asset Management (NAM) has developed a proprietary quantitative methodology that assessed the environmental and social impact of NAM's investment universe (direct investments mainly) using multiple principal adverse impact ("PAI") indicators from Table 1 and/or Table 2 and/or Table 3 of Annex 1 of the SFDR RTS (the "PAI tool"). The methodology utilised a diverse range of data sources in order to ensure that investee companies' performance was appropriately analysed. PAI indicators were assessed in NAM's PAI tool and the results were a material part of the DNSH test.

- **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

Alignment of the Sustainable Investments with the OECD guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, was confirmed as part of the process to identify sustainable investments using Nordea Asset Management's PAI tool.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The specific PAI indicators that were taken into consideration for this fund were:

CLIMATE AND OTHER ENVIRONMENT-RELATED INDICATORS

Adverse Sustainability Indicator	Metric	Metric Value	Eligibility	Coverage

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

● What was the asset allocation?

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

The product contains investments with both an environmental and a social objective. A single investment can both contribute to an environmental and a social objective resulting in a total allocation amounting to more than 100 per cent. There is no prioritization of environmental and social objectives, and the strategy does not target any specific allocation or minimum proportion for either of these categories. The investment process accommodates the combination of environmental and social objectives by allowing the investment manager the flexibility to allocate between these based on availability and attractiveness of investment opportunities.

● In which economic sectors were the investments made?

Sector	Assets
Financial	98.11 %
Cash	1.11 %
Communications	0.78 %
Sum	100.00 %

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 77 %.

What was the share of socially sustainable investments?

The share of socially sustainable investments was 79 %.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Cash may have been held as ancillary liquidity or for risk balancing purposes. The fund may have used derivatives and other techniques for the purposes described in the 'Fund Descriptions' in the prospectus. This category may also have included securities for which relevant data is not available.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this fund have been monitored and documented on an ongoing basis.

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Nordea 1 - Global Small Cap Fund

Legal entity identifier: 549300WUFX1G5UGCGP20

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

Yes

No

It made **sustainable investments with an environmental objective:** _____%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** _____%

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 42 % of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The E/S characteristics of this fund included:

Sustainable investments Although the fund has not committed to make any sustainable investments, the fund partly invested in sustainable investments, which means companies and issuers involved in activities that contribute to an environmental or social objective as outlined in the 17 UN Sustainable Development Goals (SDGs) and/or the EU Taxonomy, while not significantly harming any other environmental or social objectives.

Sector- and value-based exclusions Exclusion filters were applied to the portfolio construction process to restrict investments in companies and issuers with material exposure to certain activities deemed to be detrimental to the environment or the society at large, including tobacco companies and fossil fuel companies.

Nordea Asset Management's Paris-Aligned Fossil Fuel policy whereby the fund did not invest in companies that have significant exposure to fossil fuels unless they have a credible transition strategy.

The fund used a benchmark that is not aligned with the fund's E/S characteristics.

● How did the sustainability indicators perform?

Sustainability Indicator	Metric	Metric Value	Eligibility	Coverage
Carbon Footprint	Carbon footprint	38 tCO ₂ e / m€ invested	98.07 %	92.99 %
Violations of United Nations Global Compact	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises	0.00 % involved in violations	98.07 %	95.67 %

Eligibility: The proportion of the assets in the financial product (relative to NAV), which are in scope for the indicator.

Coverage: The proportion of the assets in the financial product (relative to NAV), where data is available to present the indicator.

● **...and compared to previous periods?**

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

● What was the asset allocation?

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

The product contains investments with both an environmental and a social objective. A single investment can both contribute to an environmental and a social objective resulting in a total allocation amounting to more than 100 per cent. There is no prioritization of environmental and social objectives, and the strategy does not target any specific allocation or minimum proportion for either of these categories. The investment process accommodates the combination of environmental and social objectives by allowing the investment manager the flexibility to allocate between these based on availability and attractiveness of investment opportunities.

● **In which economic sectors were the investments made?**

Sum	100.00 %

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 35 %.

What was the share of socially sustainable investments?

The share of socially sustainable investments was 35 %.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Cash may have been held as ancillary liquidity or for risk balancing purposes. The fund may have used derivatives and other techniques for the purposes described in the 'Fund Descriptions' in the prospectus. This category may also have included securities for which relevant data is not available.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this fund have been monitored and documented on an ongoing basis.

ANNEX V

Template periodic disclosure for the financial products referred to in Article 9, paragraphs 1 to 4a, of Regulation (EU) 2019/2088 and Article 5, first paragraph, of Regulation (EU) 2020/852

Product name: Nordea 1 - Global Social Bond Fund

Legal entity identifier: 5493004IMYMC8GBWWX21

Sustainable investment objective

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

Yes

No

It made **sustainable investments with an environmental objective:** 15 %

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** 93 %

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of ____% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent was the sustainable investment objective of this financial product met?

Sustainability indicators measure how the sustainable objectives of this financial product are attained.

The fund had a sustainable objective to create positive social impact by investing at least 70% of its assets in social bonds. The remaining part of the fund's assets was invested in other bonds that are considered sustainable, including conventional bonds from issuers whose economic activities are socially sustainable for investment purposes. The fund also made a minimum of 15% sustainable investments with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy.

The fund used a benchmark which is not aligned with the sustainable objective of the fund.

● How did the sustainability indicators perform?

Sustainability Indicator	Metric	Metric Value	Eligibility	Coverage
% of AUM invested in bonds complying with the ICMA or similar Social Bond Principles Standard	Green Bond Principles, Social Bond Principles, Sustainability Bond Guidelines and Sustainability-Linked Bond Principles measure the share of investments that are aligned with standards set by the International Capital Market Association (ICMA). Alignment with Climate Bonds Initiative is used to measure the share of investments that are aligned with standards set by the Climate Bonds Initiative which is an international organization working on mobilizing global capital for climate actions via climate bond standards, certified scheme, policy engagement and market intelligence work.	81.01 % of Asset under Management	96.33 %	96.33 %

Eligibility: The proportion of the assets in the financial product (relative to NAV), which are in scope for the indicator.

Coverage: The proportion of the assets in the financial product (relative to NAV), where data is available to present the indicator.

Sustainability Indicator	Metric	Reference Period	Metric Value	Eligibility	Coverage
% of AUM invested in bonds complying with the ICMA or similar Social Bond Principles Standard	Green Bond Principles, Social Bond Principles, Sustainability Bond Guidelines and Sustainability-Linked Bond Principles measure the share of investments that are aligned with standards set by the International Capital Market Association (ICMA). Alignment with Climate Bonds Initiative is used to measure the share of investments that are aligned with standards set by the Climate Bonds Initiative which is an international organization working on mobilizing global capital for climate actions via climate bond standards, certified scheme, policy engagement and market intelligence work.	2022	81.01 % of Asset under Management	96.33 %	96.33 %

Eligibility: The proportion of the assets in the financial product (relative to NAV), which are in scope for the indicator.

Coverage: The proportion of the assets in the financial product (relative to NAV), where data is available to present the indicator.

Since no reports covering previous periods are available, this section provides information for the current reporting period only.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

● ***How did the sustainable investments not cause significant harm to any sustainable investment objective?***

The sustainable investments were screened to ensure that they did not significantly harm any other social or environmental objectives (DNSH test) as defined by the EU Taxonomy or any SDGs as adopted by the UN.

- ***How were the indicators for adverse impacts on sustainability factors taken into account?***

Nordea Asset Management (NAM) has developed a proprietary quantitative methodology that assessed the environmental and social impact of NAM's investment universe (direct investments mainly) using multiple principal adverse impact ("PAI") indicators from Table 1 and/or Table 2 and/or Table 3 of Annex 1 of the SFDR RTS (the "PAI tool"). The methodology utilised a diverse range of data sources in order to ensure that investee companies' performance was appropriately analysed. PAI indicators were assessed in NAM's PAI tool and the results were a material part of the DNSH test.

- ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

Alignment of the Sustainable Investments with the OECD guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, was confirmed as part of the process to identify sustainable investments using Nordea Asset Management's PAI tool.

How did this financial product consider principal adverse impacts on sustainability factors?

The specific PAI indicators that were taken into consideration for this fund were:

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

● What was the asset allocation?

#1 Sustainable covers sustainable investments with environmental or social objectives.

#2 Not Sustainable includes investments which do not qualify as sustainable investments.

The product contains investments with both an environmental and a social objective. A single investment can both contribute to an environmental and a social objective resulting in a total allocation amounting to more than 100 per cent. There is no prioritization of environmental and social objectives, and the strategy does not target any specific allocation or minimum proportion for either of these categories. The investment process accommodates the combination of environmental and social objectives by allowing the investment manager the flexibility to allocate between these based on availability and attractiveness of investment opportunities.

● In which economic sectors were the investments made?

Sector	Assets
Government bonds	41.71 %
Financial	32.14 %
Consumer, Non-cyclical	10.52 %
Cash	6.60 %
Communications	4.95 %
Technology	1.95 %
Industrial	0.95 %
Utilities	0.95 %
FX Forwards	0.22 %
Sum	100.00 %

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 15 %.

What was the share of socially sustainable investments?

The share of socially sustainable investments was 93 %.

What investments were included under "not sustainable", what was their purpose and were there any minimum environmental or social safeguards?

Cash may have been held as ancillary liquidity or for risk balancing purposes. The fund may have used derivatives and other techniques for the purposes described in the 'Fund Descriptions' in the prospectus. This category may also have included securities for which relevant data is not available. Such investments were assessed to ensure that they live up to minimum social safeguards.

What actions have been taken to attain the sustainable investment objective during the reference period?

The binding elements of the investment strategy used to select the investments to attain the sustainable investment objective by this fund have been monitored and documented on an ongoing basis.

ANNEX V

Template periodic disclosure for the financial products referred to in Article 9, paragraphs 1 to 4a, of Regulation (EU) 2019/2088 and Article 5, first paragraph, of Regulation (EU) 2020/852

Product name: Nordea 1 - Global Social Empowerment Fund

Legal entity identifier: 549300DN1QTCPEQWW22

Sustainable investment objective

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

Yes

No

It made **sustainable investments with an environmental objective:** 77 %

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** 92 %

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of ____% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent was the sustainable investment objective of this financial product met?

Sustainability indicators measure how the sustainable objectives of this financial product are attained.

The fund had a sustainable objective to create positive social impact by investing in companies that contribute to selected UN SDGs that relate to social issues.

The fund used a benchmark which is not aligned with the sustainable objective of the fund.

● *How did the sustainability indicators perform?*

Sustainability Indicator	Metric	Metric Value	Eligibility	Coverage
SDG 3 - Good Health and Well-being	Ensure healthy lives and promote well-being for all at all ages	26.47 % of financed revenue	98.13 %	98.13 %
SDG 6 - Clean Water and Sanitation	Ensure availability and sustainable management of water and sanitation for all	15.78 % of financed revenue	98.13 %	98.13 %
SDG 9 - Industry, Innovation and Infrastructure	Build resilient infrastructure, promote inclusive and sustainable industrialization and foster innovation	23.91 % of financed revenue	98.13 %	97.12 %

Eligibility: The proportion of the assets in the financial product (relative to NAV), which are in scope for the indicator.

Coverage: The proportion of the assets in the financial product (relative to NAV), where data is available to present the indicator.

● **...and compared to previous periods?**

ANNEX V

Template periodic disclosure for the financial products referred to in Article 9, paragraphs 1 to 4a, of Regulation (EU) 2019/2088 and Article 5, first paragraph, of Regulation (EU) 2020/852

Product name: Nordea 1 - Global Social Solutions Fund

Legal entity identifier: 549300MIQ11L48WP8M30

Sustainable investment objective

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

Yes

No

It made **sustainable investments with an environmental objective:** 82 %

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** 94 %

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of ____% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent was the sustainable investment objective of this financial product met?

Sustainability indicators measure how the sustainable objectives of this financial product are attained.

The fund had a sustainable objective to create positive social impact by investing in companies that contribute to selected UN SDGs that relate to social issues.

The fund used a benchmark which is not aligned with the sustainable objective of the fund.

● How did the sustainability indicators perform?

Sustainability Indicator	Metric	Metric Value	Eligibility	Coverage
SDG 3 - Good Health and Well-being	Ensure healthy lives and promote well-being for all at all ages	28.60 % of financed revenue	97.61 %	97.03 %
SDG 8 - Decent Work and Economic Growth	Promote sustained and sustainable economic growth, full and productive employment and decent work for all	10.85 % of financed revenue	97.61 %	95.68 %
SDG 9 - Industry, Innovation and Infrastructure	Build resilient infrastructure, promote inclusive and sustainable industrialization and foster innovation	18.43 % of financed revenue	97.61 %	95.68 %
SDG 11 - Sustainable Cities and Communities	Make cities and human settlements inclusive, safe, resilient and sustainable	9.46 % of financed revenue	97.61 %	97.03 %

Eligibility: The proportion of the assets in the financial product (relative to NAV), which are in scope for the indicator.

