

Nordea 2 - BetaPlus Enhanced Global Developed Sustainable Equity Fund (BI-EUR)

Any investment decision in the sub-funds should be made on the basis of the current prospectus and the Key Information Document (KID) or Key Investor Information Document (KIID) for UK investors. Advertising Material

Investment objective

The fund uses a proprietary, quantitative investment process aiming to provide investment growth in the long term with a low tracking error, no regional bets and limited sector active risk. Based on risk premia or factors, the long only equity strategy focuses on companies that appear to offer superior growth prospects and investment characteristics. The fund selects companies with a particular focus on their sustainability characteristics, through the integration of environmental, social, and governance factors. Actively managed. Benchmark used for performance comparison only. Risk characteristics of the fund's portfolio will bear resemblance to those of the benchmark.

Discrete year performance / Historical performance

Cumulative / Annualised performance (in %)

Performance	Fund		Benchmark	
	Cumulative	Annualised	Cumulative	Annualised
Year To Date	15.87		15.76	
1 month	1.08		0.95	
3 months	3.04		2.26	
1 year	20.57	20.57	19.23	19.23
3 years				
5 years				
Since Launch	37.70	14.95	36.90	14.65

Monthly performance (in %)

Year	Jan	Feb	Mar	Apr	May	Jun	Jul	Aug	Sep	Oct	Nov	Dec	Total
2026	-0.26	1.79	-4.85	7.98	5.57	2.11	0.87	1.06	1.08				15.87
2025	3.52	-2.39	-7.95	-3.76	7.79	0.91	5.15	-0.64	2.16	4.43	-0.08	-0.28	8.16
2024							-0.03	0.52	0.69	1.38	6.54	-0.84	

Performances are in EUR

The performance represented is historical; past performance is not a reliable indicator of future results and investors may not recover the full amount invested. The value of your investment can go up and down, and you could lose some or all of your invested money.

Return distribution (Since inception)

Source (unless otherwise stated): Nordea Investment Funds S.A. Period under consideration (unless otherwise stated): 31/08/2026 - 30/09/2026. Performance calculated NAV to NAV (net of fees and Luxembourg taxes) in the currency of the respective share class, gross income and dividends reinvested, excluding initial and exit charges as per 30/09/2026. Initial and exit charges could affect the value of the performance. **The performance represented is historical; past performance is not a reliable indicator of future results and investors may not recover the full amount invested. The value of your investment can go up and down, and you could lose some or all of your invested money.** If the currency of the respective share class differs from the currency of the country where the investor resides the represented performance might vary due to currency fluctuations.

ESG Considerations

ESG characteristics help investors consider non-financial ESG factors in their investment decisions, providing insights into a fund's management and long-term prospects. The metrics below, based on various ESG data source providers, are for transparency and informational purposes only and do not alter a fund's investment objective or restrict its investable universe unless explicitly stated in the fund's documentation. For details on a fund's investment strategy, please see its prospectus.

Environmental and Social Characteristics

- ✓ Carbon footprint scope 1 and 2 limit
- ✓ ESG rating
- ✓ Minimum ESG rating and quality score
- ✓ Minimum proportion of sustainable investments
- ✓ NAM's Paris-Aligned Fossil Fuel Policy
- ✓ Sector- and value-based exclusions

ESG Investment Strategy Summary

The fund is managed according to the BetaPlus Sustainable Enhanced investment strategy which employs a comprehensive ESG integration strategy, blending financial objectives with environmental and social responsibility. We maintain a minimum allocation of 50% to sustainable investments, as defined by SFDR, using our proprietary methodology aligned with UN SDGs and EU Taxonomy objectives. The fund's total carbon footprint will be at least 25% lower than its benchmark, measured by the scope 1 & 2 greenhouse gas emissions. The fund's average ESG Quality score, as defined by a selected external provider will be consistently higher than its benchmark and its ESG rating will be at least equal to A. Exposure to companies involved in fossil fuel related activities is restricted through NAM's Paris aligned Fossil Fuel Policy. The strategy applies PAB exclusions and other sector and value-based exclusions and the fund does not invest in companies that are on Nordea's exclusion list. As part of the investment process, companies are screened to ensure that they follow good governance practices.

Carbon footprint

The carbon footprint is calculated as total greenhouse gas emissions (scope 1 and 2) for a portfolio, normalised by investee companies' enterprise value, measured in tons CO2e / M€ invested. The carbon footprint expresses the share of companies' and issuers' greenhouse gas emissions that is owned or funded by the fund's investments.

ESG legend

Scope 1 refers to direct GHG emissions, Scope 2 refers to indirect GHG emissions from the consumption of purchased electricity and Scope 3 refers to other indirect emissions that occur from sources not owned or controlled by the company.

