

NOTICE TO SHAREHOLDERS

As shareholders of Nordea 2, SICAV (the “Company”), you are hereby informed that a new prospectus of the Company will be issued in August 2022 including the following key changes effective as from 2 August 2022:

1. Key changes

1.1 Relevant to all shareholders

Taking into consideration the requirements of the Final Report on draft Regulatory Technical Standards (the so-called “**Level 2**” measures) with regard to the content, methodologies and presentation of disclosures required under Regulation (EU) 2019/2088 on sustainability-related disclosures in the financial services sector (“**SFDR**”), the following disclosures amendments have been made:

- i. The “SFDR related information” section of the fund descriptions has been removed and the environmental and social characteristics of the funds will be detailed in the template precontractual disclosures for financial products (“**Annexes**”) prescribed by the Level 2 measures. The Annexes will be included as “Appendix 1” to the Prospectus.
- ii. As the Article 8 funds do not have a specific index designated as a reference benchmark to determine whether the funds are aligned with the environmental and/or social characteristics that they promote, it is clarified under the “Benchmark” section of the fund description that the benchmark is not aligned with or used for the purpose of attaining the respective environmental and social characteristics of the fund.
- iii. Information on sustainability risks and how such risks are integrated in our decision process are included in the general “Risk Descriptions” (with sustainability risks specifically highlighted for China and emerging and frontier markets) and in the “Responsible Investment Policy” sections of the Prospectus, as well as in the fund descriptions.

The disclosures relating to usage by the funds of securities financing transactions (“**SFTs**”) within the meaning of Regulation (EU) 2015/2365 on transparency of securities financing transactions and of reuse are adjusted as follows:

- i. The types of securities financing transactions that the funds may use and their inherent risks, and the collateral risk management policies applied by the management company to reduce counterparty risk in connection with the use of such instruments and techniques, are clarified in the “How the Funds Use Instruments and Techniques” section of the Prospectus.
- ii. The maximum permitted usage of 0-100% total assets in repurchase and reverse repurchase transactions has been removed from the general “How the Funds Use Instruments and Techniques” section of the Prospectus as, where a fund intends to use SFTs, the fund descriptions disclose the expected and maximum permitted usage levels.

Updated disclosures have been included in the “Investment policy” and “Risk Consideration” sections of the fund descriptions for funds that may invest in, or be exposed to, mortgage-backed and asset-backed securities (ABS/MBS).

It is confirmed under “Hedging risk – contagion” in the “Risk Descriptions” section of the Prospectus that an up-to-date list of funds with share classes that could experience contagion risk is available on request and free of charge at the registered office of the management company.