Coverage: The proportion of the assets in the financial product (relative to NAV), where data is available to present the indicator.

● **...and compared to previous periods?**

Allstate	Financial	2.36 %	United States

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

● What was the asset allocation?

The product contains investments with both an environmental and a social objective. A single investment can both contribute to an environmental and a social objective resulting in a total allocation amounting to more than 100 per cent. There is no prioritization of environmental and social objectives, and the strategy does not target any specific allocation or minimum proportion for either of these categories. The investment process accommodates the combination of environmental and social objectives by allowing the investment manager the flexibility to allocate between these based on availability and attractiveness of investment opportunities.

● In which economic sectors were the investments made?

Sector	Assets
Consumer, Non-cyclical	35.55 %
Financial	25.09 %
Industrial	15.72 %
Communications	12.05 %
Technology	5.39 %
Cash	2.39 %
Utilities	2.26 %
Consumer, Cyclical	1.54 %
Sum	100.00 %

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 82 %.

What was the share of socially sustainable investments?

The share of socially sustainable investments was 94 %.

What investments were included under "not sustainable", what was their purpose and were there any minimum environmental or social safeguards?

Cash may have been held as ancillary liquidity or for risk balancing purposes. The fund may have used derivatives and other techniques for the purposes described in the 'Fund Descriptions' in the prospectus. This category may also have included securities for which relevant data is not available. Such investments were assessed to ensure that they live up to minimum social safeguards.

What actions have been taken to attain the sustainable investment objective during the reference period?

The binding elements of the investment strategy used to select the investments to attain the sustainable investment objective by this fund have been monitored and documented on an ongoing basis.

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Nordea 1 - Global Stable Equity Fund

Legal entity identifier: 549300OYMIP4UL664L36

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

Yes

No

It made **sustainable investments with an environmental objective:** ____%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** ____%

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 79 % of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The E/S characteristics of this fund included:

Sustainable investments Although the fund has not committed to make any sustainable investments, the fund partly invested in sustainable investments, which means companies and issuers involved in activities that contribute to an environmental or social objective as outlined in the 17 UN Sustainable Development Goals (SDGs) and/or the EU Taxonomy, while not significantly harming any other environmental or social objectives.

Sector- and value-based exclusions Exclusion filters were applied to the portfolio construction process to restrict investments in companies and issuers with material exposure to certain activities deemed to be detrimental to the environment or the society at large, including tobacco companies and fossil fuel companies.

Nordea Asset Management's Paris-Aligned Fossil Fuel policy whereby the fund did not invest in companies that have significant exposure to fossil fuels unless they have a credible transition strategy.

The fund used a benchmark that is not aligned with the fund's E/S characteristics.

● How did the sustainability indicators perform?

Sustainability Indicator	Metric	Metric Value	Eligibility	Coverage
Carbon Footprint	Carbon footprint	34 tCO ₂ e / m€ invested	98.24 %	98.24 %
Violations of United Nations Global Compact	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises	0.00 % involved in violations	98.24 %	98.24 %

Eligibility: The proportion of the assets in the financial product (relative to NAV), which are in scope for the indicator.

Coverage: The proportion of the assets in the financial product (relative to NAV), where data is available to present the indicator.

● **...and compared to previous periods?**

Sustainability Indicator	Metric	Reference Period	Metric Value	Eligibility	Coverage
Carbon Footprint	Carbon footprint	2022	34 tCO ₂ e / m€ invested	98.24 %	98.24 %
Violations of United Nations Global Compact	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises	2022	0.00 % involved in violations	98.24 %	98.24 %

Eligibility: The proportion of the assets in the financial product (relative to NAV), which are in scope for the indicator.

Coverage: The proportion of the assets in the financial product (relative to NAV), where data is available to present the indicator.

Since no reports covering previous periods are available, this section provides information for the current reporting period only.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The objectives of the sustainable investments that the fund partially made, was to contribute to one or several of the UN SDGs or alternatively be involved in Taxonomy-aligned activities. Sustainable investments contributed to the objectives through the fund's investments in companies that support the UN SDGs or Taxonomy-aligned activities by passing a minimum threshold for revenue alignment with UN SDGs or the EU Taxonomy.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The sustainable investments were screened to ensure that they did not significantly harm any other social or environmental objectives (DNSH test) as defined by the EU Taxonomy or any SDGs as adopted by the UN.

- **How were the indicators for adverse impacts on sustainability factors taken into account?**

Nordea Asset Management (NAM) has developed a proprietary quantitative methodology that assessed the environmental and social impact of NAM's investment universe (direct investments mainly) using multiple principal adverse impact ("PAI") indicators from Table 1 and/or Table 2 and/or Table 3 of Annex 1 of the SFDR RTS (the "PAI tool"). The methodology utilised a diverse range of data sources in order to ensure that investee companies' performance was appropriately analysed. PAI indicators were assessed in NAM's PAI tool and the results were a material part of the DNSH test.

- **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

Alignment of the Sustainable Investments with the OECD guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, was confirmed as part of the process to identify sustainable investments using Nordea Asset Management's PAI tool.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The specific PAI indicators that were taken into consideration for this fund were:

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

● What was the asset allocation?

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

The product contains investments with both an environmental and a social objective. A single investment can both contribute to an environmental and a social objective resulting in a total allocation amounting to more than 100 per cent. There is no prioritization of environmental and social objectives, and the strategy does not target any specific allocation or minimum proportion for either of these categories. The investment process accommodates the combination of environmental and social objectives by allowing the investment manager the flexibility to allocate between these based on availability and attractiveness of investment opportunities.

● **In which economic sectors were the investments made?**

Sector	Assets
Consumer, Non-cyclical	37.48 %

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

● What was the asset allocation?

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

The product contains investments with both an environmental and a social objective. A single investment can both contribute to an environmental and a social objective resulting in a total allocation amounting to more than 100 per cent. There is no prioritization of environmental and social objectives, and the strategy does not target any specific allocation or minimum proportion for either of these categories. The investment process accommodates the combination of environmental and social objectives by allowing the investment manager the flexibility to allocate between these based on availability and attractiveness of investment opportunities.

● **In which economic sectors were the investments made?**

Sector	Assets
Consumer, Non-cyclical	37.68 %
Communications	20.32 %
Technology	13.24 %
Financial	7.91 %

Utilities	6.22 %
Consumer, Cyclical	4.28 %
Basic Materials	2.67 %
Cash	1.34 %
FX Forwards	-0.41 %
Sum	100.00 %

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 53 %.

What was the share of socially sustainable investments?

The share of socially sustainable investments was 66 %.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

Cash may have been held as ancillary liquidity or for risk balancing purposes. The fund may have used derivatives and other techniques for the purposes described in the ‘Fund Descriptions’ in the prospectus. This category may also have included securities for which relevant data is not available.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this fund have been monitored and documented on an ongoing basis.

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Nordea 1 - Global Stars Equity Fund

Legal entity identifier: 5493003YXBZ7881E6K64

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

Yes

No

It made **sustainable investments with an environmental objective:** ____%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** ____%

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 73 % of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The E/S characteristics of this fund included:

Minimum proportion of sustainable investments The fund partly invested in sustainable investments, which means companies and issuers involved in activities that contribute to an environmental or social objective as outlined in the 17 UN Sustainable Development Goals (SDGs) and/or the EU Taxonomy, while not significantly harming any other environmental or social objectives.

ESG scoring The fund invested in securities issued by entities whose ESG profiles have been scored by Nordea Asset Management (NAM), or by an external data provider and analysed by NAM, to ensure that only securities issued by entities that met the minimum required ESG score for the fund were eligible for inclusion.

Sector- and value-based exclusions Exclusion filters were applied to the portfolio construction process to restrict investments in companies and issuers with material exposure to certain activities deemed to be detrimental to the environment or the society at large, including tobacco companies and fossil fuel companies.

Nordea Asset Management's Paris-Aligned Fossil Fuel policy whereby the fund did not invest in companies that have significant exposure to fossil fuels unless they have a credible transition strategy.

The fund used a benchmark that is not aligned with the fund's E/S characteristics.

● How did the sustainability indicators perform?

Sustainability Indicator	Metric	Metric Value	Eligibility	Coverage
Carbon Footprint	Carbon footprint	31 tCO ₂ e / m€ invested	97.16 %	97.16 %
Violations of United Nations Global Compact	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises	2.56 % involved in violations	97.16 %	97.16 %

Eligibility: The proportion of the assets in the financial product (relative to NAV), which are in scope for the indicator.

Coverage: The proportion of the assets in the financial product (relative to NAV), where data is available to present the indicator.

● **...and compared to previous periods?**

Sustainability Indicator	Metric	Reference Period	Metric Value	Eligibility	Coverage
Carbon Footprint	Carbon footprint	2022	31 tCO ₂ e / m€ invested	97.16 %	97.16 %
Violations of United Nations Global Compact	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises	2022	2.56 % involved in violations	97.16 %	97.16 %

Eligibility: The proportion of the assets in the financial product (relative to NAV), which are in scope for the indicator.

Coverage: The proportion of the assets in the financial product (relative to NAV), where data is available to present the indicator.

Since no reports covering previous periods are available, this section provides information for the current reporting period only.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The objectives of the sustainable investments that the fund partially made, was to contribute to one or several of the UN SDGs or alternatively be involved in Taxonomy aligned activities. Sustainable investments contributed to the objectives through the fund's investments in companies that supported the UN SDGs or Taxonomy aligned activities by passing a minimum threshold for revenue alignment with UN SDGs or the EU Taxonomy.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The sustainable investments were screened to ensure that they did not significantly harm any other social or environmental objectives (DNSH test) as defined by the EU Taxonomy or any SDGs as adopted by the UN.

- **How were the indicators for adverse impacts on sustainability factors taken into account?**

Nordea Asset Management (NAM) has developed a proprietary quantitative methodology that assessed the environmental and social impact of NAM's investment universe (direct investments mainly) using multiple principal adverse impact ("PAI") indicators from Table 1 and/or Table 2 and/or Table 3 of Annex 1 of the SFDR RTS (the "PAI tool"). The methodology utilised a diverse range of data sources in order to ensure that investee companies' performance was appropriately analysed. PAI indicators were assessed in NAM's PAI tool and the results were a material part of the DNSH test.

- **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

Alignment of the Sustainable Investments with the OECD guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, was confirmed as part of the process to identify sustainable investments using Nordea Asset Management's PAI tool.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The specific PAI indicators that were taken into consideration for this fund were:

ANNEX V

Template periodic disclosure for the financial products referred to in Article 9, paragraphs 1 to 4a, of Regulation (EU) 2019/2088 and Article 5, first paragraph, of Regulation (EU) 2020/852

Product name: Nordea 1 - Global Sustainable Listed Real Assets Fund

Legal entity identifier: 5493004Z6MZQXNQSWI84

Sustainable investment objective

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

Yes

No

It made **sustainable investments with an environmental objective:** 95 %

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** 76 %

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of ____% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent was the sustainable investment objective of this financial product met?

Sustainability indicators measure how the sustainable objectives of this financial product are attained.

The fund combined environmentally and socially sustainable investment objectives. It aimed to create positive environmental and social impact, by investing in companies that are involved in economic activities that are considered environmentally or socially sustainable by virtue of their contribution to one or more of the environmental- or social-themed UN SDGs. The EU Taxonomy provides a framework for assessing the environmental sustainability of economic activities and to the extent that reliable data was available, the Taxonomy was the reference point for the assessment of the environmentally sustainable investments.

The fund used a benchmark which is not aligned with the sustainable objective of the fund.

● How did the sustainability indicators perform?

Sustainability Indicator	Metric	Metric Value	Eligibility	Coverage
SDG 3 - Good Health and Well-being	Ensure healthy lives and promote well-being for all at all ages	8.88 % of financed revenue	98.22 %	97.94 %
SDG 6 - Clean Water and Sanitation	Ensure availability and sustainable management of water and sanitation for all	5.22 % of financed revenue	98.22 %	97.94 %

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

● ***How did the sustainable investments not cause significant harm to any sustainable investment objective?***

The sustainable investments were screened to ensure that they did not significantly harm any other social or environmental objectives (DNSH test) as defined by the EU Taxonomy or any SDGs as adopted by the UN.

- ***How were the indicators for adverse impacts on sustainability factors taken into account?***

Nordea Asset Management (NAM) has developed a proprietary quantitative methodology that assessed the environmental and social impact of NAM's investment universe (direct investments mainly) using multiple principal adverse impact ("PAI") indicators from Table 1 and/or Table 2 and/or Table 3 of Annex 1 of the SFDR RTS (the "PAI tool"). The methodology utilised a diverse range of data sources in order to ensure that investee companies' performance was appropriately analysed. PAI indicators were assessed in NAM's PAI tool and the results were a material part of the DNSH test.

- ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

Alignment of the Sustainable Investments with the OECD guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, was confirmed as part of the process to identify sustainable investments using Nordea Asset Management's PAI tool.

How did this financial product consider principal adverse impacts on sustainability factors?

The specific PAI indicators that were taken into consideration for this fund were:

CLIMATE AND OTHER ENVIRONMENT-RELATED INDICATORS

Adverse Sustainability Indicator	Metric	Metric Value	Eligibility	Coverage	
Greenhouse gas "GHG" emissions	Scope 1 GHG emissions	5,656 tCO ₂ e	98.35 %	98.35 %	
	Scope 2 GHG emissions	464 tCO ₂ e	98.35 %	98.35 %	
	From 1 January 2023, Scope 3 GHG emissions	8,274 tCO ₂ e	98.35 %	98.35 %	
	Total GHG emissions	6,119 tCO ₂ e	98.35 %	98.35 %

Eligibility: The proportion of the assets in the financial product (relative to NAV), which are in scope for the indicator.

Coverage: The proportion of the assets in the financial product (relative to NAV), where data is available to present the indicator.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is:
1 January 2022 -
31 December 2022

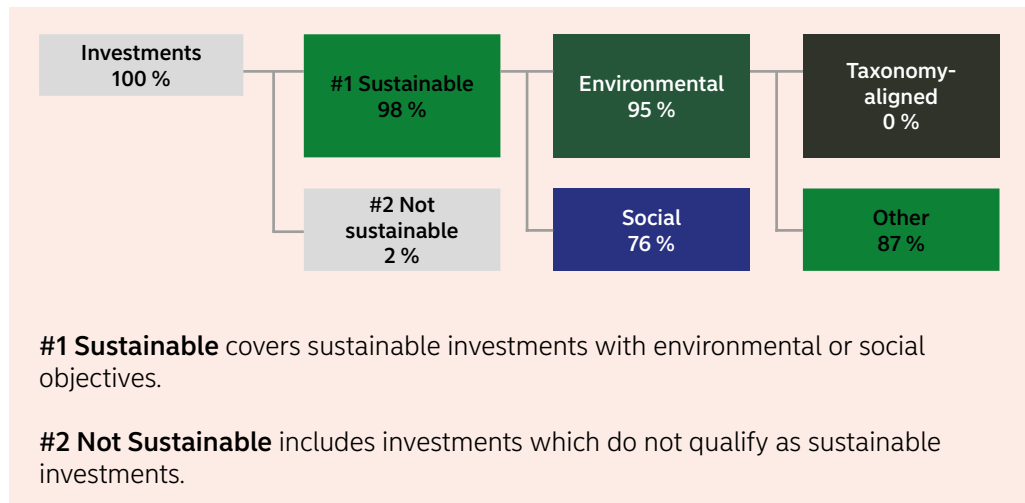

Largest investments	Sector	Assets	Country
Sempra Energy	Utilities	6.47 %	United States
WEC Energy Group	Utilities	5.52 %	United States
Public Service Enterprise Group	Utilities	5.39 %	United States
American Tower	Financial	4.98 %	United States
Equinix	Financial	4.76 %	United States
Alexandria Real Estate Equities	Financial	4.62 %	United States
Vinci	Industrial	4.41 %	France
NextEra Energy	Utilities	4.34 %	United States
Prologis	Financial	4.31 %	United States
Enel	Utilities	4.11 %	Italy

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

● What was the asset allocation?

The product contains investments with both an environmental and a social objective. A single investment can both contribute to an environmental and a social objective resulting in a total allocation amounting to more than 100 per cent. There is no prioritization of environmental and social objectives, and the strategy does not target any specific allocation or minimum proportion for either of these categories. The investment process accommodates the combination of environmental and social objectives by allowing the investment manager the flexibility to allocate between these based on availability and attractiveness of investment opportunities.

● In which economic sectors were the investments made?

Sector	Assets
Financial	45.89 %
Utilities	44.86 %
Industrial	6.28 %
Cash	1.65 %
Energy	0.83 %
Consumer, Cyclical	0.49 %
Sum	100.00 %

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 87 %.

What was the share of socially sustainable investments?

The share of socially sustainable investments was 76 %.

What investments were included under "not sustainable", what was their purpose and were there any minimum environmental or social safeguards?

Cash may have been held as ancillary liquidity or for risk balancing purposes. The fund may have used derivatives and other techniques for the purposes described in the 'Fund Descriptions' in the prospectus. This category may also have included securities for which relevant data is not available. Such investments were assessed to ensure that they live up to minimum social safeguards.

What actions have been taken to attain the sustainable investment objective during the reference period?

The binding elements of the investment strategy used to select the investments to attain the sustainable investment objective by this fund have been monitored and documented on an ongoing basis.

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Nordea 1 - Global Value ESG Fund

Legal entity identifier: 549300RJ3S8CSJQ1CT83

Environmental and/or social characteristics

Sustainable investment

means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

Yes

No

It made **sustainable investments with an environmental objective:** _____%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** _____%

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 65 % of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The E/S characteristics of this fund included:

Minimum proportion of sustainable investments The fund partly invested in sustainable investments, which means companies and issuers involved in activities that contribute to an environmental or social objective as outlined in the 17 UN Sustainable Development Goals (SDGs) and/or the EU Taxonomy, while not significantly harming any other environmental or social objectives.

Sector- and value-based exclusions Exclusion filters were applied to the portfolio construction process to restrict investments in companies and issuers with material exposure to certain activities deemed to be detrimental to the environment or the society at large, including tobacco companies and fossil fuel companies.

Nordea Asset Management's Paris-Aligned Fossil Fuel policy whereby the fund did not invest in companies that have significant exposure to fossil fuels unless they have a credible transition strategy.

The fund used a benchmark that is not aligned with the fund's E/S characteristics.

● How did the sustainability indicators perform?

Sustainability Indicator	Metric	Metric Value	Eligibility	Coverage
Carbon Footprint	Carbon footprint	104 tCO ₂ e / m€ invested	98.96 %	98.96 %
Violations of United Nations Global Compact	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises	0.00 % involved in violations	98.96 %	98.96 %

Eligibility: The proportion of the assets in the financial product (relative to NAV), which are in scope for the indicator.

Coverage: The proportion of the assets in the financial product (relative to NAV), where data is available to present the indicator.

● **...and compared to previous periods?**

Sustainability Indicator	Metric	Reference Period	Metric Value	Eligibility	Coverage
Carbon Footprint	Carbon footprint	2022	104 tCO ₂ e / m€ invested	98.96 %	98.96 %
Violations of United Nations Global Compact	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises	2022	0.00 % involved in violations	98.96 %	98.96 %

Eligibility: The proportion of the assets in the financial product (relative to NAV), which are in scope for the indicator.

Coverage: The proportion of the assets in the financial product (relative to NAV), where data is available to present the indicator.

Since no reports covering previous periods are available, this section provides information for the current reporting period only.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The objectives of the sustainable investments that the fund partially made, was to contribute to one or several of the UN SDGs or alternatively be involved in Taxonomy-aligned activities. Sustainable investments contributed to the objectives through the fund's investments in companies that support the UN SDGs or Taxonomy-aligned activities by passing a minimum threshold for revenue alignment with UN SDGs or the EU Taxonomy.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The sustainable investments were screened to ensure that they did not significantly harm any other social or environmental objectives (DNSH test) as defined by the EU Taxonomy or any SDGs as adopted by the UN.

- **How were the indicators for adverse impacts on sustainability factors taken into account?**

Nordea Asset Management (NAM) has developed a proprietary quantitative methodology that assessed the environmental and social impact of NAM's investment universe (direct investments mainly) using multiple principal adverse impact ("PAI") indicators from Table 1 and/or Table 2 and/or Table 3 of Annex 1 of the SFDR RTS (the "PAI tool"). The methodology utilised a diverse range of data sources in order to ensure that investee companies' performance was appropriately analysed. PAI indicators were assessed in NAM's PAI tool and the results were a material part of the DNSH test.

- **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

Alignment of the Sustainable Investments with the OECD guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, was confirmed as part of the process to identify sustainable investments using Nordea Asset Management's PAI tool.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The specific PAI indicators that were taken into consideration for this fund were:

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

● What was the asset allocation?

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

The product contains investments with both an environmental and a social objective. A single investment can both contribute to an environmental and a social objective resulting in a total allocation amounting to more than 100 per cent. There is no prioritization of environmental and social objectives, and the strategy does not target any specific allocation or minimum proportion for either of these categories. The investment process accommodates the combination of environmental and social objectives by allowing the investment manager the flexibility to allocate between these based on availability and attractiveness of investment opportunities.

● **In which economic sectors were the investments made?**

Sector	Assets
Financial	29.92 %
Consumer, Non-cyclical	20.63 %
Consumer, Cyclical	12.38 %
Technology	9.16 %
Industrial	9.01 %
Communications	5.79 %

Energy	5.18 %
Utilities	1.38 %
Cash	1.04 %
Sum	100.00 %

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 57 %.

What was the share of socially sustainable investments?

The share of socially sustainable investments was 57 %.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Cash may have been held as ancillary liquidity or for risk balancing purposes. The fund may have used derivatives and other techniques for the purposes described in the 'Fund Descriptions' in the prospectus. This category may also have included securities for which relevant data is not available.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this fund have been monitored and documented on an ongoing basis.

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Nordea 1 - Low Duration European Covered Bond Fund

Legal entity identifier: 549300T4YU2MVOMP8L55

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

Yes

No

It made **sustainable investments with an environmental objective:** _____%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** _____%

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 14 % of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The E/S characteristics of this fund included:

Sustainable investments Although the fund has not committed to make any sustainable investments, the fund partly invested in sustainable investments, which means companies and issuers involved in activities that contribute to an environmental or social objective as outlined in the 17 UN Sustainable Development Goals (SDGs) and/or the EU Taxonomy, while not significantly harming any other environmental or social objectives.

Sector- and value-based exclusions Exclusion filters were applied to the portfolio construction process to restrict investments in companies and issuers with material exposure to certain activities deemed to be detrimental to the environment or the society at large, including tobacco companies and fossil fuel companies.

Nordea Asset Management's Paris-Aligned Fossil Fuel policy whereby the fund did not invest in companies that have significant exposure to fossil fuels unless they have a credible transition strategy.

The fund used a benchmark that is not aligned with the fund's E/S characteristics.

● How did the sustainability indicators perform?

Sustainability Indicator	Metric	Metric Value	Eligibility	Coverage
Carbon Footprint	Carbon footprint	0 tCO ₂ e / m€ invested	82.93 %	71.79 %
Social Violations	Number of investee countries subject to social violations (absolute number and relative number divided by all investee countries), as referred to in international treaties and conventions, United Nations principles and, where applicable, national law	0 investee countries subject to violations	11.15 %	11.15 %
		0.00 % investee countries subject to violations	11.15 %	11.15 %

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

The objectives of the sustainable investments that the fund partially made, was to contribute to one or several of the UN SDGs or alternatively be involved in Taxonomy-aligned activities. Sustainable investments contributed to the objectives through the fund's investments in companies that support the UN SDGs or Taxonomy-aligned activities by passing a minimum threshold for revenue alignment with UN SDGs or the EU Taxonomy.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The sustainable investments were screened to ensure that they did not significantly harm any other social or environmental objectives (DNSH test) as defined by the EU Taxonomy or any SDGs as adopted by the UN.

- **How were the indicators for adverse impacts on sustainability factors taken into account?**

Nordea Asset Management (NAM) has developed a proprietary quantitative methodology that assessed the environmental and social impact of NAM's investment universe (direct investments mainly) using multiple principal adverse impact ("PAI") indicators from Table 1 and/or Table 2 and/or Table 3 of Annex 1 of the SFDR RTS (the "PAI tool"). The methodology utilised a diverse range of data sources in order to ensure that investee companies' performance was appropriately analysed. PAI indicators were assessed in NAM's PAI tool and the results were a material part of the DNSH test.

- **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

Alignment of the Sustainable Investments with the OECD guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, was confirmed as part of the process to identify sustainable investments using Nordea Asset Management's PAI tool.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The specific PAI indicators that were taken into consideration for this fund were:

CLIMATE AND OTHER ENVIRONMENT-RELATED INDICATORS

Adverse Sustainability Indicator	Metric	Metric Value	Eligibility	Coverage	
Greenhouse gas "GHG" emissions	Scope 1 GHG emissions	820 tCO ₂ e	82.93 %	71.79 %	
	Scope 2 GHG emissions	1,548 tCO ₂ e	82.93 %	71.79 %

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

● What was the asset allocation?

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

The product contains investments with both an environmental and a social objective. A single investment can both contribute to an environmental and a social objective resulting in a total allocation amounting to more than 100 per cent. There is no prioritization of environmental and social objectives, and the strategy does not target any specific allocation or minimum proportion for either of these categories. The investment process accommodates the combination of environmental and social objectives by allowing the investment manager the flexibility to allocate between these based on availability and attractiveness of investment opportunities.

