ESG integration summary

This fund does not invest in companies involved in the production of illegal or nuclear weapons or exhibiting more than 10% of their revenues from oil sand. We also exclude companies with large and sustained exposure to coal mining, with a 10% revenue threshold on thermal coal and a 30% revenue threshold on total coal (including metallurgical coal). Beyond these corporate exclusions (1), we have developed a specific range of cutting-edge products focusing on Responsible Investment: the STARS funds. Our dedicated Responsible Investment team conducts a thorough ESG analysis on each holding resulting in an internal score. Our proprietary ESG scoring model includes a business model dimension in addition to environmental, social and governance aspects. We assess how sustainability trends can positively or negatively impact the company's business model, its value chain, products and services. We also seek to understand the company's contribution to these themes. Please note that the MSCI ESG rating is mainly backward looking, relying mainly on publicly available information and can differ from Nordea's internal scoring which is based on a forward-looking approach. (1) Nordea Asset Management corporate exclusion list is available on the following link: <https://www.nordea.com/en/sustainability/sustainable-business/investments/exclusion-list/>
