

ESG Report

Nordea 1 – European High Yield Stars Bond Fund

Second quarter 2021

Nordea 1 – European High Yield Stars Bond Fund

This report highlights how portfolio companies - through their products and services - have positive and negative impact on 15 objectives closely aligned with the UN Sustainable Development Goals. While engagement is always a preferred approach, we have made a corporate-level decision to exclude certain stocks, sectors, and practices across our entire active funds range. We don't invest in companies involved in production of illegal or nuclear weapons, cluster munitions, anti-personnel mines, nor maintenance of nuclear weapons. We also exclude companies deriving more than 30% of their revenues from coal (incl. metallurgical coal), more than 10% from thermal coal, or more than 10% from oil sand. Our detailed [RI policy](#) and our [corporate exclusion list](#) are publicly available at nordea.com. Furthermore, companies deriving more than 5% of their revenues from fossil fuels must demonstrate a transition strategy aligned with a 2°C target to be part of our Paris-Aligned Fossil Fuel List or will be excluded. Further information on our fossil fuel policy is available [here](#).

Total sustainability score (vs benchmark)

The chart below shows the contribution of the portfolio holdings products and services to both environment and social considerations compared to companies held in the benchmark.

The contribution of the portfolio to the 15 objectives (social and environmental) is 24.9x higher than the benchmark.

1) The relative score is calculated as follows: (Portfolio net score) / (Benchmark net score). Should the score of the benchmark be close to nil the relative score multiple might be distorted. Comparison with other financial products or benchmarks is only meant for indicative purposes.

Carbon intensity

Please note that the carbon intensity is not calculated for the benchmark as the coverage is deemed low (below 75%)

Comparison with other financial products or benchmarks is only meant for indicative purposes.

Top contributors

1. Grifols S.A (ES, Pharmaceuticals & Biotech). The company mainly contributes to the social objective 'Ensuring Health' as it develops, manufactures, and distributes a range of biological medicines on plasma derived proteins worldwide.

2. Progroup AG (DE, Paper & Forest Products). The company mainly contributes to the environmental objective 'Optimising Material Use' as it produces and supplies corrugated sheet boards and recycled containerboards primarily for family-owned box manufacturing customers.

3. Verisure Midholding AB (SE, Electronic Devices & Appliances). The company mainly adds to the environmental objective 'Safeguarding Peace' as it produces and sells products that help to prevent crime and personal as well as material damage.

Notes

Benchmark	ICE BofA European Currency High Yield Constrained Index - Total Return 100% Hedged to EUR
Portfolio coverage	58%
Benchmark coverage	72%
Portfolio holdings	136

Exposure to the 7 social objectives²

The contribution of the portfolio to the 7 social objectives is 1.8x higher than the benchmark.

Comparison with other financial products or benchmarks is only meant for indicative purposes.

Top 3 social objectives

1. Providing basic services
2. Ensuring health
3. Safeguarding peace

Main SDGs exposure

Exposure to the 8 environmental objectives²

The contribution of the portfolio to the 8 environmental objectives is 4.0x higher than the benchmark.

Comparison with other financial products or benchmarks is only meant for indicative purposes.

Top 3 environmental objectives

1. Optimising material use
2. Achieving sustainable agriculture and forestry
3. Mitigating climate change

Main SDGs exposure

Portfolio Company highlight: IQVIA

IQVIA Holdings offers services to pharmaceutical companies and the healthcare industry, including clinical trials, IT-services, marketing data and marketing of newly released products. Some of the company's specialist services to healthcare companies can be regarded as a significant contribution to public health. Although at a small-scale compared to its overall business activities, IQVIA also conducts some projects in the area of neglected tropical and microbial diseases.

² Please note that the total sustainability score is the sum of the social and environmental scores and may slightly differ due to rounding differences. Should the benchmark score be negative the multiplier is calculated as follow: (Portfolio score + 1) / (Benchmark score + 1). Further information on SDGs is available at www.un.org/development/desa/en/news/sustainable/sustainable-development-goals.html. Sources: Nordea Investment Funds S.A., ISS-ESG, United Nations Sustainable Development Goals.