● **In which economic sectors were the investments made?**

Sector	Assets
Financial	77.75 %
Government bonds	17.14 %
Cash	3.03 %
Derivatives	2.10 %
FX Forwards	-0.02 %
Sum	100.00 %

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 13 %.

What was the share of socially sustainable investments?

The share of socially sustainable investments was 13 %.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Cash may have been held as ancillary liquidity or for risk balancing purposes. The fund may have used derivatives and other techniques for the purposes described in the 'Fund Descriptions' in the prospectus. This category may also have included securities for which relevant data is not available.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this fund have been monitored and documented on an ongoing basis.

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Nordea 1 - Low Duration US High Yield Bond Fund

Legal entity identifier: 5493007JB6L1DCBXJN89

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

Yes

No

It made **sustainable investments with an environmental objective:** _____%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** _____%

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 48 % of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The E/S characteristics of this fund included:

Sustainable investments Although the fund has not committed to make any sustainable investments, the fund partly invested in sustainable investments, which means companies and issuers involved in activities that contribute to an environmental or social objective as outlined in the 17 UN Sustainable Development Goals (SDGs) and/or the EU Taxonomy, while not significantly harming any other environmental or social objectives.

Sector- and value-based exclusions Exclusion filters were applied to the portfolio construction process to restrict investments in companies and issuers with material exposure to certain activities deemed to be detrimental to the environment or the society at large, including tobacco companies and fossil fuel companies.

Nordea Asset Management's Paris-Aligned Fossil Fuel policy whereby the fund did not invest in companies that have significant exposure to fossil fuels unless they have a credible transition strategy.

The fund used a benchmark that is not aligned with the fund's E/S characteristics.

● How did the sustainability indicators perform?

Sustainability Indicator	Metric	Metric Value	Eligibility	Coverage
Carbon Footprint	Carbon footprint	75 tCO ₂ e / m€ invested	94.30 %	83.79 %
Social Violations	Number of investee countries subject to social violations (absolute number and relative number divided by all investee countries), as referred to in international treaties and conventions, United Nations principles and, where applicable, national law	N/A	N/A	N/A
		N/A	N/A	N/A
Violations of United Nations Global Compact	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises	0.00 % involved in violations	94.30 %	74.71 %
Greenhouse Gas Intensity for sovereigns	GHG intensity of investee countries	N/A	N/A	N/A

Eligibility: The proportion of the assets in the financial product (relative to NAV), which are in scope for the indicator.

Coverage: The proportion of the assets in the financial product (relative to NAV), where data is available to present the indicator.

● **...and compared to previous periods?**

Sustainability Indicator	Metric	Reference Period	Metric Value	Eligibility	Coverage
Carbon Footprint	Carbon footprint	2022	75 tCO2e / m€ invested	94.30 %	83.79 %
Social Violations	Number of investee countries subject to social violations (absolute number and relative number divided by all investee countries), as referred to in international treaties and conventions, United Nations principles and, where applicable, national law	2022	N/A	N/A	N/A
		2022	N/A	N/A	N/A
Violations of United Nations Global Compact	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises	2022	0.00 % involved in violations	94.30 %	74.71 %
Greenhouse Gas Intensity for sovereigns	GHG intensity of investee countries	2022	N/A	N/A	N/A

Eligibility: The proportion of the assets in the financial product (relative to NAV), which are in scope for the indicator.

Coverage: The proportion of the assets in the financial product (relative to NAV), where data is available to present the indicator.

Since no reports covering previous periods are available, this section provides information for the current reporting period only.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The objectives of the sustainable investments that the fund partially made, was to contribute to one or several of the UN SDGs or alternatively be involved in Taxonomy-aligned activities. Sustainable investments contributed to the objectives through the fund's investments in companies that support the UN SDGs or Taxonomy-aligned activities by passing a minimum threshold for revenue alignment with UN SDGs or the EU Taxonomy.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The sustainable investments were screened to ensure that they did not significantly harm any other social or environmental objectives (DNSH test) as defined by the EU Taxonomy or any SDGs as adopted by the UN.

- **How were the indicators for adverse impacts on sustainability factors taken into account?**

Nordea Asset Management (NAM) has developed a proprietary quantitative methodology that assessed the environmental and social impact of NAM's investment universe (direct investments mainly) using multiple principal adverse impact ("PAI") indicators from Table 1 and/or Table 2 and/or Table 3 of Annex 1 of the SFDR RTS (the "PAI tool"). The methodology utilised a diverse range of data sources in order to ensure that investee companies' performance was appropriately analysed. PAI indicators were assessed in NAM's PAI tool and the results were a material part of the DNSH test.

- **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

Alignment of the Sustainable Investments with the OECD guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, was confirmed as part of the process to identify sustainable investments using Nordea Asset Management's PAI tool.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The specific PAI indicators that were taken into consideration for this fund were:

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

● What was the asset allocation?

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

The product contains investments with both an environmental and a social objective. A single investment can both contribute to an environmental and a social objective resulting in a total allocation amounting to more than 100 per cent. There is no prioritization of environmental and social objectives, and the strategy does not target any specific allocation or minimum proportion for either of these categories. The investment process accommodates the combination of environmental and social objectives by allowing the investment manager the flexibility to allocate between these based on availability and attractiveness of investment opportunities.

● **In which economic sectors were the investments made?**

Sector	Assets
Consumer, Cyclical	25.91 %
Communications	17.48 %

Sum	100.00 %

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 42 %.

What was the share of socially sustainable investments?

The share of socially sustainable investments was 42 %.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Cash may have been held as ancillary liquidity or for risk balancing purposes. The fund may have used derivatives and other techniques for the purposes described in the 'Fund Descriptions' in the prospectus. This category may also have included securities for which relevant data is not available.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this fund have been monitored and documented on an ongoing basis.

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Nordea 1 - Nordic Equity Fund

Legal entity identifier: 5493002P8HQC8H89KJ23

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

Yes

No

It made **sustainable investments with an environmental objective:** _____%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** _____%

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 79 % of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The E/S characteristics of this fund included:

Sustainable investments Although the fund has not committed to make any sustainable investments, the fund partly invested in sustainable investments, which means companies and issuers involved in activities that contribute to an environmental or social objective as outlined in the 17 UN Sustainable Development Goals (SDGs) and/or the EU Taxonomy, while not significantly harming any other environmental or social objectives.

Sector- and value-based exclusions Exclusion filters were applied to the portfolio construction process to restrict investments in companies and issuers with material exposure to certain activities deemed to be detrimental to the environment or the society at large, including tobacco companies and fossil fuel companies.

Nordea Asset Management's Paris-Aligned Fossil Fuel policy whereby the fund did not invest in companies that have significant exposure to fossil fuels unless they have a credible transition strategy.

The fund used a benchmark that is not aligned with the fund's E/S characteristics.

● How did the sustainability indicators perform?

Sustainability Indicator	Metric	Metric Value	Eligibility	Coverage
Carbon Footprint	Carbon footprint	22 tCO ₂ e / m€ invested	97.30 %	97.30 %
Violations of United Nations Global Compact	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises	0.00 % involved in violations	97.30 %	97.30 %

Eligibility: The proportion of the assets in the financial product (relative to NAV), which are in scope for the indicator.

Coverage: The proportion of the assets in the financial product (relative to NAV), where data is available to present the indicator.

● **...and compared to previous periods?**

Sustainability Indicator	Metric	Reference Period	Metric Value	Eligibility	Coverage
Carbon Footprint	Carbon footprint	2022	22 tCO2e / m€ invested	97.30 %	97.30 %
Violations of United Nations Global Compact	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises	2022	0.00 % involved in violations	97.30 %	97.30 %

Eligibility: The proportion of the assets in the financial product (relative to NAV), which are in scope for the indicator.

Coverage: The proportion of the assets in the financial product (relative to NAV), where data is available to present the indicator.

Since no reports covering previous periods are available, this section provides information for the current reporting period only.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The objectives of the sustainable investments that the fund partially made, was to contribute to one or several of the UN SDGs or alternatively be involved in Taxonomy-aligned activities. Sustainable investments contributed to the objectives through the fund's investments in companies that support the UN SDGs or Taxonomy-aligned activities by passing a minimum threshold for revenue alignment with UN SDGs or the EU Taxonomy.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The sustainable investments were screened to ensure that they did not significantly harm any other social or environmental objectives (DNSH test) as defined by the EU Taxonomy or any SDGs as adopted by the UN.

- **How were the indicators for adverse impacts on sustainability factors taken into account?**

Nordea Asset Management (NAM) has developed a proprietary quantitative methodology that assessed the environmental and social impact of NAM's investment universe (direct investments mainly) using multiple principal adverse impact ("PAI") indicators from Table 1 and/or Table 2 and/or Table 3 of Annex 1 of the SFDR RTS (the "PAI tool"). The methodology utilised a diverse range of data sources in order to ensure that investee companies' performance was appropriately analysed. PAI indicators were assessed in NAM's PAI tool and the results were a material part of the DNSH test.

- **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

Alignment of the Sustainable Investments with the OECD guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, was confirmed as part of the process to identify sustainable investments using Nordea Asset Management's PAI tool.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The specific PAI indicators that were taken into consideration for this fund were:

CLIMATE AND OTHER ENVIRONMENT-RELATED INDICATORS

Adverse Sustainability Indicator	Metric	Metric Value	Eligibility	Coverage

Coverage: The proportion of the assets in the financial product (relative to NAV), where data is available to present the indicator.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is:
1 January 2022 -
31 December 2022

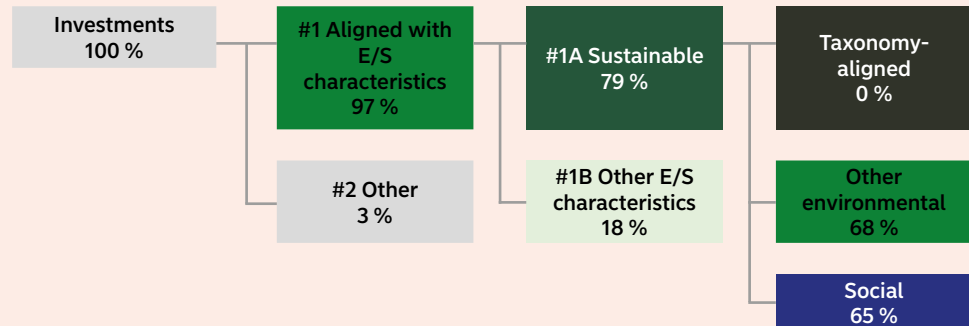

Largest investments	Sector	Assets	Country
Novo Nordisk B	Consumer, Non-cyclical	9.09 %	Denmark
Sampo A	Financial	8.69 %	Finland
Tryg	Financial	7.38 %	Denmark
Gjensidige Forsikring	Financial	5.25 %	Norway
Evolution	Consumer, Cyclical	5.03 %	Sweden
Neste	Energy	4.81 %	Finland
Nordea Bank	Financial	3.96 %	Finland
Essity B	Consumer, Non-cyclical	3.90 %	Sweden

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

● What was the asset allocation?

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

The product contains investments with both an environmental and a social objective. A single investment can both contribute to an environmental and a social objective resulting in a total allocation amounting to more than 100 per cent. There is no prioritization of environmental and social objectives, and the strategy does not target any specific allocation or minimum proportion for either of these categories. The investment process accommodates the combination of environmental and social objectives by allowing the investment manager the flexibility to allocate between these based on availability and attractiveness of investment opportunities.

● **In which economic sectors were the investments made?**

Sector	Assets
Financial	28.43 %
Consumer, Non-cyclical	24.29 %
Consumer, Cyclical	14.47 %
Industrial	12.27 %
Energy	7.47 %
Communications	5.78 %
Basic Materials	4.59 %
Cash	2.51 %
Utilities	0.19 %
Sum	100.00 %

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 68 %.

What was the share of socially sustainable investments?

The share of socially sustainable investments was 65 %.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

Cash may have been held as ancillary liquidity or for risk balancing purposes. The fund may have used derivatives and other techniques for the purposes described in the ‘Fund Descriptions’ in the prospectus. This category may also have included securities for which relevant data is not available.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this fund have been monitored and documented on an ongoing basis.

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Nordea 1 - Nordic Equity Small Cap Fund

Legal entity identifier: 549300037CR2WTAYCN25

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

Yes

No

It made **sustainable investments with an environmental objective:** _____%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** _____%

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 64 % of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The E/S characteristics of this fund included:

Sustainable investments Although the fund has not committed to make any sustainable investments, the fund partly invested in sustainable investments, which means companies and issuers involved in activities that contribute to an environmental or social objective as outlined in the 17 UN Sustainable Development Goals (SDGs) and/or the EU Taxonomy, while not significantly harming any other environmental or social objectives.

Sector- and value-based exclusions Exclusion filters were applied to the portfolio construction process to restrict investments in companies and issuers with material exposure to certain activities deemed to be detrimental to the environment or the society at large, including tobacco companies and fossil fuel companies.

