Nordea Asset Management (NAM) Cookie Policy for the Web Training

"Responsible Investment"

Cookies

What are cookies?

Cookies are small text files that contain letters and numbers and are placed on your computer or device. Cookies are set when you visit a website that uses cookies and may be used to keep track of pages visited within the site, help you continue where you left off or remember your preferences, such as market domain, investor type and language settings.

Why do we use cookies in this training?

We use cookies to track your progress through the training so that you can continue at a later time if you can't finish it during a single session.

The data will not be used to identify individual visitors.

If you wish to control and remove cookies, this can be done via settings in your web browser, as described in more detail below. We use different types of cookies on each country-specific website.

The following categories of cookies are NOT used by the training:

Cookies for marketing, anonymous cross site tracking:

These cookies can be used to track visitors across websites. They can be used to build up a profile of search and/or browsing history for every visitor.

Cookies for marketing and targeted advertising:

These cookies can be used to track browsing habits and activity. This information can be used to enable relevant/personalized marketing content to the visitor.

How to manage and reject cookies

You can set or amend your web browser controls to accept or reject cookies. Please be aware that restricting cookies may impact the functionality of a website. Many of the interactive functions offered by websites are dependent on cookies and disabling or blocking cookies can prevent these services from working or reduce their usefulness.

If you choose to reject cookies for this training, your progress will not be saved between sessions. You can still complete the training, if you do it all in one session.

Different web browsers may use different methods for managing cookies. Please follow the instructions below, directly from the web browser manufacturers, to configure your browser settings*.

- Microsoft Internet Explorer (IE)
- Google Chrome
- Safari
- Firefox