The metrics are used for illustrative purposes only and solely rely on MSCI ESG Research views © 2026 MSCI ESG Research LLC. Reproduced by permission. Although Nordea Investment Management AB's information providers, including without limitation, MSCI ESG Research LLC and its affiliates (the "ESG Parties"), obtain information from sources they consider reliable, none of the ESG Parties warrants or guarantees the originality, accuracy and/or completeness of any data herein. Risk & Reward Profile (RRP)

The risk indicator assumes you keep the product for 5 years. The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you. We have classified this Fund as 4 out of 7, which is a medium risk class. This rates the potential losses from future performance at a medium level, and poor market conditions could impact the Fund's capacity to pay you. Be aware of currency risk. In some circumstances you will receive payments in a different currency, so the final return you will get depend on the exchange rate between the two currencies. This risk is not considered in the indicator shown above. For more information on risks the fund is exposed to, please refer to the section "Risk Descriptions" of the prospectus. Other risks materially relevant to the PRIIP not included in the summary risk indicator:

Derivatives risk: Small movements in the value of an underlying asset can create large changes in the value of a derivative, making derivatives highly volatile in general, and exposing the fund to potential losses significantly greater than the cost of the derivative.

This product does not include any protection from future market performance so you could lose some or all of your investment.

Glossary / Definition of Terms

Absolute contribution

Total contribution of a security or fund achieved over a specific period, it is not measured relative to a benchmark.

Alpha

The risk-adjusted excess return relative to the benchmark, resulting from portfolio active management. It reflects the portion of the excess return that is not explained by systemic risk.

Beta

A measurement of the volatility of returns relative to the overall market beta equal to one. A security with beta higher (lower) than one has greater (lower) risk relative to the broad market.

Commitment

Represented by the sum of notional, or the sum of the commitments of individual derivatives after netting and hedging.

Correlation

The degree to which two variables move together. The metric assumes values between -1 and 1. A positive (negative) correlation means that variables move in the same (opposite) direction(s). If there is no relationship between each other, the correlation will be close to zero.

Dividend Yield

Annual dividends per share divided by share price.

Forward Earning Per Share

Net earnings (12M forward) available to common shareholders divided by the weighted average number of common shares outstanding.

Forward Price to Earning Ratio

The ratio of share price to forecasted 12M earnings per share.

Fund VaR

The probability-based estimate of the minimum loss over a period of time (horizon), given a certain confidence level, presented as percentage of the assets under management of the fund.

Information ratio EOD

A measure of risk-adjusted return that is defined as the excess annual return of the portfolio over its benchmark (active return) relative to the variability of that excess return (tracking error). It is used to assess the added value of the active management. Information Ratio is calculated using end-of-day (EOD) portfolio pricing, which eliminates timing discrepancies between the fund and benchmark valuations, providing a more precise measurement of the risk profile of the portfolio's holdings. EOD information ratio is calculated at portfolio level, gross of fees and in the base currency of the portfolio.

Market Capitalisation

Total value of all company's outstanding shares at the current market price.

Maximum Drawdown

The largest loss measured from peak to trough until a new peak is attained. Note it only measures the size of the largest loss, without taking into consideration the frequency of large losses.

NAV

Net Asset Value, the total value of a fund's assets less its liabilities.

Ongoing charges

It is an estimate of the charges that excludes performance related fees and transaction costs including third party brokerage fees and bank charges on securities transactions.

Physical instruments

An item of economic, commercial or exchange value that has a material existence.

Price to book Ratio

A valuation ratio calculated as price per share divided by book value per share.

SFDR

Sustainable Finance Disclosure Regulation, a European legislation which applies to products manufactured in the EU.

Tracking error EOD

The volatility of the difference between the returns of an investment and its benchmark. The lower the number, the closer the portfolio's historic performance has followed the benchmark performance. Tracking error is calculated using end-of-day (EOD) portfolio pricing, which eliminates timing discrepancies between the fund and benchmark valuations, providing a more precise measurement of the risk profile of the portfolio's holdings. EOD tracking error is calculated at portfolio level, gross of fees and in the base currency of the portfolio.

Volatility

A statistical measure of the fluctuations of a security's price. It can also be used to describe fluctuations in a particular market. High volatility is an indication of higher risk.

Disclaimer

Nordea Asset Management is the functional name of the asset management business conducted by the legal entities Nordea Investment Funds S.A., Nordea Investment Management AB and Nordea Funds Ltd and their branches and subsidiaries. The funds mentioned are part of Nordea 2, SICAV, an open-ended Luxembourg-based investment company. The prospectus, the Key Information Document (KID) and the Key Investor Information Document (KIID) for UK investors, and the annual and semi-annual reports are available electronically in English and in the local language of the market where the mentioned SICAV is authorised for distribution, without charge upon request from the management company Nordea Investment Funds S.A., 562, rue de Neudorf, P.O.