Nordea Asset Management's Paris-Aligned Fossil Fuel policy whereby the fund did not invest in companies that have significant exposure to fossil fuels unless they have a credible transition strategy.

The fund used a benchmark that is not aligned with the fund's E/S characteristics.

● How did the sustainability indicators perform?

Sustainability Indicator	Metric	Metric Value	Eligibility	Coverage
Carbon Footprint	Carbon footprint	49 tCO ₂ e / m€ invested	99.09 %	96.00 %

● **...and compared to previous periods?**

Sustainability Indicator	Metric	Reference Period	Metric Value	Eligibility	Coverage
Carbon Footprint	Carbon footprint	2022	16 tCO ₂ e / m€ invested	94.76 %	92.21 %
Violations of United Nations Global Compact	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises	2022	0.00 % involved in violations	94.76 %	94.76 %

Eligibility: The proportion of the assets in the financial product (relative to NAV), which are in scope for the indicator.

Coverage: The proportion of the assets in the financial product (relative to NAV), where data is available to present the indicator.

Since no reports covering previous periods are available, this section provides information for the current reporting period only.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The objectives of the sustainable investments that the fund partially made, was to contribute to one or several of the UN SDGs or alternatively be involved in Taxonomy-aligned activities. Sustainable investments contributed to the objectives through the fund's investments in companies that support the UN SDGs or Taxonomy-aligned activities by passing a minimum threshold for revenue alignment with UN SDGs or the EU Taxonomy.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The sustainable investments were screened to ensure that they did not significantly harm any other social or environmental objectives (DNSH test) as defined by the EU Taxonomy or any SDGs as adopted by the UN.

- **How were the indicators for adverse impacts on sustainability factors taken into account?**

Nordea Asset Management (NAM) has developed a proprietary quantitative methodology that assessed the environmental and social impact of NAM's investment universe (direct investments mainly) using multiple principal adverse impact ("PAI") indicators from Table 1 and/or Table 2 and/or Table 3 of Annex 1 of the SFDR RTS (the "PAI tool"). The methodology utilised a diverse range of data sources in order to ensure that investee companies' performance was appropriately analysed. PAI indicators were assessed in NAM's PAI tool and the results were a material part of the DNSH test.

- **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

Alignment of the Sustainable Investments with the OECD guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, was confirmed as part of the process to identify sustainable investments using Nordea Asset Management's PAI tool.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The specific PAI indicators that were taken into consideration for this fund were:

Evolution	Consumer, Cyclical	4.63 %	Sweden
Kindred Group SDB	Consumer, Cyclical	4.06 %	Malta
Nokia	Communications	4.05 %	Finland

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

● What was the asset allocation?

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

The product contains investments with both an environmental and a social objective. A single investment can both contribute to an environmental and a social objective resulting in a total allocation amounting to more than 100 per cent. There is no prioritization of environmental and social objectives, and the strategy does not target any specific allocation or minimum proportion for either of these categories. The investment process accommodates the combination of environmental and social objectives by allowing the investment manager the flexibility to allocate between these based on availability and attractiveness of investment opportunities.

● **In which economic sectors were the investments made?**

Sector	Assets
Financial	27.58 %
Consumer, Non-cyclical	20.36 %
Consumer, Cyclical	14.49 %
Industrial	11.22 %
Energy	7.68 %
Technology	5.53 %
Basic Materials	4.94 %
Cash	4.16 %
Communications	4.05 %
Sum	100.00 %

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 67 %.

What was the share of socially sustainable investments?

The share of socially sustainable investments was 62 %.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

Cash may have been held as ancillary liquidity or for risk balancing purposes. The fund may have used derivatives and other techniques for the purposes described in the ‘Fund Descriptions’ in the prospectus. This category may also have included securities for which relevant data is not available.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this fund have been monitored and documented on an ongoing basis.

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Nordea 1 - Nordic Stars Equity Fund

Legal entity identifier: 549300CJ90IR500H4506

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

Yes

No

It made **sustainable investments with an environmental objective:** _____%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** _____%

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 84 % of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The E/S characteristics of this fund included:

Minimum proportion of sustainable investments The fund partly invested in sustainable investments, which means companies and issuers involved in activities that contribute to an environmental or social objective as outlined in the 17 UN Sustainable Development Goals (SDGs) and/or the EU Taxonomy, while not significantly harming any other environmental or social objectives.

ESG scoring The fund invested in securities issued by entities whose ESG profiles have been scored by Nordea Asset Management (NAM), or by an external data provider and analysed by NAM, to ensure that only securities issued by entities that met the minimum required ESG score for the fund were eligible for inclusion.

Sector- and value-based exclusions Exclusion filters were applied to the portfolio construction process to restrict investments in companies and issuers with material exposure to certain activities deemed to be detrimental to the environment or the society at large, including tobacco companies and fossil fuel companies.

Nordea Asset Management's Paris-Aligned Fossil Fuel policy whereby the fund did not invest in companies that have significant exposure to fossil fuels unless they have a credible transition strategy.

The fund used a benchmark that is not aligned with the fund's E/S characteristics.

● How did the sustainability indicators perform?

Sustainability Indicator	Metric	Metric Value	Eligibility	Coverage
Carbon Footprint	Carbon footprint	17 tCO ₂ e / m€ invested	96.85 %	95.16 %
Violations of United Nations Global Compact	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises	0.00 % involved in violations	96.85 %	96.85 %

Eligibility: The proportion of the assets in the financial product (relative to NAV), which are in scope for the indicator.

Coverage: The proportion of the assets in the financial product (relative to NAV), where data is available to present the indicator.

Since no reports covering previous periods are available, this section provides information for the current reporting period only.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The objectives of the sustainable investments that the fund partially made, was to contribute to one or several of the UN SDGs or alternatively be involved in Taxonomy-aligned activities. Sustainable investments contributed to the objectives through the fund's investments in companies that support the UN SDGs or Taxonomy-aligned activities by passing a minimum threshold for revenue alignment with UN SDGs or the EU Taxonomy.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The sustainable investments were screened to ensure that they did not significantly harm any other social or environmental objectives (DNSH test) as defined by the EU Taxonomy or any SDGs as adopted by the UN.

- **How were the indicators for adverse impacts on sustainability factors taken into account?**

Nordea Asset Management (NAM) has developed a proprietary quantitative methodology that assessed the environmental and social impact of NAM's investment universe (direct investments mainly) using multiple principal adverse impact ("PAI") indicators from Table 1 and/or Table 2 and/or Table 3 of Annex 1 of the SFDR RTS (the "PAI tool"). The methodology utilised a diverse range of data sources in order to ensure that investee companies' performance was appropriately analysed. PAI indicators were assessed in NAM's PAI tool and the results were a material part of the DNSH test.

- **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

Alignment of the Sustainable Investments with the OECD guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, was confirmed as part of the process to identify sustainable investments using Nordea Asset Management's PAI tool.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The specific PAI indicators that were taken into consideration for this fund were:

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

● What was the asset allocation?

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

The product contains investments with both an environmental and a social objective. A single investment can both contribute to an environmental and a social objective resulting in a total allocation amounting to more than 100 per cent. There is no prioritization of environmental and social objectives, and the strategy does not target any specific allocation or minimum proportion for either of these categories. The investment process accommodates the combination of environmental and social objectives by allowing the investment manager the flexibility to allocate between these based on availability and attractiveness of investment opportunities.

● **In which economic sectors were the investments made?**

Sector	Assets
Communications	24.58 %
Consumer, Non-cyclical	18.00 %
Consumer, Cyclical	16.54 %
Financial	13.36 %
Industrial	12.81 %
Utilities	3.64 %
Cash	3.54 %
Basic Materials	3.16 %
Technology	2.99 %
Energy	1.25 %
Government bonds	0.13 %
Sum	100.00 %

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 54%.

What was the share of socially sustainable investments?

The share of socially sustainable investments was 53 %.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

Cash may have been held as ancillary liquidity or for risk balancing purposes. The fund may have used derivatives and other techniques for the purposes described in the ‘Fund Descriptions’ in the prospectus. This category may also have included securities for which relevant data is not available.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this fund have been monitored and documented on an ongoing basis.

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Nordea 1 - North American Stars Equity Fund

Legal entity identifier: 5493000U6GOWJF5BJ788

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

Yes

No

It made **sustainable investments with an environmental objective:** _____%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** _____%

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 75 % of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The E/S characteristics of this fund included:

Minimum proportion of sustainable investments The fund partly invested in sustainable investments, which means companies and issuers involved in activities that contribute to an environmental or social objective as outlined in the 17 UN Sustainable Development Goals (SDGs) and/or the EU Taxonomy, while not significantly harming any other environmental or social objectives.

ESG scoring The fund invested in securities issued by entities whose ESG profiles have been scored by Nordea Asset Management (NAM), or by an external data provider and analysed by NAM, to ensure that only securities issued by entities that met the minimum required ESG score for the fund were eligible for inclusion.

Sector- and value-based exclusions Exclusion filters were applied to the portfolio construction process to restrict investments in companies and issuers with material exposure to certain activities deemed to be detrimental to the environment or the society at large, including tobacco companies and fossil fuel companies.

Nordea Asset Management's Paris-Aligned Fossil Fuel policy whereby the fund did not invest in companies that have significant exposure to fossil fuels unless they have a credible transition strategy.

The fund used a benchmark that is not aligned with the fund's E/S characteristics.

● How did the sustainability indicators perform?

Sustainability Indicator	Metric	Metric Value	Eligibility	Coverage
Carbon Footprint	Carbon footprint	26 tCO ₂ e / m€ invested	97.52 %	97.43 %
Violations of United Nations Global Compact	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises	4.10 % involved in violations	97.52 %	97.52 %

Eligibility: The proportion of the assets in the financial product (relative to NAV), which are in scope for the indicator.

Coverage: The proportion of the assets in the financial product (relative to NAV), where data is available to present the indicator.

● **...and compared to previous periods?**

Sustainability Indicator	Metric	Reference Period	Metric Value	Eligibility	Coverage

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

Yes

No

It made **sustainable investments with an environmental objective:** _____%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** _____%

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 37 % of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The E/S characteristics of this fund included:

Sustainable investments Although the fund has not committed to make any sustainable investments, the fund partly invested in sustainable investments, which means companies and issuers involved in activities that contribute to an environmental or social objective as outlined in the 17 UN Sustainable Development Goals (SDGs) and/or the EU Taxonomy, while not significantly harming any other environmental or social objectives.

Sector- and value-based exclusions Exclusion filters were applied to the portfolio construction process to restrict investments in companies and issuers with material exposure to certain activities deemed to be detrimental to the environment or the society at large, including tobacco companies and fossil fuel companies.

Nordea Asset Management's Paris-Aligned Fossil Fuel policy whereby the fund did not invest in companies that have significant exposure to fossil fuels unless they have a credible transition strategy.

The fund used a benchmark that is not aligned with the fund's E/S characteristics.

● How did the sustainability indicators perform?

Sustainability Indicator	Metric	Metric Value	Eligibility	Coverage
Carbon Footprint	Carbon footprint	24 tCO ₂ e / m€ invested	91.38 %	50.73 %
Social Violations	Number of investee countries subject to social violations (absolute number and relative number divided by all investee countries), as referred to in international treaties and conventions, United Nations principles and, where applicable, national law	0 investee countries subject to violations	7.86 %	7.86 %
		0.00 % investee countries subject to violations	7.86 %	7.86 %
Violations of United Nations Global Compact	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises	0.00 % involved in violations	91.38 %	77.76 %
Greenhouse Gas Intensity for sovereigns	GHG intensity of investee countries	159.62 tCO ₂ e / m€ of owned GDP	7.86 %	7.86 %

Eligibility: The proportion of the assets in the financial product (relative to NAV), which are in scope for the indicator.

Coverage: The proportion of the assets in the financial product (relative to NAV), where data is available to present the indicator.

● **...and compared to previous periods?**

Sustainability Indicator	Metric	Reference Period	Metric Value	Eligibility	Coverage
Carbon Footprint	Carbon footprint	2022	24 tCO ₂ e / m€ invested	91.38 %	50.73 %
Social Violations	Number of investee countries subject to social violations (absolute number and relative number divided by all investee countries), as referred to in international treaties and conventions, United Nations principles and, where applicable, national law	2022	0 investee countries subject to violations	7.86 %	7.86 %
		2022	0.00 % investee countries subject to violations	7.86 %	7.86 %
Violations of United Nations Global Compact	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises	2022	0.00 % involved in violations	91.38 %	77.76 %
Greenhouse Gas Intensity for sovereigns	GHG intensity of investee countries	2022	159.62 tCO ₂ e / m€ of owned GDP	7.86 %	7.86 %

Eligibility: The proportion of the assets in the financial product (relative to NAV), which are in scope for the indicator.

