## Nordea 1 – Nordic Equity Fund

ISIN: LU0064675639 (BP-EUR) / LU0335102843 (BI-EUR)

### Highlights

- Investment universe: Nordic-listed companies, which are active in several industries and hence offer high diversification benefits
- Portfolio composed of 30 to 40 world-class companies across a broad number of industries
- Invests in high potential economies: export-oriented, innovation-driven, transparent and supported by a strong legal and socio-political background
- Managed by an experienced team based in Stockholm, cooperating with local Portfolio Managers in Helsinki, Bergen and Copenhagen
- Investment approach involves a fundamental “bottom-up” process focusing on internal research and targeting stocks with 3 common characteristics: attractive valuation, positive earnings momentum and positive news flow

### Asset Management at Nordea

As an active investment manager, Nordea Asset Management manages asset classes across the full investment spectrum and aims to serve its clients in every market condition. Nordea's success is based on a sustainable and unique multi-boutique approach that combines the expertise of specialised internal boutiques with exclusive external competences allowing us to deliver alpha in a stable way for the benefit of our clients. Furthermore, we have put a lot of emphasis on launching outcome – as opposed to benchmark – oriented investment solutions whose basis, “stability investment philosophy”, is designed to meet clients' risk appetite and needs.

The Nordea 1 – Nordic Equity Fund is internally managed by the Nordic, Finnish and Swedish Equities Team, which is based in Stockholm. The team stands for bottom-up and research-driven analysis running focused equity portfolios with a high conviction level, a large active share and a preference for quality companies with a strong cash flow generation and attractive valuations.

### An attractive investment destination

During the last financial crisis, the Nordic region has surged as a safe haven not only within the troubled eurozone, but also around the world.

The region, which consists of Norway, Sweden, Denmark and Finland, has avoided both the turmoil of European peripheral countries and the credit crunch difficulties. Although not isolated from the global slowdown in 2008, these countries recovered much better than the rest of Europe due to better financial fundamentals, lower debt and a stable political environment, which – combined with a technological receptive surrounding – has been also positive for companies within the region.

**“If you had to be reborn anywhere in the world, you would want to be a Viking”** according to the Economist<sup>1</sup>. Indeed, the Nordic countries are at the top of any list concerning economic competitiveness, social health, technological innovation and happiness. For all these reasons, the Nordics have become a model for many economies.

Furthermore, being among the countries in the world which invest the most in research and development, the Nordic region is paving the way for a bright future.

### Why invest in Nordic equities?

The Nordea 1 – Nordic Equity Fund invests in the equity markets of **Sweden, Finland, Norway and Denmark**.

<sup>1</sup>) Source: The Economist. 1<sup>st</sup> edition January 2013.

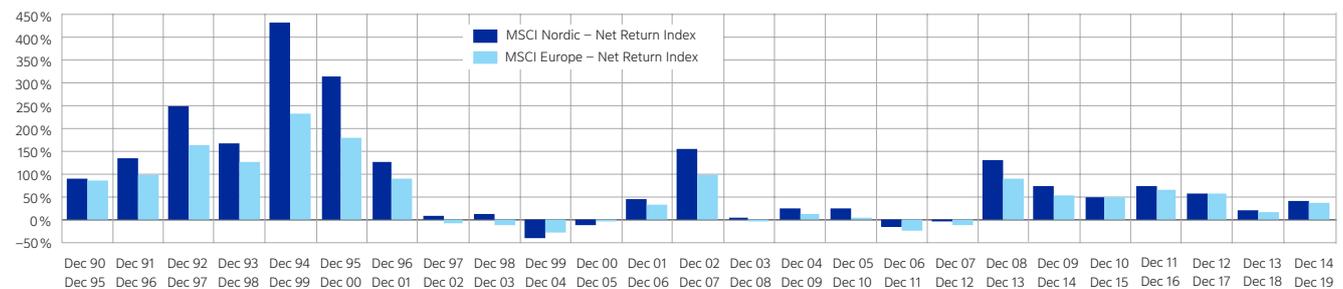

These markets offer strong a sector diversification, with each country being specialised in different industries.

For the long-term investor, investing in Nordic equities has returned a higher performance than investing in European equities portfolios<sup>2</sup>.