Engagement is key for active ownership

The aim of this section is to describe some of the activities that the Responsible Investment (RI) team has done over the last quarter for this specific fund. This tool, therefore, is not meant to be fully comprehensive, but to allow investors to follow-up on the fund's relevant ESG-related issues (Environmental, Social and Governance) and the main activities that the RI team has been involved in.

Being part of Nordea's responsible investment policy, the fund excludes companies involved in the production of nuclear weapons and cluster munitions as well as companies with large exposure to coal mining (>30% revenues). However, excluding a company from our portfolios is always a last resort: the **STARS concept aims for positive selection** with the objective to influence companies to improve their ESG profiles. **Engagement therefore takes a new dimension with the STARS.** It does not only consist of the traditional forms of engagement, like the exercise of voting rights or entering into a dialogue to encourage companies to improve their management systems, their ESG performance or their reporting. When assessing a company's ESG risk profile we also focus on specific themes utilising UN Sustainable Development Goals. Thus, we distinguish two types of engagement:

- **Risk Engagement:** if a company is not managing its material ESG risks well, the RI team engages with the company on the issue. The ESG risks can be company specific or stem from the country in which the company operates or its industry. Violations of international norms and conventions are also addressed under Risk Engagement.
- **SDG Engagement:** conducted with a specific focus on companies' exposure to certain themes, which might represent a significant material risk for the company. **Nordea believes that companies that align their strategies with the UN Sustainable Development Goals (SDGs) will be successful** in the long-term, because they are adjusting to global society's future needs.

Engagement cases

Banca Monte dei Paschi di Siena

Nordea ESG scoring ³	Proxy Voting ⁴	SDG Engagement	Engagement topic
B-	✓	16 Peace, justice and strong institutions	Corporate Governance – Anti-Money Laundering

Overview

Banca Monte dei Paschi di Siena SpA is an Italy-based company engaged in the banking sector. It provides banking services, asset management and private banking, including life insurance, pension funds and investment trusts.

Background

Following the financial crisis, Banca Monte Dei Paschi Di Siena has suffered financially and reputationally. Additionally, the bank's compliance and Anti-Money Laundering function has come under increased scrutiny. Our research indicates that the bank trails its peers on several material ESG issues. Particularly on the topic of AML risk, the company exhibits a combination of characteristics that could limit its oversight and control. The

objective of the initial engagement meeting was therefore to scrutinize its AML function and associated key challenges.

The Engagement

We have initiated the engagement with Banca Monte Dei Paschi as our initial ESG analysis has revealed that the company's Anti-Money Laundering processes and risk assessments might be a topic of concern and required increased due diligence from our side. We spoke to the bank's Head of Sustainability, several employees from the Investor Relations function as well as an employee from the Anti-Money Laundering function.

During our virtual meeting with them, it has become apparent, that Banca Monte Dei Paschi has standard AML procedures in place, monitoring the transactions of both private and corporate customers with local and global reach. The bank

3) Current scoring, based on Nordea proprietary ESG model. 4) Proxy voting refers to the last 12 month-period. Generally, we vote in annual reports and most of the Annual General Meetings (AGM) which occurs once a year. If there is no vote, it is generally because the fund was not invested at the time when the AGM happened. Please find out more on nordea.com/sustainability or access directly the [voting portal](#).

operates a team in its middle office, handling international transactions and verifying with relevant sanctions lists. On the technical side, we have been reassured that the bank uses state of the art transaction screening software which is used by most of its competitors. However, based on our discussion, we see potential for improvement in the bank's ability to act on and escalate suspicious transactions to the Bank of Italy. Banca Monte Dei Paschi's average time for a red-flagged transaction to be sent to the Bank of Italy is 30 days which is less timely than average according to the Bank of Italy itself.