Coverage: The proportion of the assets in the financial product (relative to NAV), where data is available to present the indicator.

Since no reports covering previous periods are available, this section provides information for the current reporting period only.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The objectives of the sustainable investments that the fund partially made, was to contribute to one or several of the UN SDGs or alternatively be involved in Taxonomy-aligned activities. Sustainable investments contributed to the objectives through the fund's investments in companies that support the UN SDGs or Taxonomy-aligned activities by passing a minimum threshold for revenue alignment with UN SDGs or the EU Taxonomy.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The sustainable investments were screened to ensure that they did not significantly harm any other social or environmental objectives (DNSH test) as defined by the EU Taxonomy or any SDGs as adopted by the UN.

- **How were the indicators for adverse impacts on sustainability factors taken into account?**

Nordea Asset Management (NAM) has developed a proprietary quantitative methodology that assessed the environmental and social impact of NAM's investment universe (direct investments mainly) using multiple principal adverse impact ("PAI") indicators from Table 1 and/or Table 2 and/or Table 3 of Annex 1 of the SFDR RTS (the "PAI tool"). The methodology utilised a diverse range of data sources in order to ensure that investee companies' performance was appropriately analysed. PAI indicators were assessed in NAM's PAI tool and the results were a material part of the DNSH test.

- **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

Alignment of the Sustainable Investments with the OECD guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, was confirmed as part of the process to identify sustainable investments using Nordea Asset Management's PAI tool.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The specific PAI indicators that were taken into consideration for this fund were:

CLIMATE AND OTHER ENVIRONMENT-RELATED INDICATORS

Adverse Sustainability Indicator	Metric	Metric Value	Eligibility	Coverage

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

● What was the asset allocation?

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

The product contains investments with both an environmental and a social objective. A single investment can both contribute to an environmental and a social objective resulting in a total allocation amounting to more than 100 per cent. There is no prioritization of environmental and social objectives, and the strategy does not target any specific allocation or minimum proportion for either of these categories. The investment process accommodates the combination of environmental and social objectives by allowing the investment manager the flexibility to allocate between these based on availability and attractiveness of investment opportunities.

● **In which economic sectors were the investments made?**

Sector	Assets
Financial	62.28 %
Consumer, Non-cyclical	14.83 %
Government bonds	14.38 %
Cash	3.79 %
Utilities	2.51 %
Energy	1.74 %
Basic Materials	1.37 %
Consumer, Cyclical	1.24 %
Industrial	0.70 %
Communications	0.30 %
Derivatives	-3.14 %
Sum	100.00 %

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 37 %.

What was the share of socially sustainable investments?

The share of socially sustainable investments was 33 %.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

Cash may have been held as ancillary liquidity or for risk balancing purposes. The fund may have used derivatives and other techniques for the purposes described in the ‘Fund Descriptions’ in the prospectus. This category may also have included securities for which relevant data is not available.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this fund have been monitored and documented on an ongoing basis.

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Nordea 1 - Norwegian Equity Fund

Legal entity identifier: 549300WSP511P7B44508

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

Yes

No

It made **sustainable investments with an environmental objective:** _____%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** _____%

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 49 % of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The E/S characteristics of this fund included:

Sustainable investments Although the fund has not committed to make any sustainable investments, the fund partly invested in sustainable investments, which means companies and issuers involved in activities that contribute to an environmental or social objective as outlined in the 17 UN Sustainable Development Goals (SDGs) and/or the EU Taxonomy, while not significantly harming any other environmental or social objectives.

Sector- and value-based exclusions Exclusion filters were applied to the portfolio construction process to restrict investments in companies and issuers with material exposure to certain activities deemed to be detrimental to the environment or the society at large, including tobacco companies and fossil fuel companies.

The fund used a benchmark that is not aligned with the fund's E/S characteristics.

● *How did the sustainability indicators perform?*

Sustainability Indicator	Metric	Metric Value	Eligibility	Coverage
Carbon Footprint	Carbon footprint	242 tCO ₂ e / m€ invested	98.37 %	90.50 %
Violations of United Nations Global Compact	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises	0.00 % involved in violations	98.37 %	95.56 %

Eligibility: The proportion of the assets in the financial product (relative to NAV), which are in scope for the indicator.

Coverage: The proportion of the assets in the financial product (relative to NAV), where data is available to present the indicator.

● **...and compared to previous periods?**

Sustainability Indicator	Metric	Reference Period	Metric Value	Eligibility	Coverage
Carbon Footprint	Carbon footprint	2022	242 tCO ₂ e / m€ invested	98.37 %	90.50 %

Coverage: The proportion of the assets in the financial product (relative to NAV), where data is available to present the indicator.

Since no reports covering previous periods are available, this section provides information for the current reporting period only.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The objectives of the sustainable investments that the fund partially made, was to contribute to one or several of the UN SDGs or alternatively be involved in Taxonomy-aligned activities. Sustainable investments contributed to the objectives through the fund's investments in companies that support the UN SDGs or Taxonomy-aligned activities by passing a minimum threshold for revenue alignment with UN SDGs or the EU Taxonomy.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The sustainable investments were screened to ensure that they did not significantly harm any other social or environmental objectives (DNSH test) as defined by the EU Taxonomy or any SDGs as adopted by the UN.

- **How were the indicators for adverse impacts on sustainability factors taken into account?**

Nordea Asset Management (NAM) has developed a proprietary quantitative methodology that assessed the environmental and social impact of NAM's investment universe (direct investments mainly) using multiple principal adverse impact ("PAI") indicators from Table 1 and/or Table 2 and/or Table 3 of Annex 1 of the SFDR RTS (the "PAI tool"). The methodology utilised a diverse range of data sources in order to ensure that investee companies' performance was appropriately analysed. PAI indicators were assessed in NAM's PAI tool and the results were a material part of the DNSH test.

- **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

Alignment of the Sustainable Investments with the OECD guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, was confirmed as part of the process to identify sustainable investments using Nordea Asset Management's PAI tool.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The specific PAI indicators that were taken into consideration for this fund were:

CLIMATE AND OTHER ENVIRONMENT-RELATED INDICATORS

Adverse Sustainability Indicator	Metric	Metric Value	Eligibility	Coverage

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

● What was the asset allocation?

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

The product contains investments with both an environmental and a social objective. A single investment can both contribute to an environmental and a social objective resulting in a total allocation amounting to more than 100 per cent. There is no prioritization of environmental and social objectives, and the strategy does not target any specific allocation or minimum proportion for either of these categories. The investment process accommodates the combination of environmental and social objectives by allowing the investment manager the flexibility to allocate between these based on availability and attractiveness of investment opportunities.

● **In which economic sectors were the investments made?**

Sector	Assets
Financial	25.00 %
Consumer, Non-cyclical	17.84 %
Energy	15.71 %
Basic Materials	13.66 %
Industrial	10.95 %
Communications	5.58 %
Consumer, Cyclical	4.79 %
Technology	3.79 %
Cash	1.75 %
Utilities	0.92 %
Sum	100.00 %

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 47 %.

What was the share of socially sustainable investments?

The share of socially sustainable investments was 46 %.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Cash may have been held as ancillary liquidity or for risk balancing purposes. The fund may have used derivatives and other techniques for the purposes described in the 'Fund Descriptions' in the prospectus. This category may also have included securities for which relevant data is not available.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this fund have been monitored and documented on an ongoing basis.

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Nordea 1 - Norwegian Short-Term Bond Fund

Legal entity identifier: 5493005DOEAQ8S1TVI86

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

Yes

No

It made **sustainable investments with an environmental objective:** _____%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** _____%

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 36 % of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The E/S characteristics of this fund included:

Sustainable investments Although the fund has not committed to make any sustainable investments, the fund partly invested in sustainable investments, which means companies and issuers involved in activities that contribute to an environmental or social objective as outlined in the 17 UN Sustainable Development Goals (SDGs) and/or the EU Taxonomy, while not significantly harming any other environmental or social objectives.

Sector- and value-based exclusions Exclusion filters were applied to the portfolio construction process to restrict investments in companies and issuers with material exposure to certain activities deemed to be detrimental to the environment or the society at large, including tobacco companies and fossil fuel companies.

Nordea Asset Management's Paris-Aligned Fossil Fuel policy whereby the fund did not invest in companies that have significant exposure to fossil fuels unless they have a credible transition strategy.

The fund used a benchmark that is not aligned with the fund's E/S characteristics.

● How did the sustainability indicators perform?

Sustainability Indicator	Metric	Metric Value	Eligibility	Coverage
Carbon Footprint	Carbon footprint	45 tCO ₂ e / m€ invested	98.47 %	62.54 %
Social Violations	Number of investee countries subject to social violations (absolute number and relative number divided by all investee countries), as referred to in international treaties and conventions, United Nations principles and, where applicable, national law	N/A	N/A	N/A
		N/A	N/A	N/A
Violations of United Nations Global Compact	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises	0.00 % involved in violations	98.47 %	91.34 %
Greenhouse Gas Intensity for sovereigns	GHG intensity of investee countries	N/A	N/A	N/A

Eligibility: The proportion of the assets in the financial product (relative to NAV), which are in scope for the indicator.

Coverage: The proportion of the assets in the financial product (relative to NAV), where data is available to present the indicator.

● **...and compared to previous periods?**

Sustainability Indicator	Metric	Reference Period	Metric Value	Eligibility	Coverage
Carbon Footprint	Carbon footprint	2022	45 tCO ₂ e / m€ invested	98.47 %	62.54 %
Social Violations	Number of investee countries subject to social violations (absolute number and relative number divided by all investee countries), as referred to in international treaties and conventions, United Nations principles and, where applicable, national law	2022	N/A	N/A	N/A
		2022	N/A	N/A	N/A
Violations of United Nations Global Compact	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises	2022	0.00 % involved in violations	98.47 %	91.34 %
Greenhouse Gas Intensity for sovereigns	GHG intensity of investee countries	2022	N/A	N/A	N/A

Eligibility: The proportion of the assets in the financial product (relative to NAV), which are in scope for the indicator.

Coverage: The proportion of the assets in the financial product (relative to NAV), where data is available to present the indicator.

Since no reports covering previous periods are available, this section provides information for the current reporting period only.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The objectives of the sustainable investments that the fund partially made, was to contribute to one or several of the UN SDGs or alternatively be involved in Taxonomy-aligned activities. Sustainable investments contributed to the objectives through the fund's investments in companies that support the UN SDGs or Taxonomy-aligned activities by passing a minimum threshold for revenue alignment with UN SDGs or the EU Taxonomy.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The sustainable investments were screened to ensure that they did not significantly harm any other social or environmental objectives (DNSH test) as defined by the EU Taxonomy or any SDGs as adopted by the UN.

- **How were the indicators for adverse impacts on sustainability factors taken into account?**

Nordea Asset Management (NAM) has developed a proprietary quantitative methodology that assessed the environmental and social impact of NAM's investment universe (direct investments mainly) using multiple principal adverse impact ("PAI") indicators from Table 1 and/or Table 2 and/or Table 3 of Annex 1 of the SFDR RTS (the "PAI tool"). The methodology utilised a diverse range of data sources in order to ensure that investee companies' performance was appropriately analysed. PAI indicators were assessed in NAM's PAI tool and the results were a material part of the DNSH test.

- **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

Alignment of the Sustainable Investments with the OECD guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, was confirmed as part of the process to identify sustainable investments using Nordea Asset Management's PAI tool.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The specific PAI indicators that were taken into consideration for this fund were:

CLIMATE AND OTHER ENVIRONMENT-RELATED INDICATORS

Adverse Sustainability Indicator	Metric	Metric Value	Eligibility	Coverage	
Greenhouse gas "GHG" emissions	Scope 1 GHG emissions	10,647 tCO ₂ e	98.47 %	62.54 %

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

● What was the asset allocation?

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

The product contains investments with both an environmental and a social objective. A single investment can both contribute to an environmental and a social objective resulting in a total allocation amounting to more than 100 per cent. There is no prioritization of environmental and social objectives, and the strategy does not target any specific allocation or minimum proportion for either of these categories. The investment process accommodates the combination of environmental and social objectives by allowing the investment manager the flexibility to allocate between these based on availability and attractiveness of investment opportunities.

● **In which economic sectors were the investments made?**

Sector	Assets
Financial	74.43 %
Consumer, Non-cyclical	7.22 %
Utilities	5.09 %
Basic Materials	3.81 %
Energy	3.47 %
Consumer, Cyclical	2.39 %
Cash	1.34 %
Industrial	1.05 %
Communications	0.65 %
Government bonds	0.54 %
Sum	100.00 %

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 35 %.

What was the share of socially sustainable investments?

The share of socially sustainable investments was 33 %.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Cash may have been held as ancillary liquidity or for risk balancing purposes. The fund may have used derivatives and other techniques for the purposes described in the 'Fund Descriptions' in the prospectus. This category may also have included securities for which relevant data is not available.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this fund have been monitored and documented on an ongoing basis.

