Investment Strategy

The fund aims to generate a return of cash + 4-5% (gross of fees) p.a. over a full investment cycle with a volatility between 5-7% p.a. The fund uses numerous types low-correlation investment strategies to provide dynamic exposure to multiple asset classes, within a universe consisting of a subset of equities, fixed income securities and currencies. The fund will typically implement some of the different investment strategies through pair trades and/or long/short positions across the different investable asset classes. In other words, the fund may combine a long position that is (partly) offset by a short position. Over time, the fund is aiming to build a largely market neutral portfolio.