Further, the company is working on a scoring system to better evaluate and find high risk clients and is currently considering expanding its AML section in the company's sustainability report.

Outcome

With the responsibility for several subsidiaries converging into Banca Monte Dei Paschi, the bank needs to systematically improve its Anti-Money Laundering function in order to identify relevant cases in a timely manner. We have encouraged the company to further improve its technical setup for its Anti-Money Laundering function. This includes investing in technology to screen transactions more efficiently with potential application of artificial intelligence and machine learning, as it is best practice among European banks. We have also supported the company's plans to expand on its AML section in its sustainability report, as it would add value for shareholders.

SoftBank Group Corp.

Nordea ESG scoring ³	Proxy Voting ⁴	SDG Engagement	Engagement topic
B	✓	16 Peace, justice and strong institutions	Governance, Sustainability Governance, ESG risk management

Overview

Softbank Group Corp. is a holding company. The company is engaged in various businesses in the information industry.

Background

The company's main weakness is related to governance, both corporate governance and sustainability governance. Concerns over strong influence from founder side and weak ESG risk analysis procedures are the main points of contention. Further, the company has recently been involved in several controversies which we have requested further details and clarification on. In early 2021, the company has started to transform itself into a strategic investment company, which has taken up resources and came with substantial changes. The company's strategic transformation raises additional questions on governance and ESG, which has been point of departure for our engagement.

The Engagement

We initiated engagement with the company during the quarter focusing on the company's governance structure as well as its ESG risk analysis and due diligence capabilities for its investments. During the meeting the company has expanded on the lessons learned and explained its renewed governance structure that has been recently changed.

As an investment company, Softbank Group states to not only cover Governance aspects in its risk analysis, as it has been

previously, but also pledged to implement Environmental and Social risk analysis. The current process appears to allow for deep dives into ESG aspects of an investment, if an initial analysis raises related concerns. The company revealed to monitor ESG risk in its investments, but not to engage on them. However, it has become clear that the company's ESG considerations are in the early stages.

With regards to sustainability governance, a sustainability committee is in place and reports to the Chief Sustainability Officer.

Outcome

The company exhibits basic awareness of the relevance of ESG and sustainability aspects. With regards to ESG specifically, we have encouraged the company to formalize a detailed ESG risk analysis process that goes beyond the vague procedures the company has currently in place. The company has agreed to assign its ESG risk analysis a high priority. In order to strengthen their efforts, the company aims at having an appropriate ESG process in each investment arm. We will remain vigilant of the company's development in this regard. Given some soft answers Softbank Group has provided, and based on its controversy exposure, we see a need to continue our engagement, with a shifting focus to the company's general risk management practices in order to assess if there is a need for a change in our internal ESG rating on the company. We will continue running the engagement with Softbank Group.

3) Current scoring, based on Nordea proprietary ESG model. 4) Proxy voting refers to the last 12 month-period. Generally, we vote in annual reports and most of the Annual General Meetings (AGM) which occurs once a year. If there is no vote, it is generally because the fund was not invested at the time when the AGM happened. Please find out more on nordea.com/sustainability or access directly the [voting portal](#).

Description of ISS-ESG methodology

This report highlights how portfolio companies - through their products and services - have positive and negative impact on a total of 15 sustainability objectives covering both Social and Environmental aspects. These objectives have been developed by ISS-ESG and closely aligned with the United Nations Sustainable Development Goals. The objectives include 7 Social and 8 Environmental objectives with scores ranging from -10 to +10. The results are then compared with the benchmark.

Please note that this report does not comment on the Governance aspect as we already report on such considerations in separate reports.

As the UN SDGs primarily target states and the public sector, not all of the goals are relevant for companies. For this reason, ISS-ESG defined a total of 15 sustainability objectives which are closely aligned with the SDGs. They are used to assess companies' product portfolios in terms of their contribution towards sustainable development based on their revenue weight. For each individual objective, a qualitative analysis is conducted to determine whether a product or service category contributes to or refrain from attaining the objective. As a result, the positive and negative effects of different product groups may partly cancel each other out within a given objective.