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Nordea 1 - Stable Emerging Markets Equity Fund
Legal entity identifier: 549300WZ0EJWOK2LBI46

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

Yes

No

It made **sustainable investments with an environmental objective:** _____%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** _____%

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 55 % of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The E/S characteristics of this fund included:

Sustainable investments Although the fund has not committed to make any sustainable investments, the fund partly invested in sustainable investments, which means companies and issuers involved in activities that contribute to an environmental or social objective as outlined in the 17 UN Sustainable Development Goals (SDGs) and/or the EU Taxonomy, while not significantly harming any other environmental or social objectives.

Sector- and value-based exclusions Exclusion filters were applied to the portfolio construction process to restrict investments in companies and issuers with material exposure to certain activities deemed to be detrimental to the environment or the society at large, including tobacco companies and fossil fuel companies.

Nordea Asset Management's Paris-Aligned Fossil Fuel policy whereby the fund did not invest in companies that have significant exposure to fossil fuels unless they have a credible transition strategy.

The fund used a benchmark that is not aligned with the fund's E/S characteristics.

● How did the sustainability indicators perform?

Asset allocation describes the share of investments in specific assets.

● What was the asset allocation?

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

The product contains investments with both an environmental and a social objective. A single investment can both contribute to an environmental and a social objective resulting in a total allocation amounting to more than 100 per cent. There is no prioritization of environmental and social objectives, and the strategy does not target any specific allocation or minimum proportion for either of these categories. The investment process accommodates the combination of environmental and social objectives by allowing the investment manager the flexibility to allocate between these based on availability and attractiveness of investment opportunities.

● **In which economic sectors were the investments made?**

Sector	Assets
Financial	21.23 %
Consumer, Non-cyclical	17.82 %
Communications	16.35 %
Utilities	14.58 %
Technology	9.31 %
Industrial	7.82 %
Consumer, Cyclical	4.28 %
Energy	4.08 %
Basic Materials	2.37 %
Cash	1.67 %
Diversified	0.48 %
Sum	100.00 %

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 51 %.

What was the share of socially sustainable investments?

The share of socially sustainable investments was 37 %.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Cash may have been held as ancillary liquidity or for risk balancing purposes. The fund may have used derivatives and other techniques for the purposes described in the 'Fund Descriptions' in the prospectus. This category may also have included securities for which relevant data is not available.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this fund have been monitored and documented on an ongoing basis.

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Nordea 1 - Stable Return Fund

Legal entity identifier: 549300J9YLZQT0W3Z531

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

Yes

No

It made **sustainable investments with an environmental objective:** _____%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** _____%

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 63 % of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The E/S characteristics of this fund included:

Sustainable investments Although the fund has not committed to make any sustainable investments, the fund partly invested in sustainable investments, which means companies and issuers involved in activities that contribute to an environmental or social objective as outlined in the 17 UN Sustainable Development Goals (SDGs) and/or the EU Taxonomy, while not significantly harming any other environmental or social objectives.

Sector- and value-based exclusions Exclusion filters were applied to the portfolio construction process to restrict investments in companies and issuers with material exposure to certain activities deemed to be detrimental to the environment or the society at large, including tobacco companies and fossil fuel companies.

Nordea Asset Management's Paris-Aligned Fossil Fuel policy whereby the fund did not invest in companies that have significant exposure to fossil fuels unless they have a credible transition strategy.

The fund used a benchmark that is not aligned with the fund's E/S characteristics.

● How did the sustainability indicators perform?

Sustainability Indicator	Metric	Metric Value	Eligibility	Coverage
Carbon Footprint	Carbon footprint	15 tCO ₂ e / m€ invested	91.49 %	91.10 %
Social Violations	Number of investee countries subject to social violations (absolute number and relative number divided by all investee countries), as referred to in international treaties and conventions, United Nations principles and, where applicable, national law	0 investee countries subject to violations	2.48 %	2.48 %
		0.00 % investee countries subject to violations	2.48 %	2.48 %
Violations of United Nations Global Compact	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises	0.01 % involved in violations	91.49 %	90.99 %
Greenhouse Gas Intensity for sovereigns	GHG intensity of investee countries	343.50 tCO ₂ e / m€ of owned GDP	2.48 %	2.48 %

Eligibility: The proportion of the assets in the financial product (relative to NAV), which are in scope for the indicator.

Coverage: The proportion of the assets in the financial product (relative to NAV), where data is available to present the indicator.

● **...and compared to previous periods?**

Sustainability Indicator	Metric	Reference Period	Metric Value	Eligibility	Coverage
Carbon Footprint	Carbon footprint	2022	15 tCO ₂ e / m€ invested	91.49 %	91.10 %
Social Violations	Number of investee countries subject to social violations (absolute number and relative number divided by all investee countries), as referred to in international treaties and conventions, United Nations principles and, where applicable, national law	2022	0 investee countries subject to violations	2.48 %	2.48 %
		2022	0.00 % investee countries subject to violations	2.48 %	2.48 %

Eligibility: The proportion of the assets in the financial product (relative to NAV), which are in scope for the indicator.

Coverage: The proportion of the assets in the financial product (relative to NAV), where data is available to present the indicator.

Since no reports covering previous periods are available, this section provides information for the current reporting period only.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The objectives of the sustainable investments that the fund partially made, was to contribute to one or several of the UN SDGs or alternatively be involved in Taxonomy-aligned activities. Sustainable investments contributed to the objectives through the fund's investments in companies that support the UN SDGs or Taxonomy-aligned activities by passing a minimum threshold for revenue alignment with UN SDGs or the EU Taxonomy.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The sustainable investments were screened to ensure that they did not significantly harm any other social or environmental objectives (DNSH test) as defined by the EU Taxonomy or any SDGs as adopted by the UN.

- **How were the indicators for adverse impacts on sustainability factors taken into account?**

Nordea Asset Management (NAM) has developed a proprietary quantitative methodology that assessed the environmental and social impact of NAM's investment universe (direct investments mainly) using multiple principal adverse impact ("PAI") indicators from Table 1 and/or Table 2 and/or Table 3 of Annex 1 of the SFDR RTS (the "PAI tool"). The methodology utilised a diverse range of data sources in order to ensure that investee companies' performance was appropriately analysed. PAI indicators were assessed in NAM's PAI tool and the results were a material part of the DNSH test.

- **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

Alignment of the Sustainable Investments with the OECD guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, was confirmed as part of the process to identify sustainable investments using Nordea Asset Management's PAI tool.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The specific PAI indicators that were taken into consideration for this fund were:

CLIMATE AND OTHER ENVIRONMENT-RELATED INDICATORS

Adverse Sustainability Indicator	Metric	Metric Value	Eligibility	Coverage	
Greenhouse gas "GHG" emissions	GHG emissions	Scope 1 GHG emissions	55,699 tCO ₂ e	91.49 %	91.10 %

Mondelez International	Consumer, Non-cyclical	1.48 %	United States
Comcast	Communications	1.47 %	United States
Visa	Financial	1.46 %	United States

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

● What was the asset allocation?

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

The product contains investments with both an environmental and a social objective. A single investment can both contribute to an environmental and a social objective resulting in a total allocation amounting to more than 100 per cent. There is no prioritization of environmental and social objectives, and the strategy does not target any specific allocation or minimum proportion for either of these categories. The investment process accommodates the combination of environmental and social objectives by allowing the investment manager the flexibility to allocate between these based on availability and attractiveness of investment opportunities.

● **In which economic sectors were the investments made?**

Sector	Assets
Consumer, Non-cyclical	32.45 %
Financial	15.68 %
Technology	13.65 %
Communications	12.98 %
Consumer, Cyclical	8.34 %
Cash	6.75 %
Industrial	4.89 %
Government bonds	3.36 %
Utilities	1.56 %
Basic Materials	1.07 %
Energy	0.26 %
Derivatives	0.10 %
FX Forwards	-1.09 %
Sum	100.00 %

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 47 %.

What was the share of socially sustainable investments?

The share of socially sustainable investments was 51 %.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Cash may have been held as ancillary liquidity or for risk balancing purposes. The fund may have used derivatives and other techniques for the purposes described in the 'Fund Descriptions' in the prospectus. This category may also have included securities for which relevant data is not available.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this fund have been monitored and documented on an ongoing basis.

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Nordea 1 - Swedish Bond Fund

Legal entity identifier: 549300UUOKOX2ZFY6A72

Environmental and/or social characteristics

Sustainable investment

means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

Yes

No

It made **sustainable investments with an environmental objective:** _____%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** _____%

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 48 % of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The E/S characteristics of this fund included:

Sustainable investments Although the fund has not committed to make any sustainable investments, the fund partly invested in sustainable investments, which means companies and issuers involved in activities that contribute to an environmental or social objective as outlined in the 17 UN Sustainable Development Goals (SDGs) and/or the EU Taxonomy, while not significantly harming any other environmental or social objectives.

Sector- and value-based exclusions Exclusion filters were applied to the portfolio construction process to restrict investments in companies and issuers with material exposure to certain activities deemed to be detrimental to the environment or the society at large, including tobacco companies and fossil fuel companies.

Nordea Asset Management's Paris-Aligned Fossil Fuel policy whereby the fund did not invest in companies that have significant exposure to fossil fuels unless they have a credible transition strategy.

The fund used a benchmark that is not aligned with the fund's E/S characteristics.

● How did the sustainability indicators perform?

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

● What was the asset allocation?

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

The product contains investments with both an environmental and a social objective. A single investment can both contribute to an environmental and a social objective resulting in a total allocation amounting to more than 100 per cent. There is no prioritization of environmental and social objectives, and the strategy does not target any specific allocation or minimum proportion for either of these categories. The investment process accommodates the combination of environmental and social objectives by allowing the investment manager the flexibility to allocate between these based on availability and attractiveness of investment opportunities.

● **In which economic sectors were the investments made?**

Sector	Assets
Financial	60.89 %
Government bonds	22.88 %
Consumer, Cyclical	6.58 %
Industrial	5.49 %
Consumer, Non-cyclical	2.24 %
Cash	1.54 %
Derivatives	0.39 %
FX Forwards	0.00 %
Sum	100.00 %

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 47 %.

What was the share of socially sustainable investments?

The share of socially sustainable investments was 45 %.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Cash may have been held as ancillary liquidity or for risk balancing purposes. The fund may have used derivatives and other techniques for the purposes described in the 'Fund Descriptions' in the prospectus. This category may also have included securities for which relevant data is not available.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this fund have been monitored and documented on an ongoing basis.

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Nordea 1 - Swedish Short-Term Bond Fund

Legal entity identifier: 549300EYJ804J45M4043

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

Yes

No

It made **sustainable investments with an environmental objective:** _____%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** _____%

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 51 % of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The E/S characteristics of this fund included:

Sustainable investments Although the fund has not committed to make any sustainable investments, the fund partly invested in sustainable investments, which means companies and issuers involved in activities that contribute to an environmental or social objective as outlined in the 17 UN Sustainable Development Goals (SDGs) and/or the EU Taxonomy, while not significantly harming any other environmental or social objectives.

Sector- and value-based exclusions Exclusion filters were applied to the portfolio construction process to restrict investments in companies and issuers with material exposure to certain activities deemed to be detrimental to the environment or the society at large, including tobacco companies and fossil fuel companies.

Nordea Asset Management's Paris-Aligned Fossil Fuel policy whereby the fund did not invest in companies that have significant exposure to fossil fuels unless they have a credible transition strategy.

The fund used a benchmark that is not aligned with the fund's E/S characteristics.

● How did the sustainability indicators perform?

Sustainability Indicator	Metric	Metric Value	Eligibility	Coverage
Carbon Footprint	Carbon footprint	13 tCO ₂ e / m€ invested	99.14 %	84.43 %
Social Violations	Number of investee countries subject to social violations (absolute number and relative number divided by all investee countries), as referred to in international treaties and conventions, United Nations principles and, where applicable, national law	N/A	N/A	N/A
		N/A	N/A	N/A
Violations of United Nations Global Compact	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises	0.00 % involved in violations	99.14 %	90.58 %
Greenhouse Gas Intensity for sovereigns	GHG intensity of investee countries	N/A	N/A	N/A

Eligibility: The proportion of the assets in the financial product (relative to NAV), which are in scope for the indicator.

Coverage: The proportion of the assets in the financial product (relative to NAV), where data is available to present the indicator.

● **...and compared to previous periods?**

Sustainability Indicator	Metric	Reference Period	Metric Value	Eligibility	Coverage
Carbon Footprint	Carbon footprint	2022	13 tCO2e / m€ invested	99.14 %	84.43 %
Social Violations	Number of investee countries subject to social violations (absolute number and relative number divided by all investee countries), as referred to in international treaties and conventions, United Nations principles and, where applicable, national law	2022	N/A	N/A	N/A
		2022	N/A	N/A	N/A
Violations of United Nations Global Compact	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises	2022	0.00 % involved in violations	99.14 %	90.58 %
Greenhouse Gas Intensity for sovereigns	GHG intensity of investee countries	2022	N/A	N/A	N/A

Eligibility: The proportion of the assets in the financial product (relative to NAV), which are in scope for the indicator.