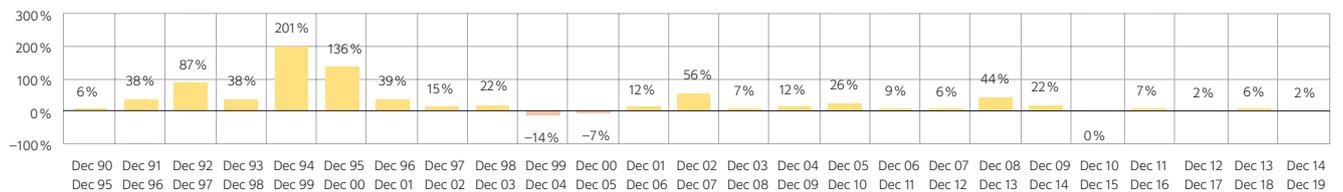

In terms of risk, an investment in Nordic equities usually results in higher volatility compared to one in European equities. This is due to the fact that there is a higher portion of cyclical sectors (i.e. Industrials, Consumer discretionary) in the Nordic markets.

## Nordic companies historically outperformed their European peers

### Nordic vs. European equities on a 5 year rolling period.

### Excess return

Source: Datastream. Data in EUR. Period under consideration: 1990 – 2019 on a 5-years rolling period. The performance represented is historical; past performance is not a reliable indicator of future results and investors may not recover the full amount invested. The value of your investment can go up and down, and you could lose some or all of your invested money.

## Strong exposure to emerging markets

Many companies have already proven to be strong global competitors. This is a key feature for the region and its companies to ensure sustained growth, since internal demand is limited and exports largely underpin expansion. In fact, **Nordic companies derive a significant part of their revenue outside Europe, in particular from fast-growing emerging markets.** Therefore they offer a **better alternative than German companies**, when it comes to investing in European export leaders to fast growing markets.

## World-famous brands

For such a small geographical area, the number of renowned brands is outstanding. **Nokia, Volvo, Ericsson, Novo Nordisk and Bang & Olufsen** are just some **examples of well-known market leaders** from the region. Many other companies are recognised within their industries, and many play an important role within niche businesses that constantly require the ability to innovate.

## How Nordea invests in Nordic equities

Essentially, the fund's investment approach involves a fundamental **"bottom-up" process** focusing on internal research. We proudly classify ourselves as **active managers**, supported

by academic studies and empirical findings. In order to maximise the return on our in-depth research and to minimise undesirable transaction costs we run portfolios with a high active share and a long-term investment horizon.

We believe long-term sustainable outperformance is built on the strength of a best-in class infrastructure, a clear process and an investment philosophy which we thoroughly follow. We are running a concentrated portfolio with an **active share of around 60–80%**, with a focus on **fundamental bottom-up** research and preference for quality companies with a strong cash flow generation.

