

Sustainability Exposure Report

First quarter 2019

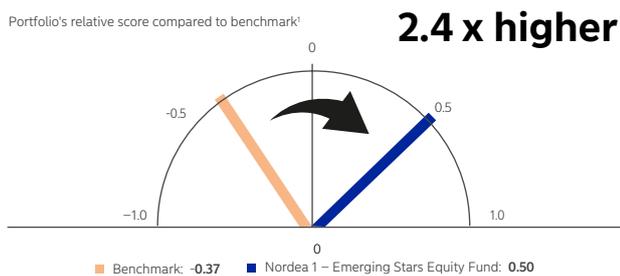

Nordea 1 – Emerging Stars Equity Fund

This report highlights how portfolio companies - through their products and services - have positive and negative impact on a total of 15 sustainability objectives which are closely aligned with the United Nation Sustainable Development Goals. The results are then compared with the benchmark.

Total net score (vs benchmark)

The chart below shows the contribution of the portfolio holdings products and services to both Environment and Social considerations compared to companies held in the benchmark.

The contribution of the portfolio to the 15 objectives (social and environmental) is 2.4 times higher than the benchmark.

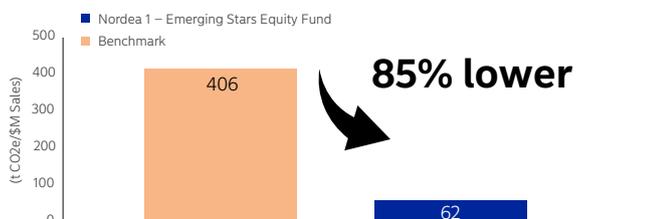

1) The relative score is calculated as follows: (Portfolio net score) / (Benchmark net score). Should the score of the benchmark be close to nil the relative score multiple might be distorted. **Comparison with other financial products or benchmarks is only meant for indicative purposes.**

Top contributors

- 1. NMC Health** (GB, Healthcare facilities and services). The company mainly contributes to the social objective “Providing basic services” as it operates hospitals, rehabilitation centres, and distributes pharmaceutical products.
- 2. Samsung SDI** (KR, Electronic Components). The company mainly contributes to the environmental objectives “Mitigating Climate Change” and “Contributing to Sustainable Energy Use” through the offering of energy storage systems (ESS), which are crucial for the renewable energy sector, and batteries for hybrid and electric vehicles.
- 3. AIA Group** (HK, Insurance). The company mainly contributes to the social objective “Providing basic services” through the provision of microinsurance, insurance for high-risk groups, health, accident and disability insurance, pension products.

Carbon footprint

The fund has a carbon footprint 85% lower than the benchmark.

Comparison with other financial products or benchmarks is only meant for indicative purposes.

The contribution of the portfolio to the 8 environmental objectives is 2.5 times higher than the benchmark.

Comparison with other financial products or benchmarks is only meant for indicative purposes.

Top 3 environmental objectives

1. Contributing to sustainable energy use
2. Mitigating climate change
3. Achieving sustainable agriculture and forestry

Main SDGs exposure

Portfolio Company highlight: NMC Health

NMC Health operates in two divisions Healthcare and Distribution. In its Healthcare division, the company operates general hospitals, medical centres, rehabilitation clinics and fertility clinics. Acute care hospitals are vital for the public health system and therefore contribute to public health. In its Distribution division, NMC Health focuses on the trading of fast moving consumer goods and pharmaceuticals. Thus, parts of these operations contribute to public health. The company does not seize the opportunity to provide access to health for underserved patients (e.g. illegal immigrants)

² Please note that the total sustainability score is the sum of the social and environmental scores and may slightly differ due to rounding differences. Should the benchmark score be negative the multiplier is calculated as follow: (Portfolio score + 1) / (Benchmark score + 1). Description of ISS-oekom methodology

This report highlights how portfolio companies - through their products and services - have positive and negative impact on a total of 15 sustainability objectives covering both Social and Environmental aspects. These objectives have been developed by ISS-oekom and closely aligned with the United Nation Sustainable Development Goals. The objectives include 7 Social and 8 Environmental objectives with scores ranging from -10 to +10. The results are then compared with the benchmark.

Please note that this report does not comment on the Governance aspect as we already report on such considerations in separate reports.

As the UN SDGs primarily target states and the public sector, not all of the goals are relevant for companies. For this reason, ISS-oekom defined a total of 15 sustainability objectives which are closely aligned with the SDGs. They are used to assess companies' product portfolios in terms of their contribution towards sustainable development based on their revenue weight. For each individual objective, a qualitative analysis is conducted to determine whether a product or service category contributes to or refrain from attaining the objective. As a result, the positive and negative effects of different product groups may partly cancel each other out within a given objective.

Further information on the company and the methodology is available at: <https://www.issgovernance.com/esg/impact-un-sdg/>

List of the 15 overarching sustainable objectives

7 social objectives

- Alleviating poverty
- Combating hunger and malnutrition
- Ensuring health
- Delivering education
- Attaining gender equality
- Providing basic services
- Safeguarding peace

8 environmental objectives

- Achieving sustainable agriculture & forestry
- Conserving water
- Contributing to sustainable energy use
- Promoting sustainable buildings
- Optimising material use
- Mitigating climate change
- Preserving marine ecosystems
- Preserving terrestrial ecosystems

Please note that each portfolio and benchmark are assigned a score ranging from -10 to +10 based on the above 15 sustainable objectives. For the approach to be meaningful and sound we have assumed that the minimum coverage at the fund level should at least be 60%. This means that for a fund score to be meaningful at least 60% of its holdings need to have a score.
