### Investment Strategy

The fund seeks to achieve better than benchmark performance over full market cycles, with the highest investment priority being capital preservation. The investment philosophy is based on three guiding principles, namely: focus on cash return on tangible capital rather than earnings per share; determine the value of a company by cash inflows and outflows discounted by an "optimal" cost of capital; and do not over-diversify but ensure high conviction positions contribute meaningfully to returns with limited turnover. The process utilizes qualitative and quantitative sources for idea generation.