Coverage: The proportion of the assets in the financial product (relative to NAV), where data is available to present the indicator.

Since no reports covering previous periods are available, this section provides information for the current reporting period only.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The objectives of the sustainable investments that the fund partially made, was to contribute to one or several of the UN SDGs or alternatively be involved in Taxonomy-aligned activities. Sustainable investments contributed to the objectives through the fund's investments in companies that support the UN SDGs or Taxonomy-aligned activities by passing a minimum threshold for revenue alignment with UN SDGs or the EU Taxonomy.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The sustainable investments were screened to ensure that they did not significantly harm any other social or environmental objectives (DNSH test) as defined by the EU Taxonomy or any SDGs as adopted by the UN.

- **How were the indicators for adverse impacts on sustainability factors taken into account?**

Nordea Asset Management (NAM) has developed a proprietary quantitative methodology that assessed the environmental and social impact of NAM's investment universe (direct investments mainly) using multiple principal adverse impact ("PAI") indicators from Table 1 and/or Table 2 and/or Table 3 of Annex 1 of the SFDR RTS (the "PAI tool"). The methodology utilised a diverse range of data sources in order to ensure that investee companies' performance was appropriately analysed. PAI indicators were assessed in NAM's PAI tool and the results were a material part of the DNSH test.

- **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

Alignment of the Sustainable Investments with the OECD guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, was confirmed as part of the process to identify sustainable investments using Nordea Asset Management's PAI tool.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The specific PAI indicators that were taken into consideration for this fund were:

CLIMATE AND OTHER ENVIRONMENT-RELATED INDICATORS

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

● What was the asset allocation?

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

The product contains investments with both an environmental and a social objective. A single investment can both contribute to an environmental and a social objective resulting in a total allocation amounting to more than 100 per cent. There is no prioritization of environmental and social objectives, and the strategy does not target any specific allocation or minimum proportion for either of these categories. The investment process accommodates the combination of environmental and social objectives by allowing the investment manager the flexibility to allocate between these based on availability and attractiveness of investment opportunities.

● **In which economic sectors were the investments made?**

Sector	Assets
Financial	46.51 %
Industrial	23.84 %
Consumer, Non-cyclical	15.31 %

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 44 %.

What was the share of socially sustainable investments?

The share of socially sustainable investments was 47 %.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

Cash may have been held as ancillary liquidity or for risk balancing purposes. The fund may have used derivatives and other techniques for the purposes described in the ‘Fund Descriptions’ in the prospectus. This category may also have included securities for which relevant data is not available.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this fund have been monitored and documented on an ongoing basis.

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Nordea 1 - US Corporate Stars Bond Fund

Legal entity identifier: 549300V3BOFEO3N8NJ79

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

Yes

No

It made **sustainable investments with an environmental objective:** _____%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** _____%

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 59 % of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The E/S characteristics of this fund included:

Minimum proportion of sustainable investments The fund partly invested in sustainable investments, which means companies and issuers involved in activities that contribute to an environmental or social objective as outlined in the 17 UN Sustainable Development Goals (SDGs) and/or the EU Taxonomy, while not significantly harming any other environmental or social objectives.

ESG scoring The fund invested in companies that have been analysed and scored in Nordea Asset Management's proprietary ESG platform to ensure that only securities issued by companies that met the minimum required ESG score were eligible for inclusion.

Sector- and value-based exclusions Exclusion filters were applied to the portfolio construction process to restrict investments in companies and issuers with material exposure to certain activities deemed to be detrimental to the environment or the society at large, including tobacco companies and fossil fuel companies.

Nordea Asset Management's Paris-Aligned Fossil Fuel policy whereby the fund did not invest in companies that have significant exposure to fossil fuels unless they have a credible transition strategy.

The fund used a benchmark that is not aligned with the fund's E/S characteristics.

● How did the sustainability indicators perform?

Sustainability Indicator	Metric	Metric Value	Eligibility	Coverage
Carbon Footprint	Carbon footprint	120 tCO ₂ e / m€ invested	92.48 %	90.62 %
Social Violations	Number of investee countries subject to social violations (absolute number and relative number divided by all investee countries), as referred to in international treaties and conventions, United Nations principles and, where applicable, national law	0 investee countries subject to violations	6.07 %	6.07 %

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

● What was the asset allocation?

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

The product contains investments with both an environmental and a social objective. A single investment can both contribute to an environmental and a social objective resulting in a total allocation amounting to more than 100 per cent. There is no prioritization of environmental and social objectives, and the strategy does not target any specific allocation or minimum proportion for either of these categories. The investment process accommodates the combination of environmental and social objectives by allowing the investment manager the flexibility to allocate between these based on availability and attractiveness of investment opportunities.

● **In which economic sectors were the investments made?**

Sector	Assets
Financial	37.28 %
Consumer, Non-cyclical	13.27 %
Consumer, Cyclical	11.31 %
Communications	9.95 %
Technology	8.21 %
Industrial	6.78 %
Utilities	6.15 %
Government bonds	4.87 %
Cash	1.40 %
Basic Materials	0.78 %
Derivatives	0.00 %
Sum	100.00 %

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 50 %.

What was the share of socially sustainable investments?

The share of socially sustainable investments was 53 %.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Cash may have been held as ancillary liquidity or for risk balancing purposes. The fund may have used derivatives and other techniques for the purposes described in the 'Fund Descriptions' in the prospectus. This category may also have included securities for which relevant data is not available.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this fund have been monitored and documented on an ongoing basis.

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Nordea 1 - US Total Return Bond Fund

Legal entity identifier: 549300MO84XW9D10JW85

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

Yes

No

It made **sustainable investments with an environmental objective:** _____%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** _____%

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 22 % of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The E/S characteristics of this fund included:

Sustainable investments Although the fund has not committed to make any sustainable investments, the fund partly invested in sustainable investments, which means companies and issuers involved in activities that contribute to an environmental or social objective as outlined in the 17 UN Sustainable Development Goals (SDGs) and/or the EU Taxonomy, while not significantly harming any other environmental or social objectives.

Sector- and value-based exclusions Exclusion filters were applied to the portfolio construction process to restrict investments in companies and issuers with material exposure to certain activities deemed to be detrimental to the environment or the society at large, including tobacco companies and fossil fuel companies.

Nordea Asset Management's Paris-Aligned Fossil Fuel policy whereby the fund did not invest in companies that have significant exposure to fossil fuels unless they have a credible transition strategy.

The fund used a benchmark that is not aligned with the fund's E/S characteristics.

● How did the sustainability indicators perform?

Sustainability Indicator	Metric	Metric Value	Eligibility	Coverage
Carbon Footprint	Carbon footprint	0 tCO ₂ e / m€ invested	86.52 %	38.26 %
Social Violations	Number of investee countries subject to social violations (absolute number and relative number divided by all investee countries), as referred to in international treaties and conventions, United Nations principles and, where applicable, national law	0 investee countries subject to violations	11.73 %	11.73 %
		0.00 % investee countries subject to violations	11.73 %	11.73 %
Violations of United Nations Global Compact	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises	N/A	N/A	N/A
Greenhouse Gas Intensity for sovereigns	GHG intensity of investee countries	343.52 tCO ₂ e / m€ of owned GDP	11.73 %	11.73 %

Eligibility: The proportion of the assets in the financial product (relative to NAV), which are in scope for the indicator.

Coverage: The proportion of the assets in the financial product (relative to NAV), where data is available to present the indicator.

● **...and compared to previous periods?**

Sustainability Indicator	Metric	Reference Period	Metric Value	Eligibility	Coverage
Carbon Footprint	Carbon footprint	2022	0 tCO ₂ e / m€ invested	86.52 %	38.26 %
Social Violations	Number of investee countries subject to social violations (absolute number and relative number divided by all investee countries), as referred to in international treaties and conventions, United Nations principles and, where applicable, national law	2022	0 investee countries subject to violations	11.73 %	11.73 %
		2022	0.00 % investee countries subject to violations	11.73 %	11.73 %
Violations of United Nations Global Compact	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises	2022	N/A	N/A	N/A
Greenhouse Gas Intensity for sovereigns	GHG intensity of investee countries	2022	343.52 tCO ₂ e / m€ of owned GDP	11.73 %	11.73 %

Eligibility: The proportion of the assets in the financial product (relative to NAV), which are in scope for the indicator.

Coverage: The proportion of the assets in the financial product (relative to NAV), where data is available to present the indicator.

Since no reports covering previous periods are available, this section provides information for the current reporting period only.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The objectives of the sustainable investments that the fund partially made, was to contribute to one or several of the UN SDGs or alternatively be involved in Taxonomy-aligned activities. Sustainable investments contributed to the objectives through the fund's investments in companies that support the UN SDGs or Taxonomy-aligned activities by passing a minimum threshold for revenue alignment with UN SDGs or the EU Taxonomy.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The sustainable investments were screened to ensure that they did not significantly harm any other social or environmental objectives (DNSH test) as defined by the EU Taxonomy or any SDGs as adopted by the UN.

- **How were the indicators for adverse impacts on sustainability factors taken into account?**

Nordea Asset Management (NAM) has developed a proprietary quantitative methodology that assessed the environmental and social impact of NAM's investment universe (direct investments mainly) using multiple principal adverse impact ("PAI") indicators from Table 1 and/or Table 2 and/or Table 3 of Annex 1 of the SFDR RTS (the "PAI tool"). The methodology utilised a diverse range of data sources in order to ensure that investee companies' performance was appropriately analysed. PAI indicators were assessed in NAM's PAI tool and the results were a material part of the DNSH test.

- **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

Alignment of the Sustainable Investments with the OECD guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, was confirmed as part of the process to identify sustainable investments using Nordea Asset Management's PAI tool.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The specific PAI indicators that were taken into consideration for this fund were:

CLIMATE AND OTHER ENVIRONMENT-RELATED INDICATORS

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

● What was the asset allocation?

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

The product contains investments with both an environmental and a social objective. A single investment can both contribute to an environmental and a social objective resulting in a total allocation amounting to more than 100 per cent. There is no prioritization of environmental and social objectives, and the strategy does not target any specific allocation or minimum proportion for either of these categories. The investment process accommodates the combination of environmental and social objectives by allowing the investment manager the flexibility to allocate between these based on availability and attractiveness of investment opportunities.

● In which economic sectors were the investments made?

Sector	Assets
Mortgage securities	76.73 %
Government bonds	11.32 %
Asset backed Securities	9.34 %
Cash	2.19 %
Basic Materials	0.26 %
Consumer, Cyclical	0.17 %
Sum	100.00 %

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 15 %.

What was the share of socially sustainable investments?

The share of socially sustainable investments was 22 %.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

Cash may have been held as ancillary liquidity or for risk balancing purposes. The fund may have used derivatives and other techniques for the purposes described in the ‘Fund Descriptions’ in the prospectus. This category may also have included securities for which relevant data is not available.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this fund have been monitored and documented on an ongoing basis.

(*) No performance is calculated for Sub-funds liquidated/merged or launched during the year. Thus, the Sub-fund is not disclosed.

No performance is calculated if the share class has opened or closed during the corresponding year. Thus, the share class may not be disclosed if there is no performance for the three years.

(**) Past performance is no indication of current or future performance. These performance data do not take account of the commissions and costs incurred on the issue and redemption of units.

(*) No performance is calculated for Sub-funds liquidated/merged or launched during the year. Thus, the Sub-fund is not disclosed.

No performance is calculated if the share class has opened or closed during the corresponding year. Thus, the share class may not be disclosed if there is no performance for the three years.

(**) Past performance is no indication of current or future performance. These performance data do not take account of the commissions and costs incurred on the issue and redemption of units.

(*) No performance is calculated for Sub-funds liquidated/merged or launched during the year. Thus, the Sub-fund is not disclosed.

No performance is calculated if the share class has opened or closed during the corresponding year. Thus, the share class may not be disclosed if there is no performance for the three years.

(**) Past performance is no indication of current or future performance. These performance data do not take account of the commissions and costs incurred on the issue and redemption of units.

(*) No performance is calculated for Sub-funds liquidated/merged or launched during the year. Thus, the Sub-fund is not disclosed.

No performance is calculated if the share class has opened or closed during the corresponding year. Thus, the share class may not be disclosed if there is no performance for the three years.

(**) Past performance is no indication of current or future performance. These performance data do not take account of the commissions and costs incurred on the issue and redemption of units.

Subject to Italian law and custom, a paying agent in Italy may distribute fund shares through a saving plan. Retail investors residing in Italy can direct a paying agent in that country to either submit dealing requests to the SICAV on their behalf (grouped by fund or distributor), register shares in the name of the retail investor or a nominee, and perform all services relating to the exercise of shareholder rights. See the Italian application form for details.