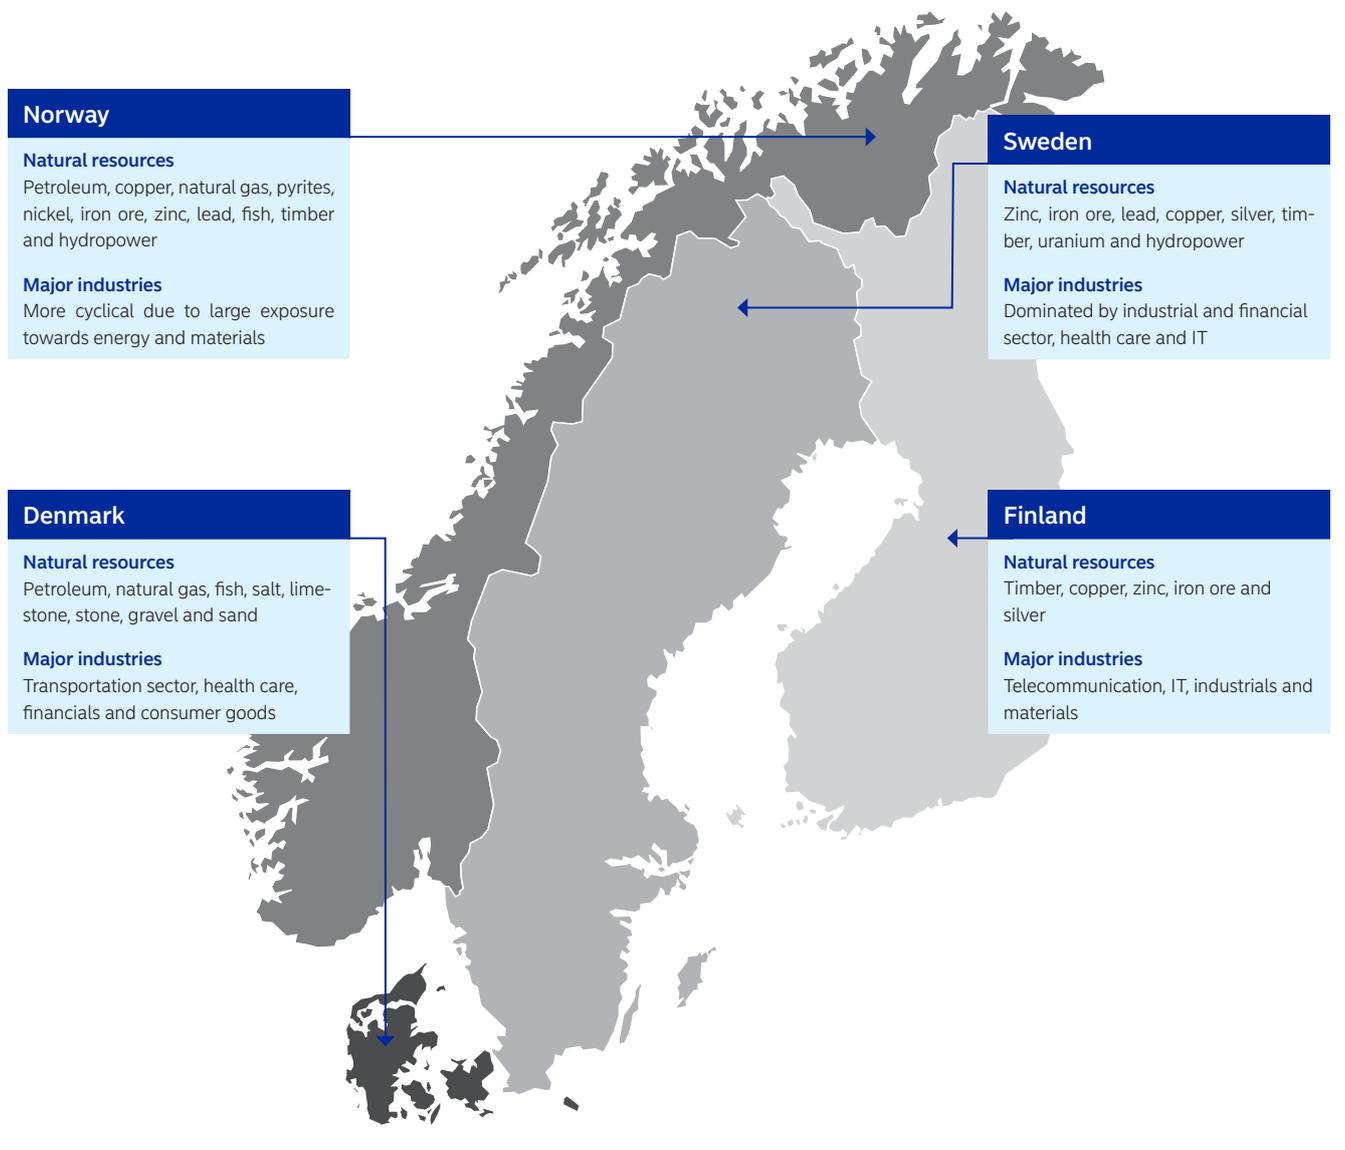

To maximise returns on our rigorous research, built on a strong local presence, we aim to have a **3–5 year holding period.** Through this approach an investor should expect an outperformance after fees over a 3 and 5 year rolling basis but also acknowledge that periods of weak returns will occur from time to time.

Nordea is the leading financial services group in the Nordic region with a wide range of corporate relationships. We can leverage our strong market position, both when developing competitive insights about industries and companies in the region. When researching for Nordic companies our critical mass gives us a clear advantage.

<sup>2)</sup> The performance represented is historical; past performance is not a reliable indicator of future results and investors may not recover the full amount invested. The value of your investment can go up and down, and you could lose some or all of your invested money.

## Profile of the Nordic region

A broad variety of natural resources and industries

## Investor profile

- Having a long-term investment horizon: the fund is not designed for investors pursuing short-term relative outperformance; at least 5 years is required in order to fully reap the benefits of our approach
- This sub-fund is suitable for the investor who is prepared to take risks associated with investments in the stock markets in order to maximise returns
- Thus, the investor should have experience with volatile products and be able to acknowledge that (significant) temporary losses may occur within the investment horizon