Further information on the company and the methodology is available at: www.issgovernance.com/esg/impact-un-sdg/

List of the 15 overarching sustainable objectives

7 social objectives

- Alleviating poverty
- Combating hunger and malnutrition
- Ensuring health
- Delivering education
- Attaining gender equality
- Providing basic services
- Safeguarding peace

8 environmental objectives

- Achieving sustainable agriculture & forestry
- Conserving water
- Contributing to sustainable energy use
- Promoting sustainable buildings
- Optimising material use
- Mitigating climate change
- Preserving marine ecosystems
- Preserving terrestrial ecosystems

Please note that each portfolio and benchmark are assigned a score ranging from -10 to +10 based on the above 15 sustainable objectives. For the approach to be meaningful and sound we have assumed that the minimum coverage at the fund level should at least be 60%. This means that for a fund score to be meaningful at least 60% of its holdings need to have a score.

The sub-funds mentioned are part of Nordea 1, SICAV, an open-ended Luxembourg-based investment company (Société d'Investissement à Capital Variable), validly formed and existing in accordance with the laws of Luxembourg and with European Council Directive 2009/65/EC of 13 July 2009. **This document is advertising material and does not disclose all relevant information concerning the presented sub-funds.** Any investment decision in the sub-funds should be made on the basis of the current prospectus and the Key Investor Information Document (KIID), which are available, along with the current annual and semi-annual reports, electronically in English and in the local language of the market where the mentioned SICAV is authorised for distribution, without charge upon request from Nordea Investment Funds S.A., 562, rue de Neudorf, P.O. Box 782, L-2017 Luxembourg, from the local representatives or information agents, or from our distributors. Investments in derivative and foreign exchange transactions may be subject to significant fluctuations which may affect the value of an investment. **Investments in Emerging Markets involve a higher element of risk. The value of shares can greatly fluctuate as a result of the sub-fund's investment policy and cannot be ensured. Investments in equity and debt instruments issued by banks could bear the risk of being subject to the bail-in mechanism (meaning that equity and debt instruments could be written down in order to ensure that most unsecured creditors of an institution bear appropriate losses) as foreseen in EU Directive 2014/59/EU.** For further details of investment risks associated with these sub-funds, please refer to the relevant Key Investor Information Document (KIID), available as described above. Nordea Investment Funds S.A. has decided to bear the cost for research, i.e. such cost is covered by existing fee arrangements (Management-/Administration-Fee). Nordea Investment Funds S.A. only publishes product-related information and does not make any investment recommendations. Published by Nordea Investment Funds S.A., 562, rue de Neudorf, P.O. Box 782, L-2017 Luxembourg, which is authorized by the Commission de Surveillance du Secteur Financier in Luxembourg. Further information can be obtained from your financial advisor. He/she can advise you independently of Nordea Investment Funds S.A. **Please note that all sub funds and share classes might not be available in your country of jurisdiction.** **Additional information for investors in Switzerland:** The Swiss Representative and Paying Agent is BNP Paribas Securities Services, Paris, Succursale de Zurich, Selnaustrasse 16, 8002 Zurich, Switzerland. **Additional information for investors in Germany:** The Information Agent in Germany is Société Générale S.A. Frankfurt Branch, Neue Mainzer Straße 46-50, 60311 Frankfurt am Main, Germany. A hard copy of the above-mentioned fund documentation is also available here. **Additional information for investors in Austria:** The Information and Paying Agent in Austria is Erste Bank der österreichischen Sparkassen AG, Am Belvedere 1, 1100 Vienna, Austria. **Additional information for investors in the Netherlands:** Nordea 1, SICAV is a Luxembourg Undertaking for Collective Investment in Transferable Securities (UCITS) registered in the Netherlands in the register kept by the AFM, and as such is allowed to offer its shares in the Netherlands.
